**Thursday 13 June 2019      Afternoon**

**Time allowed: 1 hour 45 minutes**

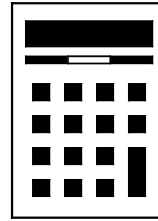

**At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.**

**[Turn over]**

**For this paper you must have:**

- **a calculator**
- **mathematical instruments.**

## **INSTRUCTIONS**

- **Use black ink or black ball-point pen. Draw diagrams in pencil.**
- **Answer ALL questions.**
- **You must answer the questions in the spaces provided. Do not write on blank pages.**
- **Do all rough work in this book. Cross out any work you do not want to be marked.**

## **INFORMATION**

- **The marks for the questions are shown in brackets.**
- **The maximum mark for this paper is 80.**
- **You may ask for more answer paper and graph paper. These must be tagged securely to this answer booklet.**

**DO NOT TURN OVER UNTIL TOLD TO  
DO SO**

**Answer ALL questions in the spaces provided.**

**1**

**What is the name for data that has been collected but not sorted in any way?**

**Circle your answer. [1 mark]**

**raw      ordinal      discrete      grouped**

Quin is a window cleaner who works Monday to Friday each week.

Each day he has a list of 20 houses whose windows he plans to clean.

The table shows the risk, for different types of weather, that a house owner will NOT want their windows cleaning.

WEATHER	RISK
Sunny	0%
Light Rain	50%
Heavy Rain	90%

**6 (a)**

**On Monday there is LIGHT RAIN.**

**Work out the number of houses whose windows Quin should expect to clean.  
[1 mark]**

---

---

---

**Answer** \_\_\_\_\_

**6 (b)**

**On Tuesday there is HEAVY RAIN.**

**Show that he should expect to clean the windows of only 2 houses that day.  
[1 mark]**

---

---

---

**[Turn over]**

6 (c)

By the end of Friday, Quin expected to clean the windows of 54 houses.

Complete the table to show ONE possibility for the remaining weather that week. [2 marks]

DAY	WEATHER
Monday	Light rain
Tuesday	Heavy rain
Wednesday	
Thursday	
Friday	

[Turn over]

**6 (d)**

**That week, the mean number of houses whose windows Quin actually cleaned per day was 12**

**How does this compare with the expected number given in PART (c)?  
[2 marks]**

---

---

---

---

---

---

**6 (e)**

**Give a possible reason for the difference between the theoretical and actual results. [1 mark]**
