CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the October/November 2013 series

9184 BIOLOGY

9184/31

Paper 3 (Advanced Practical Skills 1), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

	GCE AS/A LEVEL – October/November 2013	9184	120	Ī

1 (a) (i) at least three further concentrations made according to instructions 0.08 + 0.06 + 0.04 + (0.02);

correct volumes of ascorbic acid $(0.08) \, \underline{16} + (0.06) \, \underline{12} + (0.04) \, \underline{8} + (0.02) \, \underline{4};$

total volumes made up 20;

(ii) organised into table;

heading (column to left of data or top row) percent(age) or % concentration of ascorbic acid/**A** + (any column/row headed) time (/) s or sec(onds);

records results according to instructions i.e. for 0.10 + three further concentrations;

correct pattern of results records shortest time to end-point for highest concentration of A recorded;

records all results to whole numbers of seconds;

econds; [5]

(iii) cause of error + idea of error:

(independent)

range of concentrations + too narrow/not enough;

(dependent)

colour disappearance + not same or difficult to judge or varies or different;

timing + inaccurate as timing started when last piece put in;

(standardised)

size of agar piece/cutting + not same or varies or different;

agitating pieces of agar/ascorbic acid + not same or varies or different;

pieces of agar with stained side down or stick together + ascorbic acid not reaching indicator;

[max 2]

[3]

Page 4	Mark Scheme	Syllabu.	er	1
	GCE AS/A LEVEL – October/November 2013	9184	100	1

(iv) (independent variable)

more or wider or different or larger or at least five different concentrations or gi examples; A if no units R if incorrect units

(dependent variable)

use help or two people to record colour or video; stagger start or do individually to prevent timing error;

(standardised variables)

cut agar block on graph paper or alternative method;

use electric or automatic shaker;

[max 3]

(b) (i) line graph:

label on x-axis percent(age) ascorbic acid conc(entration /) % + label on y-axis vol(ume of) indicator (/) cm³;

scale x-axis 0.2 to 2 cm labelled each 2 cm

+ y-axis 0.5 to 2 cm labelled each 2 cm;

correct plotting of five points as small cross or dot in circle;

ruled line of best fit through at least four plotted points + line less than 1 mm thick; [4]

(ii) shows clearly on graph with line or point on line;

estimate correct with reading at 0.86 cm³ to 2 decimal places with %; [2]
