Paper 2 Further Pure Mathematics 2

October/November 2024

2 hours

You must answer on the question paper.

You will need: List of formulae (MF19)

INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 75.
- The number of marks for each question or part question is shown in brackets [].

This document has **20** pages. Any blank pages are indicated.

(b) Use a similar method to find, in terms of n , a lower bound L_n for $\int_0^1 e^{1-x} dx$. [4]

Dotted lines for writing the answer to part (b).

(c) Show that $\lim_{n \rightarrow \infty} (U_n - L_n) = 0$. [2]

Dotted lines for writing the answer to part (c).

(d) Use the Maclaurin's series for e^x given in the list of formulae (MF19) to find the first three terms of the series expansion of $z(1 - e^{-\frac{1}{z}})$, in ascending powers of $\frac{1}{z}$, and deduce the value of $\lim_{n \rightarrow \infty} (U_n)$. [3]
