Monica has a shop. She writes up the books of account herself but is not an exper-6 bookkeeper. Her financial year ends on 28 February.

www.papaCambridge.com The trial balance she prepared on 28 February 2011 showed a shortage on the debit side of \$720. Monica entered this in a suspense account and then prepared a draft income statement showing a profit for the year of \$3600.

The following errors were later discovered.

- 1 A cheque payment of \$460 to repay a loan from Carlo has been correctly entered in the cash book but \$640 has been debited to his loan account.
- 2 Cash sales of \$850 have been completely omitted from the books.
- 3 A cheque payment for \$900 for goods has been entered in the cash book but no other entry has been made.
- 4 The purchase of new display shelves for \$1200 has been debited to the repairs account.

REQUIRED

(a) Show the journal entries required to correct the above errors. The date and narrative are **not** required.
