Use **only** words from the box.

allel	e dipl	oid fert	ilization	game	tes	gene	half
ha	aploid	implanta	tion me	eiosis	mitosi	s sar	ne

In animals, new cells replace damaged cells. These new cells are formed from existing cells by division. When this happens the nucleus also has to divide. During the process of the nucleus divides into two new nuclei.

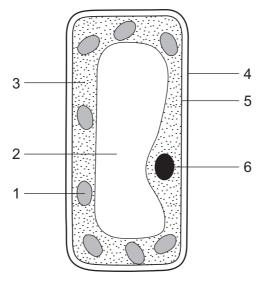

These new nuclei contain the two sets of chromosomes, which is the

number of chromosomes as the original nucleus. They are described as being

During the process of	a nucleus normally divides into four new	
nuclei that are not genetically identical. The	ese nuclei contain th	e
number of chromosomes of the original nuc	cleus and are described as	<u> </u>
This type of division produces		
At the original numb	er of chromosomes is restored.	[8]
