**CAMBRIDGE INTERNATIONAL EXAMINATIONS** GCE Advanced Subsidiary Level and GCE Advanced Level

## www.papacambridge.com MARK SCHEME for the October/November 2012 series

## 9713 APPLIED ICT

9713/13

Paper 1 (Written A), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

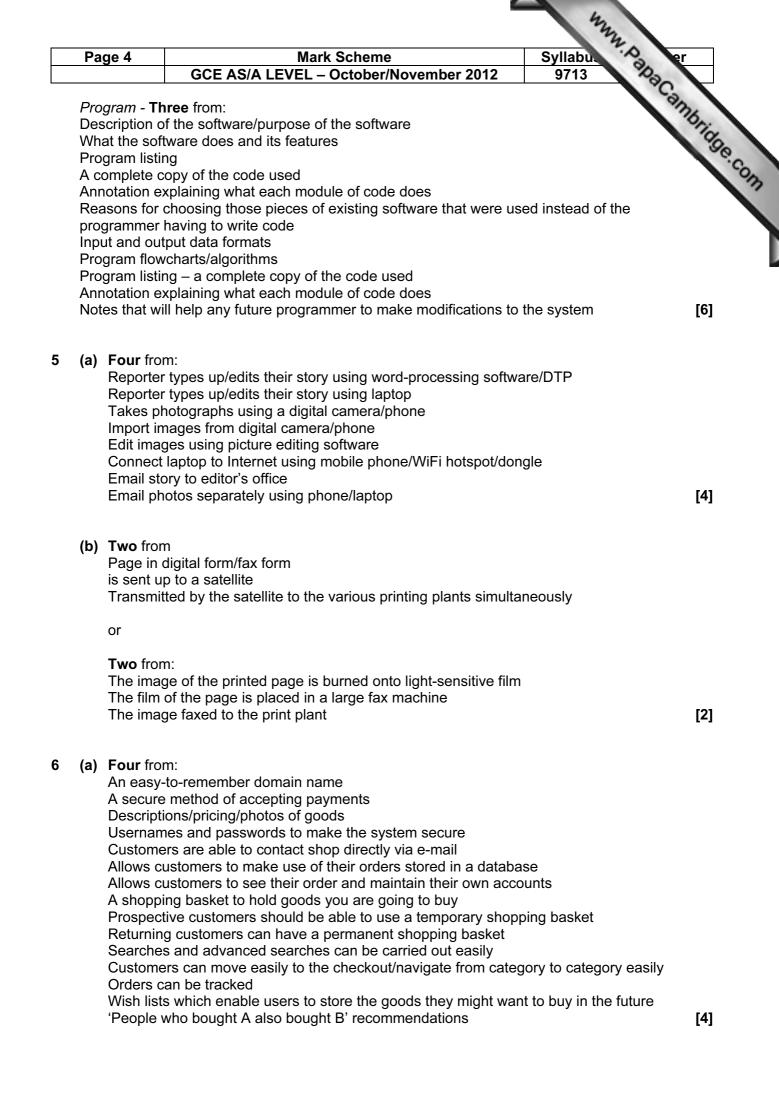

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE. GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

	GCE AS/A LEVEL – October/November 2012	9713 22	
This data	ormal/live data such as a number between 500 and 2 a should be accepted by the system the validation rule needs to be amended to ensure 000		nbrie
This data Amend numeric/	bnormal data such as 2001 or "two thousand" a should be rejected by the system rule to ensure that it uses 500 to 2000/amend /amend rule to make sure < hasn't been used instead	rule to ensure it checks	
This data	a should be accepted by the system amend rule so it is <= and not just < / check it is >= no	ot just >	[3
Service adve <b>Two</b> from:	-		[1
Used in insu	of services rather than goods rance, government, tourism, banking, education rses constitute education		[2

Scores can be plotted in graphs Used to chart progress/results of students can be compared/results of classes can be compared

Grades/percentages can be calculated from raw scores Difference between target grades and actual performance can be calculated/number of students achieving a particular grade can be calculated

Averages can be calculated (for each student) Individual scores can be compared to class/year average

Scores can be searched/sorted

To list best/worst performing students/students achieving a particular mark range/grade so that these students can be set suitable targets

Statistics can be calculated/maximum/minimum mark can be found The highest/lowest mark can be used to identify best/worst performing student

[8]
