UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

MARK SCHEME for the October/November 2005 question paper

0610 BIOLOGY

0610/02

Paper 2 (Core Theory), maximum mark 80

www.PapaCambridge.com

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

• CIE will not enter into discussion or correspondence in connection with these mark schemes.

The minimum marks in these components needed for various grades were previously published with these mark schemes, but are now instead included in the Report on the Examination for this session.

CIE is publishing the mark schemes for the October/November 2005 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

		mollusc	:	

description of animal	group
	crustacean;
	mollusc;
	bird;
	mammal;
	insect;

[5]

[2]

Total [5]

2 (a) temperature / hot / cold;

touch / texture;

pressure; Any two - 1 mark each

(b)	(i)	X labelling retina;	[1]
		(ii)	Z labelling the iris;	[1]
(c)	sense	ory neurone in correct box;	
		relay	neurone in correct box;	
		moto	r neurone in correct box;	[3]
		If all i	neurones correctly named but errors in placement – allow 1 mark	
(d)	rays	of light bent / refracted by cornea;	

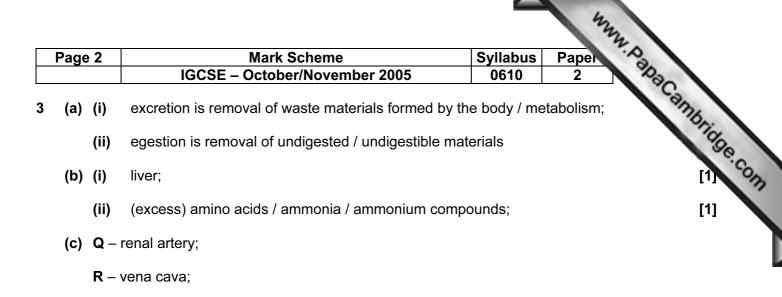

ciliary body / muscle contracts;

and releases / lessens pull on suspensory ligaments;

lens becomes more curved / convex;

bends rays of light more (to bring about focus);

Any four – 1 mark each

- S ureter;
- T urethra;

(d)

component of bloodpresent in urineglucosexred blood cellsxsalts✓urea✓water✓white blood cells✓

salts and water correctly indicated;

glucose and red blood cells correctly indicated;

		IGCSE – October/Nover	nber 2005	0610	2	No.
4 (a)						Sambridge.com
	tube	contents and conditions	is photosynthesis happening		espiration ppening	.93e
	Α	pond weed in dark	no		yes;	COM
	В	pond weed in bright	yes		yes;	

4 (a)

tube	contents and conditions	is photosynthesis happening	is respiration happening
A	pond weed in dark	no	yes;
В	pond weed in bright light	yes	yes;
С	freshwater shrimp in dark	no	yes;
D	fresh water shrimp in bright light	no	yes;

One mark for each correct row

(b) (i)

tube	contents and conditions	colour of hydrogencarbonate indicator after several hours
Α	pond weed in dark	yellow / golden
В	pond weed in bright light	purple
С	freshwater shrimp in dark	yellow / golden
D	fresh water shrimp in bright light	yellow / golden

tubes A, C and D all correct;

tube B correct;

(ii) <u>yellow colour</u> -

tubes A / C / D respiration occurring;

carbon dioxide released / increased / pH falls;

similar for two other / named tubes; purple colour tube B both respiration and photosynthesis occurring;

more photosynthesis than respiration;

carbon dioxide absorbed / reduced and pH rises; Any four – 1 mark each

		IGCSE – October/November 2005	0610 2	- Pac
(a)	(i)	light;		www.papacampr
	(ii)	photosynthesis;		
(b)	over	all a rise in carbon dioxide concentration in atmospl	here;	
	there	e is a yearly rise and fall / varies with the seasons;		[2]
(c)	(i)	more carbon dioxide in air;		
		more heat rays trapped;		
		leads to an increased air temperature;		[3]
	(ii)	utilise more renewable energy sources / named ex	xample;	
		reduce use of fossil fuels;		
		reduce deforestation / increase plant growth;		
		Any two – 1 mark each		[2]
				Total [9]
(a)	(i)	(cross) pollination;		[1]
	(ii)	bee feeds at flower A / flower with mature anther /	stamen;	
		bee picks up pollen (on body / hairs);		
		moves to flower B / flower with mature stigma / ca	rpel;	
		pollen deposited (on stigma);		
		bee transfers pollen – 1 mark max		
		Any three – 1 mark each		[3]
(b)	(i)	fertilization;		[1]
	(ii)	ovary / carpel;		[1]
(c)	simil	lar as are same species / have same genes;		
	gam	etes formed by meiosis;		
	simil	lar but not genetically identical / OWTTE;		
	ref. t	to cross pollination / pollination being random;		
	fertil	ization random / OWTTE;		
	geno	otypes of offspring very likely / will be different;		
	effe	cts of environment can affect plants;		
	any	other valid point;		
	Any	four – 1 mark each		[4]
				Total [10]

		IGCSE – October/November 2005	0610	2	230
(a)	(i)	11.1 dm ³ per minute;			amb.
	(ii)	2 dm ³ per minute;			17
	(iii)	3.4 / 3.3 dm ³ per minute;		Papel 2	[1]
(b)	(i)	left ventricle;			[1]
	(ii)	prevent the backflow of blood;			[1]
					Total [5]
(a)	(i)	increased surface area;			[1]
	(ii)	xylem;			[1]
(b)	mag	nesium – making chlorophyll;			
	nitra	tes – making amino acids / protein;			[2]
(c)	(i)	to replace ions removed by crops;			
		to improve crop yield;			
		Any one – 1 mark			[1]
	(ii)	eutrophication can occur;			
		excessive growth of algae;			
		light to lower layers of water body reduced;			
		submerged / floating water plants die;			
		decomposer bacteria increase rapidly;			
		use up oxygen;			
		anaerobic conditions occur / aquatic animals die;			
		Any five – 1 mark each			[5]
				т	otal [10]
