## 8382/1F

Foundation Tier Paper 1
Thursday 11 June 2020 Afternoon
Time allowed: 1 hour 45 minutes

## MATERIALS

For this paper you must have:

- a calculator
- mathematical instruments.

At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.
[Turn over]

## BLANK PAGE

## INSTRUCTIONS

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Answer ALL questions.
- You must answer the questions in the spaces provided. Do not write on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

## INFORMATION

- The marks for questions are shown in brackets.
- The maximum mark for this paper is $\mathbf{8 0}$.
- You may ask for more answer paper and graph paper. These must be tagged securely to this answer booklet.

## DO NOT TURN OVER UNTIL TOLD TO DO SO

Answer ALL questions in the spaces provided.

# What type of data is the number of 

 adverts you see when watching a film?Circle your answer. [1 mark]
continuous grouped
categorical discrete

Which of these values could NOT be a measure of correlation?

Circle your answer. [1 mark]
0
$+0.5$
+1.2
1

Which of these is a SMALL PART of the population, used to avoid having to ask everyone?

Circle your answer. [1 mark]
census questionnaire
sample representative

4
Here are the scores obtained when a biased spinner is spun 100 times.

| SCORE | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| FREQUENCY | 17 | 3 | 0 | 2 | 16 | 24 | 18 | 20 |

Circle the best estimate of the probability of scoring 9 [1 mark]
$\frac{1}{24}$
0.24
$\frac{9}{24}$
$\frac{1}{8}$ $\square$
[Turn over]

Sam asks some friends how many internet-enabled devices are in their homes.

The results are
$\begin{array}{llllllllllll}4 & 5 & 3 & 6 & 4 & 5 & 5 & 7 & 6 & 8 & 3 & 5\end{array}$

THREE YEARS EARLIER he had asked the same friends the same question.

The results were

| Number of devices <br> three years earlier | Frequency |
| :--- | :--- |
| 1 | 1 |
| 2 | 4 |
| 3 | 6 |
| 4 | 0 |
| 5 | 1 |

# By calculating a measure of average and a measure of spread, make TWO comparisons between the current data and the data for three years ago. [5 marks] 

Comparison 1

## Comparison 2

$\qquad$
$\qquad$

When some people eat a bacon sandwich, they have

- brown sauce on it
- red sauce on it
- no sauce on it.

Bob and Lisa decide to test the hypothesis
"The majority of people who have a bacon sandwich have red sauce on it."

6 (a)
Bob's work canteen sells bacon sandwiches.

One morning, 300 people use the canteen for breakfast.

Bob decides to sample 30 of the 300 people to see which sauce, if any, they have on their bacon sandwich, if they buy one.

6 (a) (i) Describe how Bob could obtain a systematic sample of 30 people from the 300 [2 marks]

## [Turn over]

$\qquad$
$\qquad$

Give TWO reasons why the sample Bob is obtaining is unlikely to be very useful in testing out the hypothesis. [2 marks]

## Reason 1

The strength of volcanic eruptions is measured using the Volcanic Explosivity Index (VEI) using a scale of 0-8

From 1900-2019 there have been 79 eruptions of 4 or above on the VEI.

The pictogram represents some of this information.

| 1900-1919 | $\triangle \Delta \Delta \Delta \Delta \Delta \Delta$ |
| :---: | :---: |
| 1920-1939 | $\Delta \Delta \Delta \Delta \Delta \Delta$ |
| 1940-1959 | $\Delta \Delta \Delta \Delta \Delta L$ |
| 1960-1979 | $\Delta \Delta \Delta \Delta \Delta$ |
| 1980-1999 | $\Delta \Delta \Delta \Delta \Delta \Delta \Delta \Delta \Delta$ |
| 2000-2019 |  |

KEY: $\bigwedge$ represents $\qquad$

Between 1920 and 1939, there were 12 eruptions of strength 4 or above.

Complete the pictogram, including the key. [4 marks]

Poppy wants to buy a season ticket at her local football club.

This will give her entry to ALL 20 home games over the season.

The table shows the cost of season tickets for the areas she is interested in.

| Area | Cost if bought in <br> July | Cost if bought in <br> August |
| :--- | :--- | :--- |
| South Stand | $£ 200$ | $£ 220$ |
| West Stand | $£ 175$ | $£ 195$ |
| East Stand | $£ 240$ | $£ 250$ | ticket bought on 15 August? [1 mark]

Answer £

9 (b) There is a 10\% chance that Poppy will miss a home game.

9 (b) (i)
How many of the $\mathbf{2 0}$ home games will Poppy expect to miss next season?
[2 marks]

## Answer

[Turn over]

9 (b)(ii) Poppy wants to sit in the EAST STAND.
The price of a ticket for Poppy for each home game would be $£ 16$

However, on 30 July she decides to buy a season ticket.

How much will she expect to save by buying the season ticket? [3 marks]

Answer £ $\qquad$

## 25

9 (c) Poppy thinks the tickets at her club are more expensive than at other clubs in the same league.

She decides to investigate this.
Write down a possible hypothesis she could use. [1 mark]

9 (d) Identify the population for her investigation. [1 mark]

## [Turn over]

9 (e) Poppy decides to carry out a census.

## What does that mean in this context? [1 mark]

9 (f)
Here are some options for how Poppy might obtain appropriate data.

