Smoking Cigarettes

Smoking cigarettes is very addictive and young people who start smoking may find it difficult to stop.

Young people start smoking cigarettes for a variety of reasons such as peer pressure, to deal with stress, to control weight or because family members smoke.

There are many health problems caused by smoking cigarettes such as:

- cancer
- heart attack
- stroke
- increase chances of a miscarriage
- fertility problems.

As a result of the dangers of smoking cigarettes the UK government has encouraged smokers to “give up the habit” and provides support for people who want to stop smoking cigarettes.

Some of the strategies introduced have included:

- a smoking ban in all public places
- health warnings and graphic images on cigarette packets
- free nicotine replacement therapies such as patches from a GP or pharmacist.
