UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

www.papaCambridge.com MARK SCHEME for the October/November 2010 question paper

for the guidance of teachers

0610 BIOLOGY

0610/63

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Questions	Mark	Scheme		Guidance/comments			
1 (a) (i)	A 35 cm ³ and B 42 cm ³ ;				Both readings exact – no deviation. ecf for plotting		
(ii)	 (ii) A – axes orientation and labels; S – suitable and even scale; P – plot; L – line; K – key; 		[5]	 'x' time / minutes – minimum t / min 'y' volume of dough / cm³ – minimum v / cm³. A. ml Even and fill ½ or more of grid. Lines to be judged. Points +/- ½ square. All correct. Two lines – smooth curve, point to point ruled. No extrapolation. Label on line or separate. 2 separate graphs – max 4 – no mark for key. Non-linear scales – A, K only – max 2. Histogram / bar chart – A, P, and neatness of columns = max 3. 			
(iii)	both sets of dough rise; B rises more; B contains the flour improver; credit for use of appropriate numbers for trend; increasing steadily / smoothly;			Rate of in Calculati – % need	ncrease in B is h on of % or a diff d not be correct	. volume = dough if higher than A = 2 erence. (need to exi maths) dy rise. Allow for A	tend idea further
(iv)	two people to mix dough at same time / AW; same mass of sugar / yeast / flour / water / dough / ingredients; same type of yeast / sugar;					ot volume except fo	-
	same temperature / pH; technique to get dough into uneven surface of dough a replicates; AVP;) the measuring cylinder / s rises – use paper disk / AW;	[max 4]	from drau Ignore – Practical Ignore –	ughts / control te use of lids. idea on a possil time more often		it for longer.
