CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the May/June 2013 series

9693 MARINE SCIENCE

9693/04 Paper 4 (A2 Data Handling / Free Response),

maximum raw mark 50

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Page 2	Mark Scheme	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2013	9693	04

Qι	uestion	Answers to be awarded credit	Additional Guidance	Mark
1	(a)	S – Scales and axes labelled (mass / g time);		
		L – Both lines drawn neatly (joining the points) and key for each line;		
		P – Points plotted correctly;		3
	(b) (i)	GM salmon show faster growth overall / eq;		
		Final mass is higher (for GM salmon);		
		Use of manipulated figures (not simply quoting numbers);		
		Up to 250 days no / little difference;		
		Over 250 days the difference is significant;		
		Correct reference to overlapping ranges of standard deviations;		3 max
	(ii)	Transfer of growth gene;		
		Into egg / early embryo;		
		Ref to (gene) promoter;		
		Growth gene switched on permanently; Ref to continuous feeding;		2 max
	(c)	Variable: 2 tank sizes;		
		Repeat and calculate means;		
		Measurement: change in weight / length / (accept measure before and after a stated time);		
		Controls: food quantity /		
		same temperature /		
		oxygen /		
		starting size /		
		age of fish /		
		number of fish in tanks/ eq;;		4 max
				Total: 12]

	GCE AS/A LEVEL – May/June 2013	9693	04

2	(a)	Biodiversity = the number of individuals of different species / eq;	MP 1 – biodiversity definition	
		Biodiversity decreases (at desalination plant); Fewer species;		
		Fewer total number of individuals;	Accept most species have fewer numbers / all but red sea crab are lower/ ignore all species	
		Red sea crab increases;	have less.	
		Manipulated numerical comparison (e.g. 32 more red sea crabs);	No mark for simply quoting data	
		Credit another specific species example;		4 max
	(b)	(Desalination plant) causes high salt concentration / salinity;		
		Releases toxins;		
		Loss of water (from organisms);		
		Correct ref to osmosis;		
		Some organisms are able to osmoregulate / ref to Na ⁺ pumping / eq;		
		Less competition (so red crab increases in number) / niches become available / eq;		4 max
				[Total: 8]

Page 4	Mark Scheme	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2013	9693	04

3	(a)	Re	f to photosynthesis / chemosynthesis;	
			ing carbon / energy / producing organic lecules / eq;	
			r primary consumers/ herbivores / food ain / eq;	
		Sh	elter / habitat;	
		Ox	ygen release;	4 max
	(b)	1	Light intensity;	
		2	Energy source;	
		3	light wavelength / colour;	
		4	depth;	
		5	clarity of water / turbidity / sediment;	
		6	ref to blue and red regions absorbed by chlorophyll / eq;	
		7	CO ₂ ;	
		8	(raw material) for glucose production;	
		9	temperature;	
		10	enzymes;	
		11	magnesium;	
		12	(for) chlorophyll;	
		13	phosphates;	
		14	for ATP;	
		15	salinity;	
		16	osmotic balance;	Max 7

	GCE AS/A LEVEL – May/June 2013	9693	04

(c)	(Hg) is toxic;		
	Low concentration in plankton / lower levels of food chain / eq;	MP2 must be eating the organisms, not the mercury in the water	
	Passed on by eating;		
	Bioaccumulation;		
	High concentration at top of food chain;		
	Harms / kills top predators;		Max 4
]	Total: 15]

Page 6	Mark Scheme	Syllabus	Paper
	GCE AS/A LEVEL – May/June 2013	9693	04

4	(a)	Purse seine:- Catches whole schools / large catch; Non target species / bycatch; Loss of diversity / food chain impact / population fall; Benthic trawl:- Dredge along sea bed / eq; Damage reef / coral / sea bed; Loss of habitat (due to physical destruction) / food chain impact; Factory ships: - Freeze catch; Stay at sea long periods;		
		Depletes fish stocks / over fishing;		6 max
	(b)	Nursery grounds for fish / eq;	(Look for idea of protection for juveniles)	
		(and) crustacean;	·	
		(fish) survive to breeding age;		
		Stabilises habitat / allows sedimentation;		
		Food for decomposers;		
		Food sources for fish / food chains;		
		Protection from storms / waves;		4 max
	(c)	Benefits:-		
		1 Prevent extinction / conserve biodiversity;		
		2 Maintain ecological stability / relationships / eq;		
		3 Keeps fish (prey) population stable;		
		4 (seals) are prey for next trophic level;		
		Counter argument:– 5 Commercial damage;		
		6 Damage to food chains of other species / puffin / common seal / competition / eq;		
		7 Decrease cod / haddock / sand eel stocks;		
		8 Decrease competitor species populations / puffins / common seals / eq		5 max
