UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

www.papacambridge.com MARK SCHEME for the October/November 2006 question paper

0610 BIOLOGY

0610/06

Paper 6, maximum raw mark 40

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

The grade thresholds for various grades are published in the report on the examination for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2006 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Question 2

www.PapaCambridge.com (a) drawing: S larger than Fig. 2.1; [A whole crab (complete)/body with leg attached/body detached leg] [wrong leg drawn = no S mark] allow antenna as part of body.

O clear outline and no shading;

L three or four joints/parts to limb X; [must have line to 'end' the leg whether leg is attached or not to body]

labels: eye; [ignore 'simple' if included in label] [if end of eye is shaded in - ignore for O drawing mark]

jointed limb/segmented limb; claw/hook/pointed end/sharp end;

[score as D and L marks 3 + 3 – Accept as a list beside drawing if clear] [if no labels on	
drawing check Fig.2.1]	[6]

- (b) (i) Arthropod (a) [check spelling if no confusion then accept e.g. arthpods] [1]
 - (ii) exoskeleton/jointed limbs/segmented body; [ignore antennae] [treat as a list] [1]
 - (iii) positive features --

Fig. 2.2	Fig. 2.3	Fig.2.4	
wings [ignore	Many(pairs of)	8 legs/4 pairs of	
number]/3 parts to	legs/one or two	legs/simple eyes only/2	
body (head, thorax	pairs of legs per	parts to	
and abdomen in	segment/more	body/cephalothorax/AVP	
correct	than 4 pairs of	eg pedipalps,	
order)/compound	legs/many	chelicerae;	
eyes/3 pairs of	segments;	[ignore antennae]	
legs or 6 legs; [ignore antennae]	[not more than 3 pairs of legs and segmented body] [ignore 'long body' references		
	to eyes and antennae]		[3]

(iv) Fig.2.2 insect or insecta;

Fig.2.3 myriapod/chilopod; [not millipede, myriapede or centipede]

Fig.2.4 arachnid; [not spider]
