#### UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

**GCE Advanced Subsidiary and Advanced Level** 

### MARK SCHEME for the November 2005 question paper

#### 9698 PYCHOLOGY

9698/01 Paper 1 (Core Studies 1) maximum raw mark 100

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

The minimum marks in these components needed for various grades were previously published with these mark schemes, but are now instead included in the Report on the Examination for this session.

CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the November 2005 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

9	In th	e study by Schachter and Singer on emotion:			
	(a)	Outline <u>one</u> method that was used to record the respo participants.	nses o	f the	DACAM
		<ol> <li>standardised observation through a one-way mirror</li> <li>self report on a number of scales.</li> <li>mark identification, 1 mark for description (however brief</li> </ol>		1+1	
	(b)	What advantage did the use of one of these methods give	to the	study?	)
		Observation allows observers to record actual behaviours participants. Self reports allow participants to say what they think about			
		what goes on.  1 mark partial, 2 mark	s full.	2	[4]
		Most likely from a long list including: deception, consent, ri withdraw, etc. Answer must identify issue and give an exa	ight to		
		for 2 marks. Repeated.		2+2	[4]
11	choi	e experiment by Tajfel on intergroup categorisation, the ces: maximum joint profit, maximum in-group profit and rence.			ee
	(a)	Of the three choices, which did the boys make?			
		Three choices: maximum joint profit, maximum difference, maximum in-group profit. Boys chose maximum difference			
		marks for correct answer.		2	
	(b)	What does this choice tell us about the behaviour of the	he boy	s?	
		Most likely: they are ethnocentric and prefer to maximise difference between groups even though they could have h greater reward.	ad a		
		1 mark partial, 2 marks full for	each.	2	[4]
2	In th	e study by Gould on intelligence testing.	<u> </u>		•
	(a)	Name two of the three types of test given to the army i	recruit	S.	
		Army alpha, army beta, spoken interview.  Variations of alpha or beta also acceptable.  1 mark for naming any	y two.	2	
	(b)	Describe one reason why most recruits performed poor	orly on	the te	ests.
		Could not read, could not write, given the wrong test, etc.  1 mark partial, 2 mark	s full.	2	[4]
					<u> </u>

}	Eron	n the study by Hraba and Grant on doll choice:		Q1
,	11011	The study by Thaba and Grant on don choice.		
	(a)	What is meant by the term ethnocentrism?		
		Tendency to under-value out-group (1 mark) and over-value ingroup (2 <sup>nd</sup> mark). Must have 2 parts for 2 marks.	www.Po	
	(b)	Give two ways in which the children were ethnocentric.		
		White children preferred to play with the white doll (Q1); thought that the white doll was a nice doll (Q2). Thought the black doll looked bad (Q3). Black children same as above but for black doll. On Q4 black children believe black is a nice colour (no diff for whites).  1 mark partial, 2 marks full.	2	[4]
4	In th	e study by Rosenhan (sane in insane places):		
	(a)	Who were the pseudopatients?		
		Most likely: people who volunteered to claim they were hearing voices when they were not. Specifics not needed (e.g. 3 psychologists, 1 housewife, etc).  2 marks for correct answer.	2	
	(b)	Who were the participants?		
		Most likely: doctors (psychiatrists), nurses and ward attendants at the various mental hospitals.  2 marks for correct answer.	2	[4]
5	Thig	pen and Cleckley (multiple personality disorder) used a num	ber of t	ests:
	(a)	Identify $\underline{\text{one}}$ psychometric test and $\underline{\text{one}}$ projective test that the study.	were u	sed in
		Most likely psychometric = IQ test. Projective test = Rorschach test. 1 mark for naming each. Allow memory, not EEG.	2	
	(b)	Describe the findings of either the psychometric or the projection	ective t	est.
		Most likely: IQ eve white IQ 110, eve black 104 Projective: Repression in eve white; regression in eve black.  1 mark partial, 2 marks full.	2	[4]

## Partial/full answer

0 marks	no answer <b>or</b> incorrect answer
1 mark	partially correct answer <b>or</b> correct but incomplete lacking sufficient detail or explanation to demonstrate clear understanding
2 marks	correct answer with sufficient detail/explanation to demonstrate clear understanding

(c)	Using your chosen study as an example, what are the strength weaknesses of the physiological approach?	15
	Mark Scheme  GCE AS/A LEVEL – NOVEMBER 2005  Using your chosen study as an example, what are the strength weaknesses of the physiological approach?  Adv – use of recording devices allows precise and accurate measurer Adv – data is objective/'scientific' and so replication and comparison. Adv – human physiology is the same in all cultures. Not influenced by learning or other factor.  Disadv – equipment may be imprecise and give false readings.  Disadv – study will reduce ecological validity – must be done in lab.  Disadv – is reductionist – not always good to isolate specific functions Humans more than physiology.	
	No answer or incorrect answer.	0
	Anecdotal description, brief detail, minimal focus. Very limited range. Description may be inaccurate, incomplete or muddled.	1-3
	Advantages or disadvantages only which are focused on question. For 4 marks as for 6-7 mark band. For 5 marks as for 8-10 mark band.	4-5
	Several advantages and disadvantages which are focused on question. Description is good with reasonable understanding. Some detail and expansion of key features.	6-7
	Balance of advantages and disadvantages which are focused on question. Description is detailed with good understanding and clear expression. The arguments are well considered and reflect understanding which extends beyond the specific study.	8-10
	max mark.	[10]
(d)	Suggest an alternative way of gathering data for your chose study and say what effect, if any, this would have on the results.	n
	No answer or incorrect answer.	0
	Anecdotal suggestion, brief detail, minimal reference to question.  Description may be inaccurate, incomplete or muddled.	1-3
	Some appropriate suggestions which are focused on question.  Description shows some understanding. Some detail and expansion of aspects allowing generalisation.	4-6
	Range of appropriate suggestions which are focused on question.  Description is detailed with good understanding and clear expression. The changes are well considered and reflect understanding of the area in question.	7-10
	max mark.	[10]

(c)	Using your chosen study as an example, what are the advantages disadvantages of carrying out studies in everyday environments	s al
	Mark Scheme GCE AS/A LEVEL – NOVEMBER 2005 9698  Using your chosen study as an example, what are the advantages disadvantages of carrying out studies in everyday environments.  Adv – participants familiar with surroundings and comfortable more livelax.  Adv – behaviour is more likely to be natural.  Adv – external influences will be as usual e.g. noises. Ecological high.  Disadv – more difficult to control all variables.	
	Disavd – lower reliability – if repeated may get different results.  Disadv – may be difficult to isolate behaviour and remove usual noise distractions.	es and
