CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2012 series

0610 BIOLOGY

0610/63

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

			2,1
Page 2		Mark Scheme	Syllabus
		IGCSE – October/November 2012	0610
1	(a) (i) arth	ropod / crustacean;	Cany
	seg	ted / segmented limbs / legs; mented body; skeleton;	andridge com
		crustacean:	

- (a) (i) arthropod / crustacean;
 - (ii) jointed / segmented limbs / legs; segmented body; exoskeleton;

for crustacean: compound eyes; 2 pairs of antennae;

[Max: 2]

(b) (i)

damp	dry
20	4
22	2
18	6
14	10
16	8

[2]

(ii)		damp	dry
	total	90	30 ;
	mean	18	6;

[2]

(c) pie chart – 2 sectors 3/4 and 1/4; key / label;

[2]

(d) preference for humid / damp conditions;

(usually) cooler;

stop drying out;

keep respiratory surfaces moist;

find their food / nutrients in damp conditions;

(damp conditions under objects) give protection from predators / shelter;

AVP;

[max 3]

(e) same species / type / size / age of woodlice; all animals healthy / not damaged; control of (1) variable (e.g. temperature / humidity / apparatus) AVP;

[max 3]

[Total:15]

				IGCSE – October/November 2012	0610	
	(a)	S si D d	utline ize ar etail; ibel;	; ad proportion;	Syllabus 0610 PARCAMBAR	
	(b)	For	mula:	ment: 48 (mm); length/magnification / 48/100 / 100 x length = 48 on: 0.48 (mm) (0.47 – 0.49);	; [3]	
	(c)	c) floating / buoyant / on surface / AW; many air spaces / lighter;				
		gains light for photosynthesis /growth AW; AVP;				
	d)	(i)	lack com hyac eutro slow	ks light / so that plant beneath cannot photosynthesis of space for other plants to grow; petition for nutrients / minerals; sinth grows rapidly then dies and rots / plants undern ophication; s water movement (leads to silting); spiration – dries up water / leads to lack of (pond) wa	eath die and rot;	
		(ii)	biolo	gical means: clearing / booms;	o eat it / examples;	
			AVP	nical control: herbicides / pesticides / weed killer; ;	[max 2 _]	
3	(a)	(i)	A - 3 S - 3 P - 0 L - 1	size; correct plots;	[4	
		(ii)		falls; of activity increases / enzyme works faster / me	ore collisions of molecules (as	

rate of activity decreases / enzyme denatured (as temperature rise above 50°C);

[Max: 4]

temperature rises) (or vice versa);

reference to optimum/best temperature;

figures quoted in support;

line rises;

AVP;

Page 4	Mark Scheme	Syllabus	.0	ľ
_	IGCSE – October/November 2012	0610	100	

(b) (i) increased reliability; identify / reduce errors / anomalies; identify the end point clearly; to check method / technique; AVP;

[Max: 2

(ii) suggest and explain

variable	explanation	
milk concentration	will alter time to end point	
milk freshness	pH can be changed – alters enzymes activity	
type of milk	alters enzyme activity /substrate conc.	
volume / conc. enzyme	alter amount of reactions vary enzyme rate	
рН	vary activity of enzyme
