

1. Nov/2022/Paper_31/No.1

Explain how each of the following is used in a network.

(a) web server

.....

.....

.....

.....

..... [2]

(b) mail server

.....

.....

.....

.....

..... [2]

(c) print server

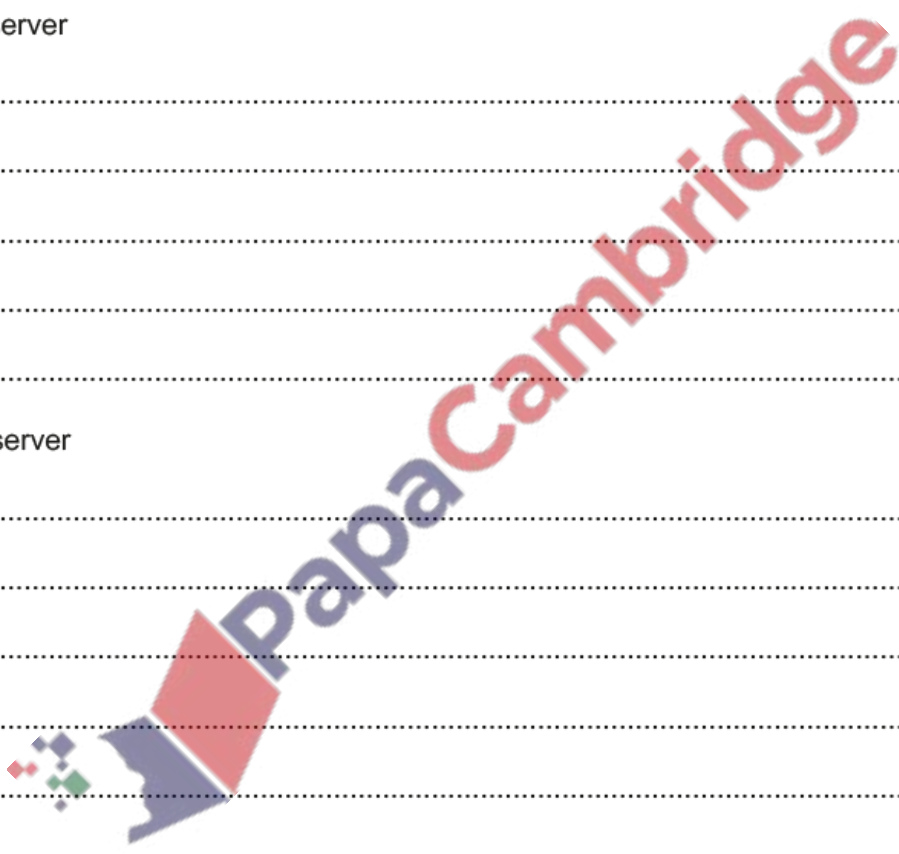

.....

.....

.....

.....

..... [2]

Bit rate is a measure of how fast data can be sent from one device to another on a network.

(a) Describe how the bit rate of a video stream is measured on a network.

.....

.....

.....

.....

..... [2]

(b) Identify **two** factors that can affect the bit rate in data communication.

1

.....

.....

2

.....

..... [2]

Data can be sent over computer networks and the internet using tunneling.

(a) Give **two** reasons why tunneling is used for sending data.

1

.....

.....

2

.....

.....

[2]

(b) Describe how tunneling transfers data over the internet.

.....

.....

.....

.....

.....

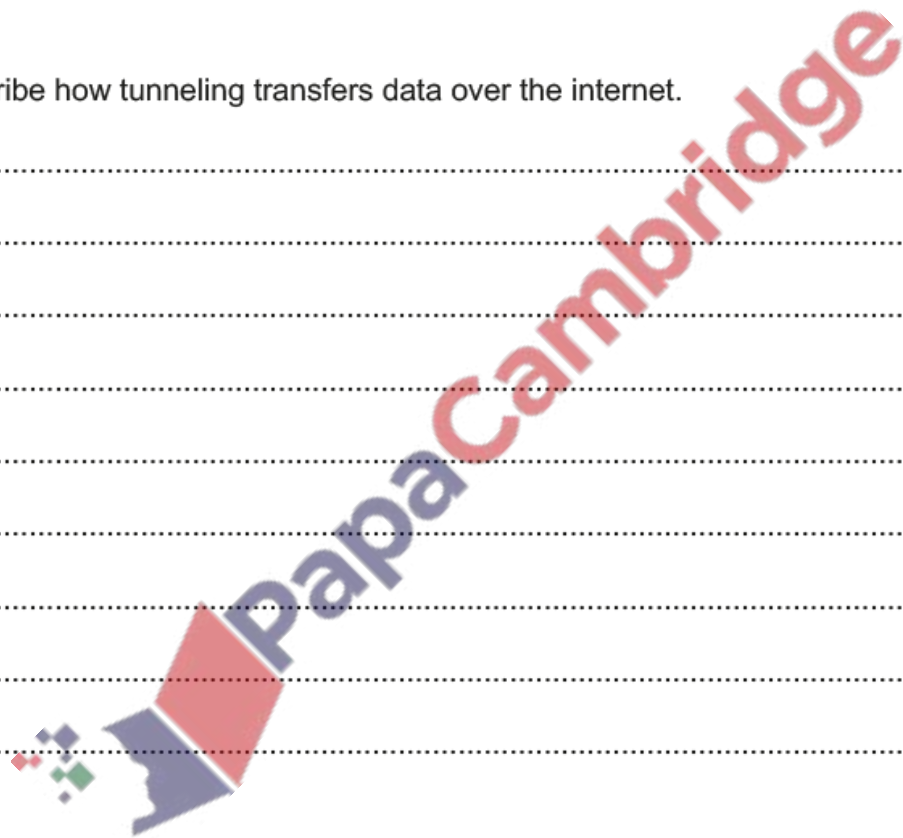

.....

