## GCSE <br> BIOLOGY

Foundation Tier Paper 2F

## 8461/2F

Friday 7 June 2019
Afternoon
Time allowed: 1 hour 45 minutes
For this paper you must have:

- a ruler
- a scientific calculator.

At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.
[Turn over]

## BLANK PAGE

## INSTRUCTIONS

- Use black ink or black ball-point pen.
- Answer ALL questions in the spaces provided.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

## INFORMATION

- The maximum mark for this paper is 100.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

DO NOT TURN OVER UNTIL TOLD TO DO SO

Answer ALL questions in the spaces provided.

| 0 | 1 | The nervous system allows a person to detect |
| :--- | :--- | :--- | stimuli.

| 0 | 1.1 | Draw ONE line from each stimulus to the |
| :--- | :--- | :--- | sense organ that detects the stimulus. [2 marks]

## STIMULUS

## Tongue

Moving a hand away from a hot object is an example of a reflex action.

| 0 | 1 | .2 |
| :--- | :--- | :--- |${ }^{2}$ What is a reflex action? [2 marks]

$\qquad$

01 . 3 A muscle in the arm moves the hand away from the hot object.

How does the arm muscle do this? [1 mark]
Tick ( $\checkmark$ ) ONE box.

The muscle contracts.

The muscle expands.

The muscle relaxes.

The muscle shrinks.
[Turn over]

Two students investigated the effect of drinking coffee on reaction time.

This is the method used.

1. Student A holds a metre rule just above student B's hand, as shown in FIGURE 1.
2. Student A lets go of the metre rule.
3. Student $B$ catches the metre rule as quickly as possible.
4. Student A writes down the reading from the scale on the metre rule.
5. Students $A$ and $B$ repeat steps $1-4$ another four times.
6. Student B then drinks a cup of coffee.
7. After 15 minutes, students $A$ and $B$ repeat steps $1 \mathbf{- 5}$.

FIGURE 1

Metre rule held by

[Turn over]

TABLE 1 shows some of the results.

## TABLE 1

| Test | Reading from scale on metre rule in cm |  |

| :--- | :--- | :--- | have been removed. [1 mark]

| 0 | 5 | 4 |
| :--- | :--- | :--- | Why does the removal of trees cause an increase in carbon dioxide in the atmosphere? [2 marks]

Tick ( $\checkmark$ ) TWO boxes.

There are fewer animals.

There is less photosynthesis.

There is less respiration.

The soil dries out.

The trees are burned.
0.5 . 5 What effect would an increase in carbon dioxide in the atmosphere have on global air temperature? [1 mark]

Tick $(\checkmark)$ ONE box.

Decrease

Increase

Stay the same
[Turn over]
'Sustainable forestry' reduces the harmful effects of cutting down trees on the environment.

FIGURE 11 shows a method of 'sustainable forestry'.

Numbers 1-9 show different parts of a rainforest.

## FIGURE 11

Map of the rainforest

$0 \quad 100 \mathrm{~km}$

The trees are cut down in the sequence
1-2-3-4-5-6-7-8-9

- The trees are cut down in only one area at any one time.
- It takes 30 years to cut down the trees in each area.
- The trees in the 'Old growth' area are never cut down.

| 0 | 5 | 6 How many years would it take to cut down the |
| :--- | :--- | :--- | trees in all of the numbered areas in FIGURE 11? [2 marks]

Number of years =
[Turn over]
$\qquad$

Repeat of FIGURE 11
Map of the rainforest

$0 \quad 100 \mathrm{~km}$

| 0 | 5 | 7 The rainforest contains: |
| :--- | :--- | :--- |

- 750 species of trees
- 400 species of birds
- 150 species of butterflies
- many other species of plants and animals.

Explain how the pattern of cutting down trees shown in FIGURE 11 stops the biodiversity of the rainforest being reduced. [4 marks]
$\qquad$
$\qquad$
[Turn over]

| 0 | 6 | Two of the substances the body excretes are |
| :--- | :--- | :--- | urea and carbon dioxide.

\section*{| 0 | 6.1 | Complete the sentence. [1 mark] |
| :--- | :--- | :--- |}

Choose the answer from the list below.

- carbohydrate
- lipid
- protein
- salt

A person makes a lot of urea if the person's diet contains a lot of $\qquad$ .

| 0 | 6.2 | Why must urea be excreted from the body? |
| :--- | :--- | :--- | [1 mark]

$\qquad$

| 0 | 6.3 A person produces more carbon dioxide during |
| :--- | :--- | :--- | exercise than when resting.

Complete the sentences. [2 marks]
Choose answers from the list below.

- breathing
- digestion
- egestion
- osmosis
- respiration

The process that makes carbon dioxide is
$\qquad$ -

During exercise, extra carbon dioxide can be removed from the body by increasing the rate of $\qquad$ .
[Turn over]

| 0 | 6.4 | Excess water must also be removed from the |
| :--- | :--- | :--- | body.

If a person sweats a lot, less water will be excreted in the urine.

A healthy person did the same amount of exercise on each of 3 days.

TABLE 2 shows information for the $\mathbf{3}$ days.

## TABLE 2

| Day | Air <br> temperature <br> in ${ }^{\circ} \mathrm{C}$ | Volume of <br> water <br> consumed in <br> $\mathrm{cm}^{3}$ | Relative <br> amount of urine <br> produced by <br> the kidneys |
