UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2009 question paper for the guidance of teachers

0620 CHEMISTRY

0620/02

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2009 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	er
	IGCSE – October/November 2009	0620	100

(a) bromine and fluorine / Br and F (b) krypton / Kr (c) nitrogen and oxygen / N and O [1] (d) 175 [1] (i) basic ALLOW: metallic [1] (ii) (burning) fossil fuels / fuels containing sulfur / volcanoes; [1] effect of SO₂ on environment e.g. destroys trees / kill plants / kills animals or plants in lakes or rivers / chemical erosion of (limestone) buildings / corrosion of metals; ALLOW: difficulty in breathing NOT: kills plants / animal in seas / kills marine life [1] (iii) any three of: starts off high pH / pH above 7 / named pH above 7 / alkaline (pH); as acid added pH goes down; neutralises / neutralisation / neutral / pH 7; pH ends up below 7 / named pH below 7 / acid (pH); [3] (iv) universal indicator paper / pH meter [1] (v) potassium nitrate ALLOW: KNO₃ [1] 2 (a) compound: top box; element: 2nd box; ion: 5th box;

[4]

[1]

molecule: 4th box;

(b) air + steel / first and last boxes ticked

		2.	
Page 3	Mark Scheme: Teachers' version	Syllabus	er
	IGCSE – October/November 2009	0620	000
(c) (i) any	four of:		Camphi
nuc	leus or particles on inside and electrons on outside ;		Tage
nuc	leus labelled ;		COM
	etrons on outside labelled ;		

ALLOW: e for label

two electrons:

protons + neutrons in nucleus + labels; ALLOW: p for proton and n for neutron IGNORE: incorrect number of neutrons

two protons; [4]

- (ii) balloons / (arc) welding / (advertising) lights / growing Si or Ge crystals / making Ti or Zr / coolant (in nuclear reactors) / wind tunnels / for divers [1] NOT: as an inert gas / in (hot) air balloons / in bulbs
- (iii) helium unreactive / second box down ticked [1]
- 3 (a) structure of ethanol with all atoms and bonds shown ALLOW: OH in place of O - H [1]
 - (b) (i) exothermic [1]
 - (ii) 16.2 (g) [1]
 - (iii) $2 (CO_2) + 3 (H_2O)$ [1]

(c) any two of:

(very) high melting / boiling points;

(very) high density; ALLOW: harder

form coloured compounds;

NOT: they are coloured

variable oxidation numbers / can form more than one type of ion / variable valency / form complex ions;

[2]

are (good) catalysts;

ALLOW: chemical differences e.g. do not react with cold water

Page 4			Mark Scheme: Teachers' version Syllabus				
	Page 4		•	IGCSE – October/November 2009	Syllabus 0620		
	(d)	(i)		two of: bles / effervescence ;		a Cambridge	
		copper carbonate / solid dissolves ;				100	
				tion becomes coloured / solution goes green / cha Γ: wrong colour	ange of colour ;	[2	
		(ii)	aque	eous / dissolved in water		[1]	
	(e)	poly	ymer	; addition ; monomers ;		[3]	
4	(a)			physical properties of group I metal e.g. ow melting boiling point (for a metal) ;			
		soli	d;				
		conducts heat or conducts electricity;					
		mal	leabl	e;			
			-OW:	ductile / shiny (when cut) ard / sonorous		[2]	
	(b)	1				[1]	
	(c)	 (i) atoms of same element / same proton number with different numbers of r different number of nucleons 			eutrons / [1]		
		(ii)	78			[1]	
	(d)	boil	ing p	oint 500 – 680 (actual = 669);		[1]	
			-	y: any idea of faster than rubidium e.g. explosion / more reactive / increased reaction	very violent spitting;	[1]	
	(e)	CsO	C1			[1]	
	(f)	рН	7			[1]	
	(g)	(aq	ueou	s) silver nitrate / aqueous lead nitrate ;		[1]	
				ecipitate ; onditional on correct reagent)		[1]	

	Page 5	Mark Scheme: Teachers' version	Syllabus
		IGCSE – October/November 2009	0620
5	(a) double b	oond(s) ringed	Cambric
	(b) C ₁₀ H ₁₆		age con
	(c) red-brow	vn / brown ;	[1]

(c)	red-brown / brown ;	[1]
	to colourless / loses its colour :	

[1] NOT: becomes discoloured

(d) (i) A thermometer; B condenser; C measuring cylinder; NOT: measuring tube [3]

