0610/22 **BIOLOGY**

October/November 2011 Paper 2 Core

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer all questions.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

This document consists of 19 printed pages and 1 blank page.

1 Fig. 1.1 shows five arthropods, each with four pairs of legs.

Fig. 1.1

(a) These five arthropods all belong to the same group.

To which group of arthropods do they all belong?

Tick (\checkmark) one box to show your answer.

| arachnids | |
|-------------|--|
| crustaceans | |
| insects | |
| myriapods | |

[1]

(b) Use the key to identify each of these arthropods.

Write the name of each animal in the correct box in Table 1.1.

Key

| | name of arthropod |
|---|--------------------------|
| 1 (a) legs with hairs (b) legs without hairs | go to 2 go to 3 |
| 2 (a) legs with small groups of hairs (b) legs hairy all over | Hydrachna Oligolophus |
| 3 (a) body clearly has two main regions (b) body seems to have only one main region | go to 4 Ixodes |
| 4 (a) body clearly segmented, pincers present (b) body with no segments, no pincers | Buthus Araneus |

Table 1.1

| animal | name of arthropod |
|--------|-------------------|

2 Fig. 2.1 shows a section through the human chest (thorax).

Fig. 2.1

| (a) | Name the structures labelled M , N and O . | |
|-----|---|-----|
| | M | |
| | N | |
| | O | [3] |
| (b) | The breathing rates of some students were measured before they started running. | |
| | Describe how you could measure the breathing rates. | |
| | | |
| | | ••• |
| | | ••• |
| | | 2] |

(c) Fig. 2.2 shows the results of an investigation into the breathing rates of some sta before and immediately after running.

Fig. 2.2

| (i) | State which student has the highest breathing rate before running. | |
|-------|--|------|
| | | [1] |
| (ii) | State which student has the smallest change in breathing rate from before immediately after running. | to |
| | | [1] |
| (iii) | Describe any patterns shown by the results. | |
| | | |
| | | |
| | | •••• |
| | | [2] |

| (d) | Explain why breathing rate changes during exercise. |
|-----|---|
| | |
| | |

Fig. 4.1 shows the cycling of phosphate ions in living organisms and the environment.

Fig. 4.1

| (a) | Phosphate | ions | are | often | in | limited | supply | in | the | soil | but | are | needed | by | all | living |
|-----|------------|------|-----|-------|----|---------|--------|----|-----|------|-----|-----|--------|----|-----|--------|
| | organisms. | | | | | | | | | | | | | | | |

| | (1) | Describe now plants might obtain phosphate ions from the soil. |
|-----|------|---|
| | | |
| | | |
| | | |
| | | [2] |
| | (ii) | Name one group of organisms represented by box X . |
| | | [1] |
| (b) | In h | numans, phosphate ions may be used in a similar way to calcium ions. |
| | (i) | Phosphates may be present in the diet as soluble phosphate ions. |
| | | Suggest why only the soluble phosphates in food enter the bloodstream of a human. |
| | | |
| | | [1] |
| | (ii) | Name one human tissue that is likely to contain phosphates. |
| | | [11] |

| | Way. |
|-----|---|
| | 9 |
| (c) | Using information from Fig. 4.1, suggest why mammal or bird faeces are often us a fertiliser. |
| | |
| | |
| | |
| | |
| | |
| | [3] |
| | [Total: 8] |

www.PapaCambridge.com (a) One function of the blood is to transport substances around the body.

Complete Table 5.1 to show where some substances may enter and leave the blood.

Table 5.1

5

| substance | enters the blood | leaves the blood |
|-----------|------------------|------------------|
| oxygen | | muscle cells |
| insulin | pancreas | |
| urea | liver | |

| | | [3] |
|-----|--|---------|
| (b) | Another function of the blood is to form a clot if the skin is cut. | |
| | State two advantages to the body of the blood clotting at a cut in the skin. | |
| | 1 | |
| | | |
| | 2 | |
| | | [2] |
