H

Higher Tier Paper 1

8382/1H

Thursday 13 June 2019 Afternoon

Time allowed: 1 hour 45 minutes

At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.

[Turn over]

For this paper you must have:

- **a calculator**
- **mathematical instruments.**

INSTRUCTIONS

- **Use black ink or black ball-point pen. Draw diagrams in pencil.**
- **Answer ALL questions.**
- **You must answer the questions in the spaces provided. Do not write on blank pages.**
- **Do all rough work in this book. Cross out any work you do not want to be marked.**

INFORMATION

- **The marks for the questions are shown in brackets.**
- **The maximum mark for this paper is 80.**
- **You may ask for more answer paper and graph paper. These must be tagged securely to this answer booklet.**

DO NOT TURN OVER UNTIL TOLD TO DO SO

Answer ALL questions in the spaces provided.

1

Amol wants to take a SYSTEMATIC sample of size 50 from the 1000 students in his school.

He numbers all the students from 0001 to 1000

He chooses the student numbered 0014 as his random starting point.

Circle the number corresponding to the next student who will be in his sample.

A college has a rule that no student should work more than 6 hours per week in a part-time job.

The college principal wants to find out how many students work for more than this.

He decides to carry out a census of all 3600 students in the college.

All students were asked to complete a questionnaire in one of their classes.

One of the questions on the questionnaire was

Do you usually work for more than 6 hours per week in a part-time job?

Only 75% of the students answered the question.

Of these students, 216 said that they did usually work for more than 6 hours per week in a part-time job.

5 (a)

What percentage of the students answering the question usually worked for more than 6 hours per week in a part-time job? [2 marks]

Answer _____ **%**

[Turn over]

BLANK PAGE

5 (b)

Give TWO reasons why the percentage of students in the college who usually work more than 6 hours per week in a part-time job is likely to be greater than your answer to PART (a). [2 marks]

Reason 1 _____

Reason 2 _____

[Turn over]

A bird charity places nest boxes in three woodlands, Staple Woods, East Valley Woods and Stourness Woods.

The pictogram shows the number of nest boxes it places in each woodland.

Staple Woods	
East Valley Woods	
Stourness Woods	

KEY:  represents _____ nest boxes

6 (a)

The charity places 24 more nest boxes in East Valley Woods than it places in Stourness Woods.