(ii) arrangement: random; ALLOW: far apart [1]

movement: random / rapid / move everywhere; [1]

(e) (i) idea of oxygen not in excess / carbon monoxide formed (instead of carbon dioxide) ALLOW: doesn't burn completely / doesn't burn as much as it could ALLOW: carbon or soot formed (instead of carbon dioxide) [1]

(ii) toxic / kills you / poisonous / asphyxiation / suffocation NOT: harmful [1]

(f) (i) A [1]

(ii) C [1]

(iii) B [1]

(a) decomposition [1] 6

(b) ions must be able to move

NOT: charges must be able to move REJECT: ions and electrons move = 0 [1]

(c) lower melting point of the electrolyte ALLOW: helps dissolve the aluminium oxide [1]

(d) B [1]

(e) anode: oxygen; [1]

cathode: aluminium;

(both aluminium and oxygen but at wrong electrodes = 1) [1]

	ge 6	Mark Scheme: Teachers' version	Syllabus	63.	1
		IGCSE – October/November 2009	0620	Day	
(f)	oxygen r	reacts with them / oxygen reacts with carbon;		- al	76.
	'burns' them away / carbon dioxide formed / gas formed ; ALLOW: the electrodes get used up				Tage
(g)	3				[1]
(h)	aircraft body / car body / saucepans/ electricity cables / food containers / window frames				
	_				[1]
(a)	both part	ts required for each mark			
	A: yes	– air and water present ;			[1]
	B : no –	no water / there is only air ;			[1]
		• • • • • • • • • • • • • • • • • • • •	/ zinc corrodes	s instead /	[1]
(b)	any three	e of:			
	oxygen blown into molten iron ;				
	to oxidise	e sulphur / carbon / phsophorus / silicon ;			
	basic oxi	ides / CaO / MgO added ;			
	react wit	h phosphorus and silicon ;			
	(P and S	si) removed as slag / slag formed ;			[3]
(c)	chemica	l plant / surgical instruments / cutlery			[1]
(d)	O remov	red (from iron oxide) / oxidation number (of iron) dec	reased		[1]
	(g) (h) (a)	'burns' the ALLOW: (g) 3 (h) aircraft the cooking NOT: allowed and the c	 (f) oxygen reacts with them / oxygen reacts with carbon; 'burns' them away / carbon dioxide formed / gas formed; ALLOW: the electrodes get used up (g) 3 (h) aircraft body / car body / saucepans/ electricity cables / for cooking foil / other suitable uses NOT: alloys unqualified (a) both parts required for each mark A: yes - air and water present; B: no - no water / there is only air; C: no - coating protects / zinc protects (from air and water) zinc is a sacrificial metal; (b) any three of: oxygen blown into molten iron; to oxidise sulphur / carbon / phsophorus / silicon; basic oxides / CaO / MgO added; react with phosphorus and silicon; (P and Si) removed as slag / slag formed; (c) chemical plant / surgical instruments / cutlery 	 (f) oxygen reacts with them / oxygen reacts with carbon; 'burns' them away / carbon dioxide formed / gas formed; ALLOW: the electrodes get used up (g) 3 (h) aircraft body / car body / saucepans/ electricity cables / food containers / cooking foil / other suitable uses NOT: alloys unqualified (a) both parts required for each mark A: yes – air and water present; B: no – no water / there is only air; C: no – coating protects / zinc protects (from air and water) / zinc corrodes zinc is a sacrificial metal; (b) any three of: oxygen blown into molten iron; to oxidise sulphur / carbon / phsophorus / silicon; basic oxides / CaO / MgO added; react with phosphorus and silicon; (P and Si) removed as slag / slag formed; 	(f) oxygen reacts with them / oxygen reacts with carbon; 'burns' them away / carbon dioxide formed / gas formed; ALLOW: the electrodes get used up (g) 3 (h) aircraft body / car body / saucepans/ electricity cables / food containers / window fran cooking foil / other suitable uses NOT: alloys unqualified (a) both parts required for each mark A: yes – air and water present; B: no – no water / there is only air; C: no – coating protects / zinc protects (from air and water) / zinc corrodes instead / zinc is a sacrificial metal; (b) any three of: oxygen blown into molten iron; to oxidise sulphur / carbon / phsophorus / silicon; basic oxides / CaO / MgO added; react with phosphorus and silicon; (P and Si) removed as slag / slag formed;

[2]

(e) iron(II) oxide + hydrochloric acid \rightarrow iron chloride + water

(1 for correct reactants, 1 for correct products)
