H
Higher Tier Paper 1 8462/1H

Thursday 16 May 2019 Morning

Time allowed: 1 hour 45 minutes

At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.
[Turn over]

## 2

For this paper you must have:

- a ruler
- a scientific calculator - the periodic table (enclosed).

## INSTRUCTIONS

- Use black ink or black ball-point pen.
- Answer ALL questions in the spaces provided. Do not write on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

## INFORMATION

- The maximum mark for this paper is 100.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

## DO NOT TURN OVER UNTIL TOLD TO <br> DO SO

Answer ALL questions in the spaces provided.
This question is about the periodic table.
In the 19th century, some scientists tried to classify the
elements by arranging them in order of their atomic
weights.
FIGURE 1 shows the periodic table Mendeleev produced in
1869.
His periodic table was more widely accepted than previous
versions.

| Tube B and contents at end | 123.38 |

When an oxide of copper is heated in a stream of hydrogen, the word equation for the reaction is:
copper oxide + hydrogen $\longrightarrow$ copper + water

## 67

## 018.3

Determine the mass of copper and the mass of water produced in this experiment.

Use TABLE 5, on page 66. [2 marks]

$\qquad$
$\qquad$
$\qquad$
$\qquad$

Mass of copper =
Mass of water = g
[Turn over]

## 68

\section*{| 0 | 8. |
| :--- | :--- | :--- |}

The teacher repeated the experiment with a different sample of the oxide of copper.

The teacher found that the oxide of copper produced 2.54 g of copper and 0.72 g of water.

Two possible equations for the reaction are:

EQUATION 1:
$\mathrm{Cu}_{2} \mathrm{O}+\mathrm{H}_{2} \rightarrow 2 \mathrm{Cu}+\mathrm{H}_{2} \mathrm{O}$

EQUATION 2:
$\mathrm{CuO}+\mathrm{H}_{2} \rightarrow \mathrm{Cu}+\mathrm{H}_{2} \mathrm{O}$

Determine which is the correct equation for the reaction in the teacher's experiment.

Relative atomic masses $\left(A_{r}\right)$ :
H = 1
$0=16$
$\mathrm{Cu}=63.5$