Show that  represents

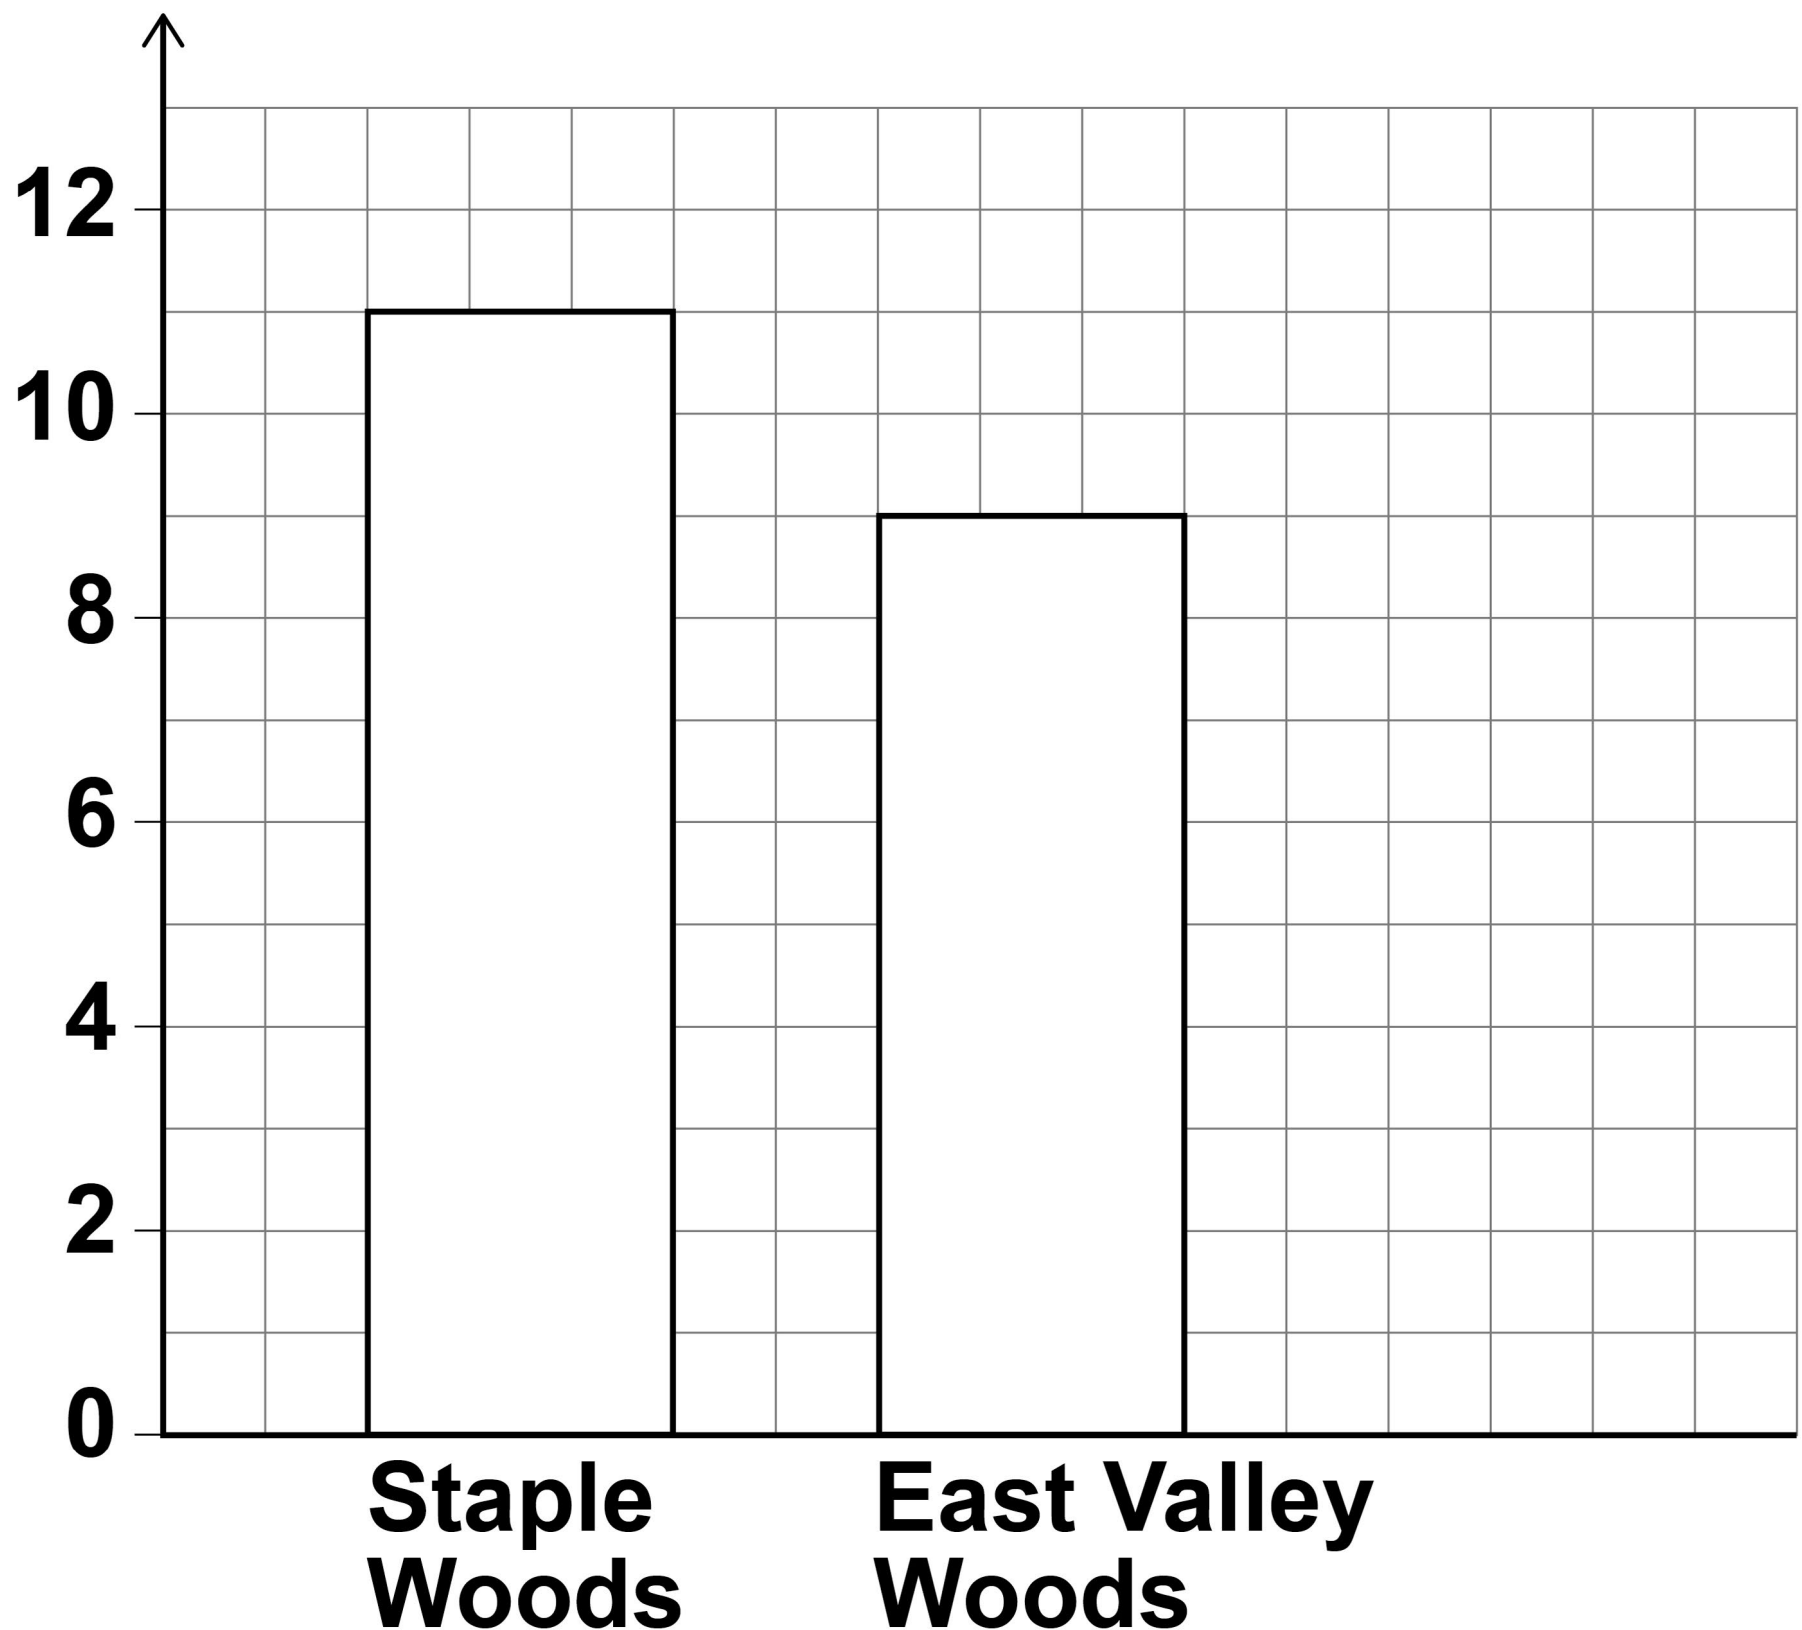

15 nest boxes. [2 marks]

[Turn over]

At the end of the year, the charity checks the nest boxes to see if they have been occupied by birds.

The bar chart shows the number of occupied nest boxes in two of the woodlands.

Number
occupied

6 (b)

Mandy claims that a greater proportion of the nest boxes in Staple Woods were occupied than the boxes in East Valley Woods.

Is she correct?

Tick (✓) one box.

Yes

No

You MUST show your working. [3 marks]

[Turn over]

REPEAT OF GRAPH

**Number
occupied**

6 (c)

The charity finds that exactly 10% of all the nest boxes have been occupied.

Complete the bar chart, repeated on the opposite page, to show the number of occupied nest boxes in Stourness Woods, shown in the pictogram on page 14. [3 marks]

11

The table shows some index numbers relating to the coal industry in the UK between 1910 and 1970 (base year = 1910).

Year	Index numbers	
	Amount of coal produced	Number of mining jobs
1910	100	100
1930	92.0	
1950	83.3	65.9
1970	54.9	27.4

Source: adapted from National Coal Mining Museum for England

11(a)

The number of mining jobs decreased from 1 049 000 in 1910 to 914 000 in 1930.

