COMBINED SCIENCE: TRILOGY
Foundation Tier
Biology Paper 1F 8464/B/1F

Tuesday 15 May 2018 Afternoon
Time allowed: 1 hour 15 minutes
At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.
[Turn over]

For this paper you must have:

- a ruler
- a scientific calculator.

## INSTRUCTIONS

- Use black ink or black ball-point pen.
- Answer ALL questions in the spaces provided.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

## INFORMATION

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

## DO NOT TURN OVER UNTIL TOLD TO DO SO

\section*{| 0 | 1 |
| :--- | :--- | FIGURE 1 shows one type of white blood cell.}

## FIGURE 1

## 011. 1 What is structure A? [1 mark]

Tick ONE box.

## Cell membrane

## Cell wall

Cytoplasm

Nucleus

## 5

01 . 2 White blood cells help to defend the body against pathogens.

How do the white blood cells do this? [3 marks]

Tick THREE boxes.

Clone pathogens

Engulf pathogens

Produce antibiotics

Produce antibodies

Produce antitoxins
Produce toxins
[Turn over]

## 6

Measles is a serious disease. A person can die from measles.

FIGURE 2, on the opposite page, shows the number of cases of measles in England and Wales between 2012 and 2015

| 0 | 1 | 3 |
| :--- | :--- | :--- | calculate the decrease in the number of cases of measles

between 2012 and 2015 [2 marks]

## Answer =

cases

FIGURE 2
Number
of cases
of measles

[Turn over]
0.1.4 Suggest ONE reason for the decrease in the number of cases of measles between 2012 and 2015 [1 mark]

01 . 5 Antibiotics CANNOT be used to treat measles.

Suggest why. [1 mark]
$\qquad$
$\qquad$

## 9

01 . 6 Gonorrhoea is a disease caused by a bacterium.

Gonorrhoea CAN be treated with antibiotics.

Give ONE other way to control the spread of gonorrhoea. [1 mark]

## [Turn over]

A scientist investigated how effective different antibiotics were at killing gonorrhoea bacteria.

This is the method used.

1. Grow gonorrhoea bacteria on agar in a Petri dish.
2. Place one paper disc soaked in water onto the agar.
3. Place four other paper discs, each soaked in a different antibiotic, $A, B, C$, and $D$, onto the agar.
4. Use the same sized paper discs and the same concentration of each antibiotic.
5. Incubate the Petri dish for 3 days.

FIGURE 3, on page 11, shows the scientist's results.

A clear area around the disc means the antibiotic has killed the bacteria.

## 11

## FIGURE 3

## 01. 7 Give ONE control variable the scientist used. [1 mark]

[Turn over]

## 12

### 0.1. 8 Suggest why ONE disc was soaked in water. [1 mark]

## 13

01 . 9 Which antibiotic in FIGURE 3, on page 11, would be the best to treat gonorrhoea?

Give a reason for your answer. [2 marks]

Antibiotic

## Reason

[Turn over]

## 14

## BLANK PAGE

# <div class="inline-tabular"><table id="tabular" data-type="subtable">

| :--- | :--- |</table-markdown></div> This question is about photosynthesis. 

## 0.2 .1 What are the TWO products of photosynthesis? [2 marks]

Tick TWO boxes.

## Carbon dioxide

Chlorophyll

Glucose

Oxygen

[Turn over]

A student investigated the effect of light intensity on the rate of photosynthesis.

FIGURE 4 shows the apparatus.

FIGURE 4

## 17

## This is the method used.

1. Place the pondweed at 5 cm from the light source.
2. Measure the rate of photosynthesis by counting the number of bubbles produced in 30 seconds.
3. Repeat the investigation with the pondweed at different distances from the light source.
[Turn over]
0.2 .2 How could the student measure the rate of photosynthesis more accurately? [2 marks]

Tick TWO boxes.

## $\square$ Count the number of bubbles produced in 1 minute

Measure the change in mass of the pondweed in 30 seconds

Measure the volume of gas produced in 30 seconds

Place the pondweed further from the light source

Use water instead of sodium hydrogencarbonate solution

# 0.2 . 3 The LED light source does NOT get hot. 

## Why is this important? [1 mark]

## [Turn over]

## 20

TABLE 1 shows the student's results.

TABLE 1

| Distance of light <br> source from <br> pondweed in cm | Number of <br> bubbles produced <br> in 30 seconds |
| :--- | :--- |
| 5 | 40 |
| 10 | 13 |
| 15 | 5 |
| 20 | 2 |
| 25 | 1 |
| 30 | 0 |

## 21

0.2 .4 Calculate the number of bubbles produced in 2 minutes when the light source was 10 cm from the pondweed. [1 mark]

Number of bubbles produced in 2 minutes =

0 (3) A student investigated the effect of different concentrations of sugar solution on pieces of potato.

This is the method used.

1. Cut three pieces of potato to the same length.
2. Dry each piece on a paper towel.
3. Weigh each piece.
4. Place each piece in a different concentration of sugar solution.
5. Leave all three pieces for 2 hours.
6. Remove the three pieces of potato from the solutions.
7. Dry each piece on a paper towel.
8. Measure the length and mass of each piece of potato.

FIGURE 6 shows how the investigation was set up.

25

<table-markdown style="display: none">| 0 | 5 | Cells divide in a series of stages |
| :--- | :--- | :--- |</table-markdown></div> called the cell cycle. 

Stage 2 of the cycle is mitosis.
FIGURE 10 shows a simplified cell cycle for a human body cell.

## FIGURE 10

# 0 5. 1 Draw ONE line from each stage in the cell cycle to what happens during that stage. [2 marks] 

## Stage in the cell cycle

Stage 1
What happens during that stage

Nucleus divides

## Cell divides into two

## Stage 3

## Stage 2

[Turn over]
0.5 .2 The mass of DNA in a human body cell at the start of the cell cycle is 6 picograms.

What mass of DNA will be in each of the new cells produced by this cell division? [1 mark]

Tick ONE box.

3 picograms

6 picograms

9 picograms

12 picograms

43

| 0 | 5 | .3 |
| :--- | :--- | :--- | cells.

Which statement about stem cells is correct? [1 mark]

Tick ONE box.

Meristem cells in plants can differentiate throughout the life of the plant

Meristem cells in plants can only differentiate into one type of cell
[Turn over]

## 44

Stem cells from human embryos can differentiate into most types of human cell.

Research is being done into the use of embryonic stem cells in medical treatments.

The long-term effects of using embryonic stem cells in patients are not well understood.

In therapeutic cloning, human embryos are produced using a donated human egg cell and a cell from the patient.

- The embryo produced contains the same genetic information as the patient.
- Stem cells are taken from the embryo and stimulated to divide to form cells the patient needs.
- The embryo is then destroyed.

## 45

### 05.4 Suggest TWO advantages of

 therapeutic cloning. [2 marks]1
$\qquad$
$\qquad$
2
$\qquad$
$\qquad$

## [Turn over]
