## **PHYSICS**

## GCE Advanced Level and GCE Advanced Subsidiary Level

Grade thresholds taken for Syllabus 9702 (Physics) in the October/November 2007 examination.

|              | maximum<br>mark<br>available | minimum mark required for grade: |    |    |
|--------------|------------------------------|----------------------------------|----|----|
|              |                              | Α                                | В  | E  |
| Component 1  | 40                           | 32                               | 29 | 20 |
| Component 2  | 60                           | 35                               | 31 | 19 |
| Component 31 | 40                           | 29                               | 27 | 21 |
| Component 32 | 40                           | 29                               | 27 | 21 |
| Component 4  | 100                          | 58                               | 47 | 24 |
| Component 5  | 30                           | 21                               | 18 | 11 |

The thresholds (minimum marks) for Grades C and D are normally set by dividing the mark range between the B and the E thresholds into three. For example, if the difference between the B and the E threshold is 24 marks, the C threshold is set 8 marks below the B threshold and the D threshold is set another 8 marks down. If dividing the interval by three results in a fraction of a mark, then the threshold is normally rounded down.

Grade Thresholds are published for all GCE A/AS and IGCSE subjects where a corresponding mark scheme is available.
