## GCSE <br> COMBINED SCIENCE: TRILOGY

Foundation Tier
Physics Paper 2F

## 8464/P/2F

Friday 15 June 2018 Morning
Time allowed: 1 hour 15 minutes
For this paper you must have:

- a ruler
- a scientific calculator
- the Physics Equations Sheet (enclosed).

At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.
[Turn over]

## BLANK PAGE

## INSTRUCTIONS

- Use black ink or black ball-point pen.
- Answer ALL questions in the spaces provided.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

## INFORMATION

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

| 0 | 7 | A student investigated acceleration using |
| :--- | :--- | :--- | gliders, an air track and light gates.

The air track reduces friction between the glider and the track to zero.

FIGURE 11 shows the apparatus.
FIGURE 11

The glider was released from rest and moved along the track.

The mass holder hit the ground before the card passed through the second light gate.

| 0 | 7 | 1 Which TWO statements describe the effect this |
| :--- | :--- | :--- | would have on the glider? [2 marks]

Tick TWO boxes.

Its acceleration would decrease to zero.

Its acceleration would increase.

The resultant force on it would decrease to zero.

The resultant force on it would increase.
0.7 .2 The mass holder should NOT hit the ground before the card passes through the second light gate.

Suggest ONE way that the student could stop this happening. [1 mark]

The student increased the resultant force acting on the glider by adding more masses to the mass holder.

She calculated the acceleration of the glider for each resultant force.

Each test was done three times.
TABLE 2 shows the results.
