## **READ THESE INSTRUCTIONS FIRST**

No Additional Materials are required.

Write your Centre number, candidate number and name on all the work you hand in. Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working. Do not use staples, paper clips, highlighters, glue or correction fluid. DO **NOT** WRITE IN ANY BARCODES.

Answer all questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [ ] at the end of each question or part question.

www.PapaCambridge.com A 7-segment display is used to indicate which floor a lift is on. Each segment is null 9 as shown:

A byte is used to hold the data needed to light the correct segments. Bit 0 is always zero. For example, 3 is represented by

and by

1	0	0	1	1	1	1	0
7	6	5	4	3	2	1	0
Bit Number							

(a) If the lift is to stop at more than one floor, the data is held in successive bytes. For example:

FIRST BYTE:

	0	0	0	0	1	1	1	0
ı			_			_		

**SECOND BYTE:** 

1	1	0	1	1	0	1	0

Which floor numbers are stored in each byte?

First byte floor number	
•	

Second byte floor number \_\_\_\_\_ [2]

(b) What bit pattern is used to indicate Floor 2?

				[1]

(c) The lift is travelling down to stop at Floors 5, 3 and 1. When it stops at Floor 5, a passenger gets in and presses the button for Floor 2.

How does the system ensure that the lift stops at Floors 3, 2 and 1 in that order?

www.PapaCambridge.com 19 A company has 5000 CDs, DVDs, videos and books in stock. Each item has a 5-digit code with the first digit identifying the type of item, i.e.

1 = CD

2 = DVD

3 = video

= book

For example, for the code 15642 the 1 identifies that it is a CD, and for the code 30055 the 3 identifies that it is a video.

Write an algorithm, using pseudocode or otherwise, that

- Inputs the codes for all 5000 items
- Validates the input code
- Calculates how many CDs, DVDs, videos and books are in stock
- Outputs the **four** totals.