.....

.....

.....

[3]

Mobile devices can use Near Field Communication (NFC) and Bluetooth to exchange data.

(a) Describe **three** uses of NFC in mobile devices.

1

.....

.....

2

.....

.....

3

.....

.....

[3]

(b) Discuss the differences between NFC and Bluetooth when used for exchanging data between mobile devices.

.....

.....

.....

.....

.....

.....

.....

.....

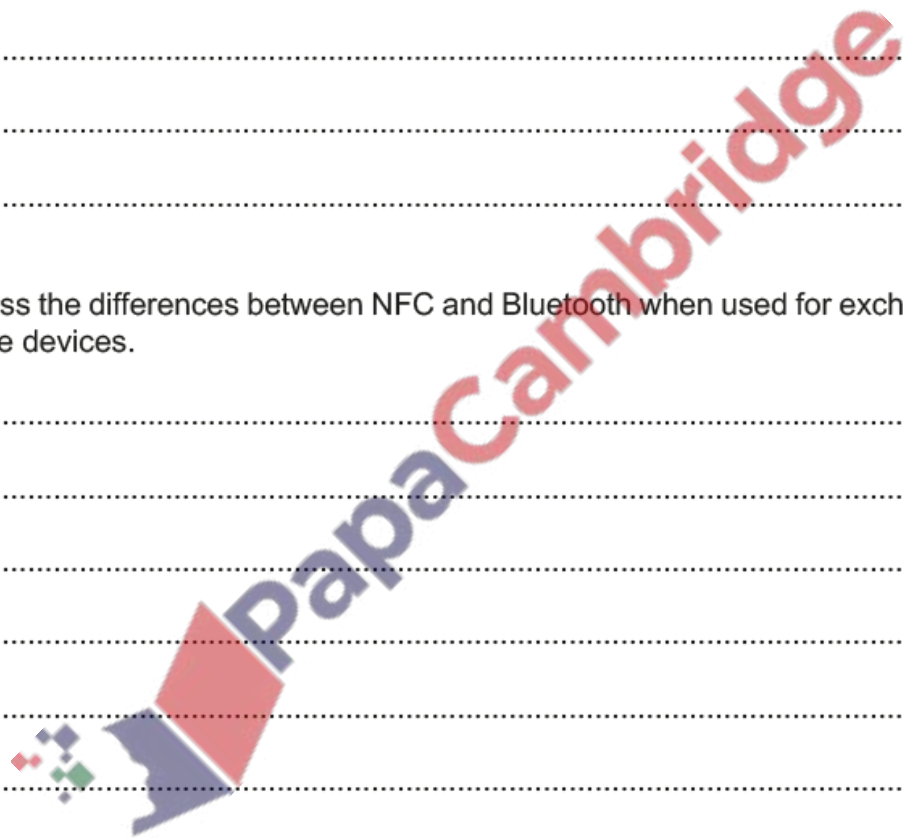

.....

.....

.....

.....

..... [6]

Explain how each of the following is used in a network.

(a) web server

.....

.....

.....

.....

..... [2]

(b) mail server

.....

.....

.....

.....

..... [2]

