Level 3 Certificate/Extended Certificate APPLIED BUSINESS

Unit 1 Financial planning and analysis

Wednesday 17 January 2018 Afternoon Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

• scientific calculator (non-programmable).

Instructions

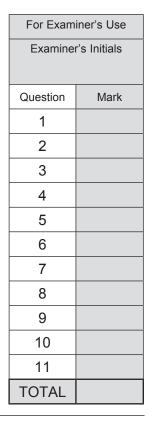

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 60. There are 40 marks for **Section A** and 20 marks for **Section B**.
- There are two sections to this paper.
- Both sections should be attempted.
- Candidates should spend approximately 60 minutes on **Section A** and 30 minutes on **Section B**.

Advice

Please read each question carefully before starting.

| | Section A | |
|-------------------------------|---|------------------------|
| | Answer all questions in this section. | |
| | Total for th | is section: 40 marks |
| In the multip | ble choice questions, only one answer per question is allowed. | |
| For each qu | estion completely fill in the circle alongside the appropriate answ | ver. |
| CORRECT MI | THOD WRONG METHODS 🕲 🗐 | |
| lf you want | to change your answer you must cross out your original answer a | as shown. |
| If you wish t select as sh | to return to an answer previously crossed out, ring the answer yo own. | ou now wish to |

Neil owns a business and operates as a sole trader. He wants to expand the business and has invited his brother, Martyn, to join him as an owner. Even using all their savings, they do not have sufficient funds to finance the expansion.

Neil and Martyn want to keep the ownership and control of the business within their families.

Use the information above to analyse the advantages **and** disadvantages of **one** appropriate legal structure that Neil and Martyn could use to operate their business.

Dave wants to start a kitchen fitting business. He has £10 000 to invest. He has conducted market research and has estimated costs. In addition, he has decided that he needs to pay himself £1200 per month to pay his living expenses.

Dave has forecast that his profit for the first year should be £15 000.

As it is a new business, Dave thinks it is likely that he will have to pay for supplies at the time of purchase.

Customers will pay a 10% deposit before the kitchen fitting starts and the remainder one month after the work is completed.

Dave has been advised that he should also produce a cash budget before starting the business. His cash budget for the first four months of trading is shown below.

| | February | March | April | Мау |
|-----------------------|----------|---------|---------|---------|
| | £ | £ | £ | £ |
| Cash in | 900 | 8 100 | 10 500 | 12 100 |
| Cash out | 15 950 | 7 450 | 7 950 | 9 450 |
| Net monthly cash flow | (15 050) | 650 | 2 550 | 2 650 |
| Opening balance | 10 000 | (5 050) | (4 400) | (1 850) |
| Closing balance | (5 050) | (4 400) | (1 850) | 800 |

Use the information above to analyse why Dave should produce **both** a profit calculation **and** a cash budget.

lan opened a convenience store business in July 2017. Before opening the store he prepared a budgeted income statement. At the end of the six month period he compared the budget with the actual results for the period.

Income statement for six months ended 31 December 2017 (extracts).

| | Budgeted | Actual |
|------------------|----------|---------|
| | £ | £ |
| Revenue | 210 000 | 190 000 |
| Cost of sales | 100 000 | 105 000 |
| | | |
| Expenses | 80 000 | 69 000 |
| Operating profit | 30 000 | 16 000 |

lan is concerned that he has an adverse operating profit variance for the first six months trading of his business.

Use the information above to analyse how lan's interpretation of variances might help to improve future profits.
