## **Location Entry Codes**

www.papaCambridge.com As part of CIE's continual commitment to maintaining best practice in assessment, CIE has begun to use different variants of some question papers for our most popular assessments with extremely large and widespread candidature, The question papers are closely related and the relationships between them have been thoroughly established using our assessment expertise. All versions of the paper give assessment of equal standard.

UNIVERSI

International

The content assessed by the examination papers and the type of questions are unchanged.

This change means that for this component there are now two variant Question Papers. Mark Schemes and Principal Examiner's Reports where previously there was only one. For any individual country, it is intended that only one variant is used. This document contains both variants which will give all Centres access to even more past examination material than is usually the case.

The diagram shows the relationship between the Question Papers, Mark Schemes and Principal Examiner's Reports.

### Mark Scheme **Question Paper** Principal Examiner's Report Introduction Introduction Introduction **First variant Question Paper** First variant Mark Scheme First variant Principal Examiner's Report Second variant Question Paper Second variant Mark Scheme Second variant Principal Examiner's Report

# www.papacambridge.com MARK SCHEME for the October/November 2008 question paper

# **9700 BIOLOGY**

9700/02

Paper 2 (Theory 1), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

(b) AVP answers must be in context to a watery external environment ref to molecules held together / strong attraction / AW ;

A cohesion between water molecules

detail of hydrogen bonding, e.g. slight -ve charge on O, slight +ve charge on H; A water molecules are polar

high boiling point / boils at 100°C;

high latent heat of vaporisation ;

so water is liquid over wide range of temperatures ;

(liquid so) provides, support / buoyancy;

high (specific) heat capacity ;

stable temperature / temperature of water does not change quickly ;

large amount of energy needed to be transferred from water for it to freeze / high latent heat of fusion ;

maximum density at 4°C / less dense at 0°C ;

provides surface tension ;

ref solvent ;

AVP;

AVP ;

e.g. ref to surface dwellers, less need for support tissue,

stable habitat qualified, ref upwelling currents

ice floats / insulates