(c) print server

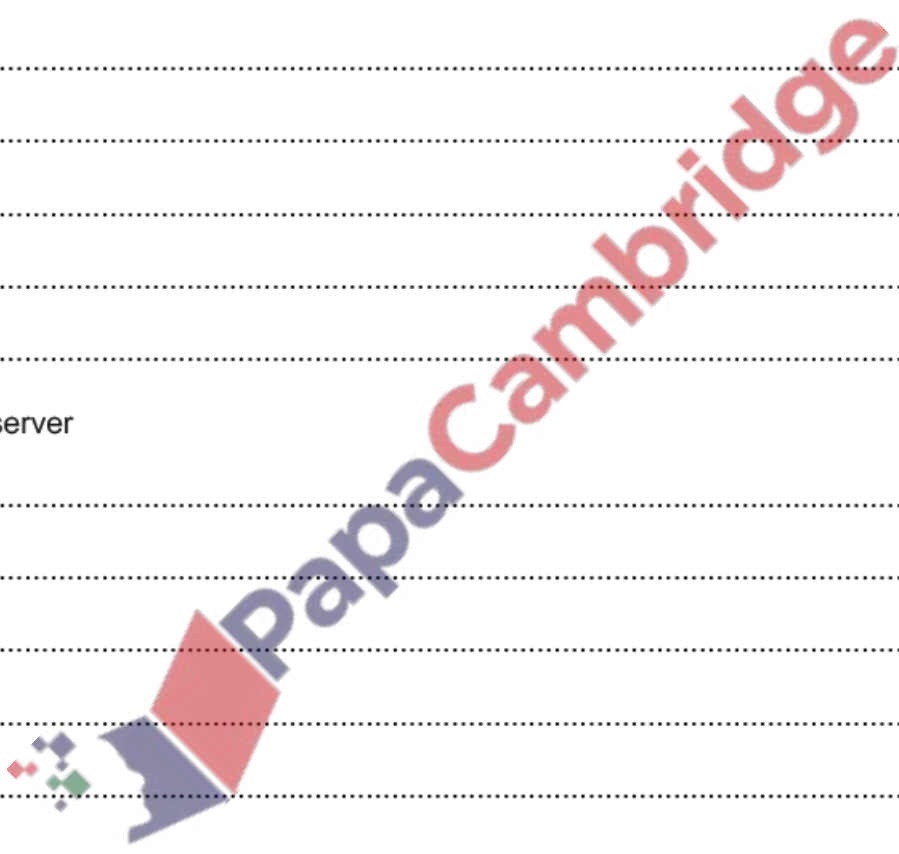

.....

.....

.....

.....

..... [2]

Packet switching is one way of transmitting data between computers in networks. The User Datagram Protocol (UDP) is a protocol used when creating data packets to send to other computers on the network.

(a) Explain how the contents of the header are used when sending a data packet using UDP.

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

[6]

(b) Describe the drawbacks of using UDP to send data over a network.

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

[3]

12. Nov/2022/Paper_33/No.6

Discuss the advantages and disadvantages of the use of microwave transmissions for communications.

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

[8]

Bit rate is a measure of how fast data can be sent from one device to another on a network.

(a) Describe how the bit rate of a video stream is measured on a network.

.....

.....

.....

.....

..... [2]

(b) Identify **two** factors that can affect the bit rate in data communication.

1

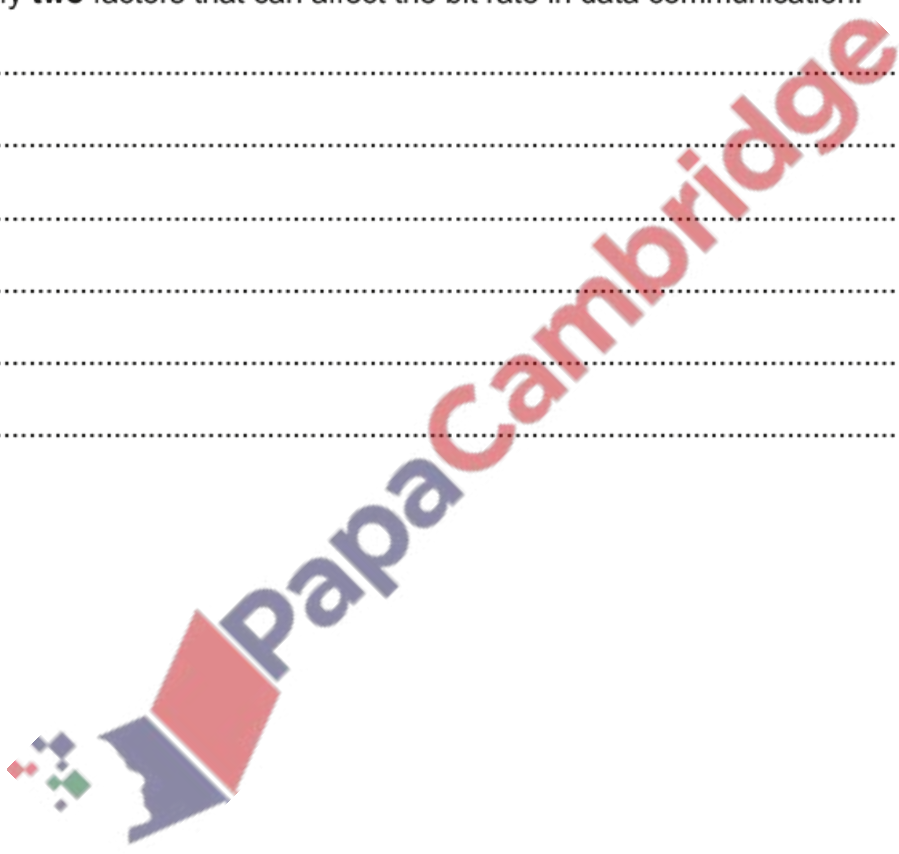

.....

.....

2

.....

..... [2]

Frame Relay is used in networks.

(a) Explain why Frame Relay is used.

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

..... [6]

(b) Explain the drawbacks of using Frame Relay.

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

..... [3]

Microwave transmission is used to send data between devices at different locations.

(a) Explain how microwaves are used to transmit data between devices.

.....

.....

.....

.....

.....

.....

.....

..... [3]

(b) Describe **four** ways that microwave transmission is used in communication systems.

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

..... [4]
