UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2010 question paper for the guidance of teachers

0452 ACCOUNTING

0452/23

Paper 2, maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

(i) The business may not have enough liquid funds with which to pay the creditors until money is received from the debtors.

If the debtors pay within the set time the business may be able to pay its creditors within the set time without any significant impact on the bank balance.

If the debtors fail to pay within the set time it may be necessary to obtain short-term funds in order to pay the creditors.

	IGCSE – October/November 2010	0452	

5 (a) (i) Sales = cost of sales + gross profit = 340 000 + 85 000 = 425 000 (1)

Gross profit as % of sales =
$$\frac{85\,000}{425\,000} \times \frac{100}{1}$$
 (1) = 20.00% (1)O/F

(ii) Profit for the year (net profit) = gross profit – expenses = $85\ 000 - 49\ 000 = 36\ 000$ (1)

Profit for the year (net profit) as % of sales =

$$\frac{36\,000}{425\,000}$$
 × $\frac{100}{1}$ (1) = 8.47% (1) O/F

[3]

[3]

[2]

[3]

[3]

(iii) Return on capital employed (ROCE)

36 000 (O/F) x 100 (1) = 10.91% (1)O/F

(b) (i) Percentage of gross profit to sales

This measures the success in selling goods

The ratio shows the gross profit earned per \$100 of sales

The ratio can be compared with previous years

The ratio can be compared against other businesses

Mark Ukata has spent 80% (O/F) of the sales income on the cost of goods

Or other relevant explanation

(ii) Percentage of profit for the year (net profit) to sales

This measures the overall success of the business

The ratio shows the net profit earned per \$100 of sales

The ratio can be compared with previous years

The ratio can be compared against other businesses

The ratio indicates how well the business controls its expenses

Mark Ukata has spent 11.53% (O/F) of the sales income on expenses

Or other relevant explanation

(iii) Return on capital employed (ROCE)

The ratio shows the profit earned per \$100 employed in the business

The ratio can be compared with previous years

The ratio can be compared against other businesses

The ratio measures the profitability of the investment in the business

The ratio shows how efficiently the capital is being employed

Or other relevant explanation

	IGCSE – October/November 2010	0452	20

(c) Cost is the actual purchase price plus any additional costs incurred in bringing the (stock) to its present condition and position. (1)

Net realisable value is the estimated receipts from the sale of the inventory (stock), less a costs of completing or selling the goods. (1)

(d) Inventory (stock) should always be valued at the lowest of cost and net realisable value. (1) This is an application of the principle of prudence. (1)

Over-valuing inventory (stock) causes both the profit for the year and the current assets to be incorrect. (1)

Or other relevant explanation

Any 2 points (1) each

[2]

(e)

	Overstated	Understated
Cost of sales	√ (1)	
Gross profit		√ (1)
Profit for the year (Net profit)		√ (1)

[3]

(f) Reduce (inventory) stock levels
Generate more sales activity
Only replace inventory (stock) when needed

Or other suitable point