Complete the table. [2 marks]

[Turn over]

11 (b)(i)

**Work out the percentage decrease in the
AMOUNT OF COAL PRODUCED in the
UK between 1910 and 1970. [1 mark]**

Answer _____ **%**

11 (b)(ii)

**Compare the percentage decrease in the amount of coal produced between 1910 and 1970 with the percentage decrease in the number of mining jobs.
[1 mark]**

[Turn over]

BLANK PAGE

11 (c)

The UK produced 220 million tons of coal in 1950.

Calculate the amount of coal produced in the UK in 1910. [2 marks]

Answer _____ million tons

6

[Turn over]

12

The table shows the birth rate in different parts of the UK in 2006.

The population of each part is also shown.

Part of UK	Population	Crude birth rate	Number of births
England and Wales	53 725 800	12.46	
Scotland	5 116 900	10.88	
Northern Ireland	1 741 600	13.36	
TOTAL FOR UK			

Sources: Office for National Statistics, National Records for Scotland, NISRA

The population of the UK in 2016 was 65 648 000

The total number of births in the UK in 2016 was 774 835

Compare how the crude birth rate in the UK AS A WHOLE in 2016 differs from that in 2006.

You MUST show your working.

Complete the table to help you.

Use

crude birth rate =

$$\frac{\text{number of births}}{\text{total population}} \times 1000$$

15

An air museum has aircraft that were used by the UK in the two World Wars.

15 (a)

The table shows the maximum speed (mph) of the museum's aircraft from **WORLD WAR 2**

MAXIMUM SPEED, x (mph)	Number of aircraft	
$100 \leq x < 200$	6	
$200 \leq x < 240$	9	
$240 \leq x < 280$	10	
$280 \leq x < 320$	6	
$320 \leq x < 400$	6	
$400 \leq x < 500$	3	

Complete the histogram, on the opposite page to show the information. [2 marks]

UK aircraft in World War 2

Frequency
density

[Turn over]

15(b)

This histogram shows the maximum speed of the museum's 72 aircraft from **WORLD WAR 1**

UK aircraft in World War 1

Frequency density

Estimate the number of these aircraft that had a maximum speed of between 90 mph and 115 mph. [3 marks]

Answer _____

[Turn over]

15 (c)

Ewan says that the fastest of the museum's aircraft from World War 1 is slower than all of the museum's aircraft from World War 2

Is Ewan correct?

Tick (✓) one box.

Yes

No

Cannot tell

Give a reason for your answer. [2 marks]

Reason _____

[Turn over]

7

16

The tibia is the bone that connects the knee to the ankle bone.

The lengths of tibia bones in MODERN-DAY adult males have a normal distribution with mean 36.0 cm and standard deviation 2.8 cm.

16 (a)

ALMOST ALL adult male tibia bones have lengths that are between a cm and b cm.

Calculate the values of a and b [3 marks]

$a =$ _____

$b =$ _____

[Turn over]

16 (b)

The lengths of tibia bones in MODERN-DAY adult FEMALES have a normal distribution with mean 33.8 cm and standard deviation 2.2 cm.

16 (b) (i)

A tibia bone is discovered measuring 34.5 cm.

Alice says the bone is more likely to be from an adult female than an adult male.

Evaluate Alice's statement.

Use standardised score =

$$\frac{\text{value} - \text{mean}}{\text{standard deviation}}$$

[3 marks]

[Turn over]

BLANK PAGE

16 (b) (ii)

In fact, the bone in PART (b)(i) was discovered on an old Roman site and is estimated as being about 1900 years old.

Is the conclusion made in PART (b)(i) likely to be valid?

Explain your answer. [1 mark]

[Turn over]

16 (c)

A number of samples of tibia length for modern-day adult FEMALES were collected.

A histogram is drawn to represent the MEAN VALUES of these samples.

Which normal distribution curve should the histogram most look like?

A

28 30 32 34 36 38 40
Mean length (cm)

mean = 33.8 cm s.d. = 2.2 cm

B

32 33 34 35 36
Mean length (cm)

mean = 33.8 cm s.d. < 2.2 cm

C

10 20 30 40 50
Mean length (cm)

mean = 33.8 cm s.d. > 2.2 cm

Circle your answer. [1 mark]