A - write a questionnaire and send it to all the other clubs
$B$ - phone each of the other clubs and interview someone from the club

C - log on to the website of each club to try to find out the data

D - ask a season ticket holder from each club what they paid

9 (f) (i)
Circle the letter of the best option for obtaining appropriate data. [1 mark]
A
B
C
D

9 (f) (ii) For TWO of the options you did not choose, give a reason, different each time, why you did not choose that option. [2 marks]

## BLANK PAGE

[Turn over]

Some are relevant to people and their main job and some are not.

A - How much you are paid in a year
B - Your favourite TV series
C - How many days of holiday you are allowed each year

D - How tall you are
E - Distance from your home to work
F - How much you like your work colleagues

G - How happy you are at work

Adam is investigating whether people who are paid more are happier at work.

10 (a) Write down a possible research question for Adam's investigation. [1 mark]

10 (b)
Write down the letter of the explanatory variable. [1 mark]

## Answer

10 (c)
Write down the letter of the response variable. [1 mark]

Answer

10 (d) Write down the letters of TWO possible extraneous variables. [2 marks]

Answer $\qquad$ and $\qquad$
[Turn over]

The diagram shows two box plots, $A$ and $B$, which are plotted on the same scale.
(A)

(B)

11 (a)
Circle whether each of these statements is true, false or you cannot tell. [3 marks]

> The minimum value of $A$ is smaller than the minimum value of $B$.
True
False
Cannot tell

The median of $\mathbf{A}$ is smaller than the median of $B$.
True
False
Cannot tell

The interquartile range of $A$ is smaller than the interquartile range of $B$.
True
False

# The mean of $\mathbf{A}$ is smaller than the mean of $B$. 

True False Cannot tell

11 (b) A data value from box plot $A$ is chosen at random.

Circle the probability that this value is between the minimum and maximum of the data represented by box plot B.

A YouGov survey was carried out with nearly 2000 British working adults who have an 8 -hour working day.

They were asked which period of 8 hours they would prefer to work.

YouGov produced this summary graph showing the PERCENTAGE of each response, rounded to the nearest whole number.

Source: yougov.com

Show that about two-thirds of adults questioned wanted to work EARLIER than the traditional 9 am to 5 pm working hours. [2 marks]

12 (b) Amber says,
"NONE of the adults questioned wanted to start work at 11.30 am."

## Is Amber correct?

Tick $(\checkmark)$ a box.

Give a reason for your answer. [1 mark]

## [Turn over]

12 (c)
Give ONE reason why these results will NOT apply to all British working adults. [1 mark]

[Turn over]

200 students, 200 parents with young children and 200 retired people were asked what was the first thing they did on their mobile phones that day.

The results are shown in the table.

|  | Social media | Gaming | News | Other |
| :--- | :--- | :--- | :--- | :--- |
| Students | 124 | 52 | 13 | 11 |
| Parents | 120 | 8 | 37 | 35 |
| Retired | 88 | 11 | 67 | 34 |

One of the people is chosen at random.

13 (a) (i) Work out the probability that this person goes on social media first that day. [2 marks]
$\qquad$
$\qquad$

Answer $\qquad$

13 (a) (ii) Work out the probability that this person does NOT go on gaming first that day. [2 marks]

Answer

13 (b) One of the people who went on gaming first that day is chosen at random.

What is the probability that this person is retired? [2 marks]
$\qquad$
$\qquad$

Answer $\qquad$
[Turn over]

Work out the probability that TWO of the 200 retired people, chosen at random, both went on news first that day.

Give your answer to three decimal places. [3 marks]
$\qquad$

Answer $\qquad$

13 (d) Joe looks at the data in the table and makes the two statements below.

Is each statement correct?
Give a reason for each decision.
[2 marks]

STATEMENT 1 Most of these 600 people went on social media first THAT day.

Tick ( $\checkmark$ ) a box.

$\square$

## Reason

STATEMENT 2 Most of these 200 retired people go on social media first EVERY day.

Tick ( $\checkmark$ ) a box.

Cannot tell

The Venn diagram shows information about local businesses in Kiveton.

It shows which, if any, of the following features each business has.

- website (W)
- social media presence (S)
- adverts in the local free newspaper (A)

14 (a)
How many businesses are represented in the Venn diagram? [1 mark]

Answer $\qquad$

14 (b) How many businesses have EXACTLY TWO of the three features? [1 mark]

Answer

14 (c) One business is chosen at random.
What is the probability it has a website? [2 marks]

Answer

14(d) A business with a social media presence is chosen at random.

Work out the probability that this business does NOT advertise in the local free newspaper. [2 marks]
$\qquad$

Answer

A deadly disease currently has no treatment.

A researcher develops a drug which she believes will treat the disease.

She suggests a statistical experiment to test her drug.

Infect six people chosen at random with the disease.

Give the drug to all six people.
Record whether each person recovers or not.

15 (a)
Write down TWO problems with the researcher's experiment. [2 marks]

Problem 1
$\qquad$
$\qquad$
$\qquad$

## 45

Problem 2 $\qquad$
$\qquad$
$\qquad$

15(b) The researcher carries out a more suitable experiment.

She writes an article for a magazine to highlight her results.

She gives the name of each patient in the experiment and records how they responded to the drug.

The magazine editor asks the researcher to rewrite her article.

Explain why. [1 mark]
