

Candidates answer on the Question Paper.

No Additional Materials are required.

## **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name on all the work you hand in. Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working. Do not use staples, paper clips, highlighters, glue or correction fluid. DO **NOT** WRITE IN ANY BARCODES.

Answer **all** questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together. The number of marks is given in brackets [] at the end of each question paper.

For Examiner's Use		

This document consists of 16 printed pages.

15 A database has been produced showing solar system statistics.

A database ha	12database has been produced showing solar system statistics.Name of planetDistance from sun (x10 <sup>6</sup> ) (km)Number of of moonsMaximum surface ringsDiameter (%C)Mercury58004274880					
Name of planet	Distance from sun (x10 <sup>6</sup> ) (km)	Number of moons	Number of rings	Maximum surface temperature (°C)	Diameter (km)	
Mercury	58	0	0	427	4880	
Venus	108	0	0	480	12100	
Earth	150	1	0	58	12756	
Mars	228	2	0	17	6787	
Jupiter	778	16	3	-150	143200	
Saturn	1427	18	1000	-180	120000	
Uranus	2871	15	11	-210	51800	
Neptune	4497	8	4	-214	49528	
Pluto	5914	1	0	-220	2330	

(a) How many records are there in this database?

[1] .....

(b) The following search condition was typed in:

(Number of moons > 0) AND (Diameter (km) < 15000)

Using Name of planet, write down the results of this search:

[2] 

(c) Write down a search condition to find out which planets have rings or have a diameter more than 50000 km.

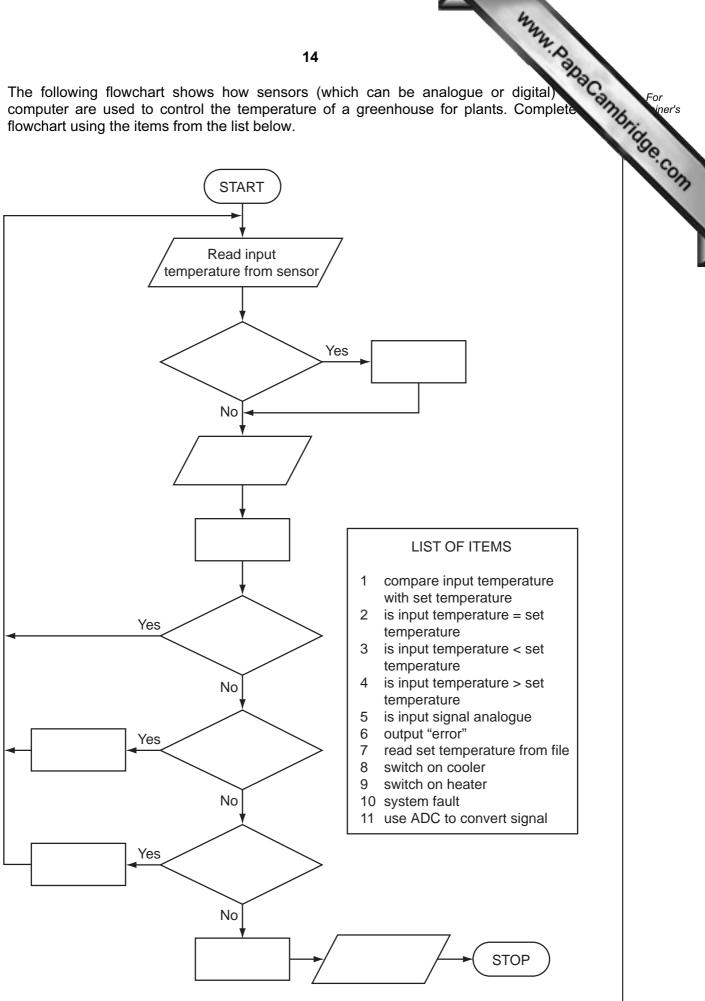

[2]

.....

- (d) Name a different validation check for each of the following fields.
  - (i) Maximum surface temperature (<sup>0</sup>C) (ii) Name of planet [2]

		13 The data in the database was sorted in descending order using the Number of field. Using Name of planet only, write down the results of this sort.
	(e)	The data in the database was sorted in descending order using the <b>Number of</b> field. Using <b>Name of planet</b> only, write down the results of this sort.
		[2]
6	(a)	What is meant by virtual reality?
		[1]
	(b)	Describe <b>two</b> special devices that are used for man-machine interaction in virtual reality systems.
		1
		2
		[2]
	(c)	Give <b>two</b> examples of typical output from a virtual reality system.
		1
		2
		[2]
	(d)	Give <b>one</b> example of a use of virtual reality.
		[1]

17 The following flowchart shows how sensors (which can be analogue or digital) computer are used to control the temperature of a greenhouse for plants. Complete flowchart using the items from the list below.

		ch customer has a library card containing a unique customer code. Each book contains a que bar code.	133
	(a)	Which data item could link the two tables together?	
		[1]	
	(b)	Today's date is 11 November 2008. Describe how the system would decide automatically which books were overdue and how the customers could be contacted to return the overdue books.	
		[3]	

- www.papaCambridge.com 19 The manufacturing cost of producing an item depends on its complexity. A con manufactures three different types of item, with costs based on the following calculation
  - Item type 1: item cost = parts cost \* 1.5 Item type 2: item cost = parts cost \* 2.5 Item type 3: item cost = parts cost \* 5.0

The company makes 1000 items per day.

Write an algorithm, using pseudocode, flowchart or otherwise, which

- inputs the item type and parts cost of each item .
- outputs the item cost for each item
- calculates and outputs the average (mean) item cost per day (based on 1000 items being made).

[5]
