UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2010 question paper for the guidance of teachers

0610 BIOLOGY

0610/61

Paper 61 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

· ;	separates points for the award of a mark	

General notes

Α accept - as a correct response

reject - this is marked with a cross and any following correct statements do not gain any R

marks

I ignore/irrelevant/inadequate - this response gains no mark, but any following correct

answers can gain marks.

() the word/phrase in brackets is not required to gain marks but sets context of response

for credit. e.g. (waxy) cuticle. Waxy not needed but if it was described as a cellulose

cuticle then no mark.

Small underlined words - this word only/must be spelled correctly

ORA or reverse argument/answer

ref./refs. answer makes appropriate reference to

AVP additional valid point (e.g. in comments)

AW alternative words of equivalent meaning

error carried forward ecf

Question	Expected Answer	'S		Marks	Guidance
1 (a) (i)	and la L mor D asy detail: Any two labels if co lumer muscl thick(o elastic	arger than photogra re than 1 layer of way mmetric right side ; orrect: n / space / hole;	all recognised; / inside layer folded		Score the drawing by a vertical row of ticks or crosse order O , L and D shown to the uncluttered side of the drawing. A. if circles are incomplete to show more than one layer. If drawn only the vein, Y – award O only. Accept lumer label. If a compass or equivalent has used – do not award O mark. Look for 'bulge' in wall of blood vessel not the 'floating' be in the middle. Lumen = AW e.g. 'room for blood' I. blood alone. A. correct terms referring to <i>tunica adventitia</i> = outer layer tunica media = muscle + elastic tissue; tunica intima endothelium. I. reference to 'smooth' 'longitudinal' 'stretching layer 'radial'. R. striated / cardiac. I. cytoplasm / cell wall / cell membrane / nucleus. If inner layer or wall, must have folded. Endothelium alone = 1 mark. If both blood vessels are drawn, mark the artery only. Longitudinal views – mark the end section only.
(ii)	X – <u>artery</u> ;			[1]	A. arteries. or arteriole or specific named artery. Mark in [1] list order. R. vein.
(iii)	feature shape in section wall thickness lining tissue	X – artery round thick folded / AW (more) muscle / elastic	Y – vein oval thin smooth / AW less		'thick muscular wall' = 2 marks from either side depending on approach. No comparative. If capillary points are made ignore – question is to
	lumen size	small / AW	large / AW	[max 2	2] distinguish between X and Y.

(b) (i)	14, 15, 16, 17, 17, and 18 in table	[1]	all numbers correct in table. (X – mass of weight g and Y – increase in mm)
(ii)	Axes – orientations and labels; Scales – linear scale, to fill more than half the printed grid; Plot – all correct; Line – joined point to point with ruled lines;	[4]	(X – mass of weight g and Y – increase in mm) +/- half a small square. ecf – from table. All plotted points (11) to be included on the graph. If plot internal diameter (2nd column) allow: A and L – Max 2. A. smooth curve passing through most points. R. extrapolation of line beyond 100g. R. thick lines. Straight line, non linear scale allow A only if correct. Score the drawing by a vertical row of ticks or crosses in order A, S, P and L. Histogram – A, P only.
(iii)	original size, shape or position / decrease / contract; (reason) elasticity must be linked to return in size / recoil; thick wall / elastic tissue / AW; AVP e.g. ref blood pressure / pulsation;	[max 3]	expansion / damaged / overstretched. reference to elastic limit and to overstretching.
		[Total: 16]	

e in mm)

1) to be included on
) allow: A and

(b) 1.	equal sample size of each potato; ONCE iodine solution / iodine in KI / iodine reagent; same concentration / volume of iodine solution; expected colour change; (yellow / orange / red brow blue / blue black / purple) compare colour change; (how fast / darker) (ucolorimeters) Safety – one from: Tie back hair / tie; ONCE Safety goggles / spectacles; ONCE		A. drops of iodine if stated number of drops but ign vague references such as few or several. 'same volume of iodine solution' = 2. I. using ethanol. Need original and final colours for expected change.
	Lab coat; ONCE		
2.	equal samples – same volume of water / s preparation / grinding; ONCE Benedict's reagent; same volume / amount of Benedict's solution; heating;	ame [max 3]	
	expected colour change; (blue → green / orange / recompare colours; (intensity of colour – or timing colour change) (use of colorimeters)		 A. chemical components / Fehling's / Clinistix. (pink dark blue) Not just warm but heat – maybe used a boiling water b = 2 marks. Need original and final colours for expected change.
	Safety – one from: water bath;		I. repeats.
	test-tube holders; same as above	[max 5] [8 marks]
