CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Advanced Level

MARK SCHEME for the May/June 2013 series

9706 ACCOUNTING

9706/43

Paper 4 (Problem Solving – Supplement), maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Ca	Page 2	Mark Scheme	Syllabus		Pape	r

(c) Notes regarding overdraft v profit

The business has made a profit for the year. However, this has not generated enough cash (1) to cover the following major items of expenditure:

- purchase of new non-current assets (\$200) (1)
- repayment of loan (\$150) (1)
- drawings (\$400) (1)

This has resulted in the bank overdraft for the year (1).

[5]

Page 5	Mark Scheme	Syllabus	Paper
	GCE A LEVEL – May/June 2013	9706	43

(d) Calculation of ratios

Gearing
$$\frac{500(1)}{(500 + 2625)(1)} \times 100 = 16\% \quad (1)$$
Interest cover
$$\frac{(200 + 50)(1)}{(50)(1)} = 5 \text{ times} \quad (1)$$

Dividend yield \$150 000/1 million = \$0.15/share **(1)**

$$\frac{0.15}{(4.0)(1)} \times 100 = 3.75\%$$
 (1)

[9]

(e) Choice of investment

- putting the money into the bank is a safe investment but will not earn as much as investing in the shares of either A or B (1)
- Company B pays a higher return (1), but is more highly geared (1)
- Company A has a lower return, but should be safer (1) if interest rates increase (1)
- If Winston is looking for a safe investment paying a better return than the bank then invest in company B (1)

Note: must be a decision in one type of investment for mark. Allow other choices provided they are supported with reasoning.

3 (a) Sales price variance = AQ (SP - AP) (1)

Materials price variance = AM (SP - AP) (1)

Materials usage variance = SP(SM - AM) (1)

Labour rate variance = AH (SR – AR) (1)

Labour rate variance = AH (SR – AR) (1)

Labour efficiency variance = SR (SH – AH) (1)

[5]

(b) (i)
$$55 + 20\ 000 = $57$$
 (1) for adjustment and (1) for direction $10\ 000$

(ii)
$$40\ 000 + \underline{10\ 000} = 42\ 000\ \text{kilos}$$
 (1) for adjustment and (1) for direction

(iii)
$$5 - 8400 = 400 = 400 = 400 = 400 = 4000 = 4$$

(iv)
$$20\ 000 + \frac{4\ 500}{9} = 20\ 500$$
 hours (1) for adjustment and (1) for direction

(v)
$$9 + 2050$$
 (1) = \$9.10 plus (1) for direction 20 500 (1of) [12]

(c)

- (d) (i) Materials usage (1) A (1)
 - (ii) Materials price (1) A (1)
 - (iii) Sales price (1) A (1)
 - (iv) Labour efficiency (1) F (1)
 - (v) Materials price (1) A (1) OR
 Materials usage (1) F (1)

Credit will be given for other variances where appropriate.
