CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2012 series

0452 ACCOUNTING

0452/22

Paper 2, maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

3 (a) The liability of the ordinary shareholders for the debts of the company is limited to the amount they agree to pay the company for their shares. [2]

(b) Ordinary shareholders are members (owners) of the company: debenture holders are

Ordinary shares carry voting rights: debentures do not carry voting rights.

Ordinary shareholders receive a dividend; debenture holders receive interest.

Ordinary shareholders receive a variable return on their shares: debentures holders received a fixed interest rate.

Ordinary share dividend is a share of profit and may not be paid if there is no profit:

debenture interest is an expense and is payable irrespective of profits

In the event of a winding-up, debentures are repaid before ordinary shares.

Debentures have to be repaid but ordinary shares do not

[3] COM

(h) Inventory is not included in the calculation of the quick ratio (1)

Either

Inventory is not regarded as a liquid asset – a buyer has to be found and then the money collected. (1)

Or

The quick ratio shows whether the business would have any surplus liquid funds if all the current liabilities were paid immediately from the liquid assets. (1)

[2]

(i) Introduce additional capital Reduce drawings Sell surplus non-current assets Obtain long-term loan

Any 1 point (2) [2]
