UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the May/June 2012 question paper for the guidance of teachers

9700 BIOLOGY

9700/31

Paper 31 (Advanced Practical Skills 1), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Expected Answers	a.

Expected Answers 1 (a) (i) MD 1 no shading AND AND clear, sharp, unbroken lines for all outer					
1	1 (a) (i)				
PDO layout 1	mp 1	no shading or dashed line inside cell	AND 50 mm or larger across widest point in one cell	AND clear, sharp, unbroken lines for all outer lines of the cells drawn; Do not give mark if Iess than two outer lines i.e. only 1 cell or if any outer line has any ruled lines any line more than 1 mm any feathery or broken / dashed or gap in outer line any 'tail' or overlap drawn over the print of question	
	mp 2	only two whole	cells	AND adjacent walls touching;	
tion 2				Do not give mark if • any ruled lines	
MMO collection	mp 3	cell contents drawn away from cell wall in at least one cell		AND cell wall double line with middle lamella between cells;	
				Do not give mark if additional organelles e.g. mitochondria, etc.	
decision 1	mp 4	only correct label, with label line(s) which • touches but does not cross the cell membrane • has at least one cell membrane drawn; Do not give mark if • any labels are not of cell structure • any label within drawn area			
MMO de					
	(a) (ii)	1		[2]	
2					
MMO decisions		counts plasmolysed or counts cells in different states of plasmolysis;		ifferent states of plasmolysis;	
mp 2			Do not	give mark for qualitative description only of states of plasmolysis or assigning numbers to each state	

		my

	GCE AS/A LEVEL – May/June 2012	9700

(b)	(b) (i) Ignore all references to conclusions i.e. concentrations mp 1 table with all cells drawn AND heading				
rding 2	mp 1	table with all cells drawn	AND heading • solution or sample;		
PDO recording	mp 2	(any correct heading – column or row) number / count(ed)	AND plasmolysed;		
ection 2	mp 3	records for S1, S2 and S3 in this order more than one cell	quantitative data • number of plasmolysed cells;		
MMO collection 2	mp 4	records correct pattern in context of cells not pieces / tissues ; S1 compared to both S2 and S3 most plasmolysis number of cells counted			
MMO decision 1	mp 5	recorded quantitative data for at least three cells, for each concentration;			
(b)	(ii)		[1]		
ACE interpretation 1		S2 (0) <u>.25</u>	AND S3 (0) <u>.5</u> (0);		

		May .

(c)	(i)		Title	
MMO collection 1	mp 1	draws <u>only</u> two cells	AND adjacent walls touching; Do not give mark if any ruled lines	
PDO recording 1	mp 2	draws cell contents filling more of	cell than in (a)(i) ;	
MMO decision 1	mp 3	label cell wall (drawn with two lines all round) with label line to outermost line or between two lines;		
(c)	(ii)		[2]	
2 2	mp 1	For any correct reference in context of water moving osmosis;		
ACE conclusions 2	mp 2	$\frac{\text{(in correct context of cells being in water potential / } \psi \text{ outside higher or } \psi \text{ and lower or or or or down water potential } \psi \text{ inside lower or or down water potential gradient;}$	or less negative	
(d)	I	1	[max 3]	
IAX 3	mp 1 mp 2	(independent variable) at least two examples (less than 1.0 and not 0.5 or 0.25) ;;		
ACE improvements MAX 3	mp 1 only	(without examples) increase or more or different or range of concentrations or solutions;		
	mp 3	draw graph of molarity		
CEir		or		
⋖		ref. to idea of calculate water poter	ntial;
