UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

## www.papacambridge.com MARK SCHEME for the May/June 2012 guestion paper

## for the guidance of teachers

## 0680 ENVIRONMENTAL MANAGEMENT

0680/41 Paper 4 (Alternative to Coursework), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

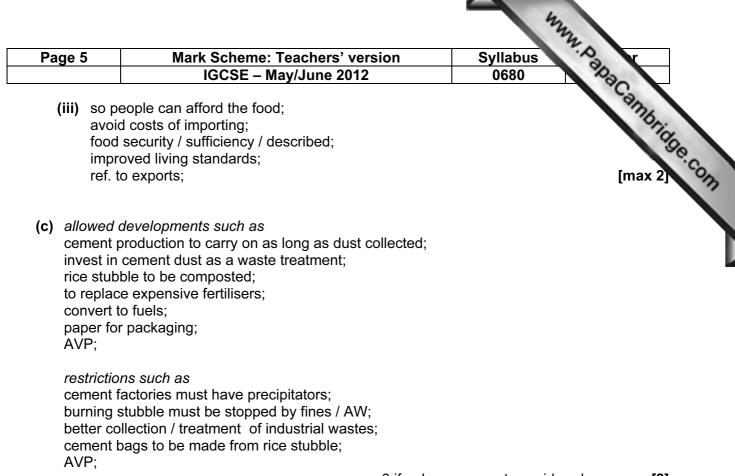

Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

General no	otes		ente
Symbols us	sed in Environmental Management mark schemes.		1
ı	separates alternatives for a marking point – ot idea are also credited	er valid ways of expre	w.papacambhile
;	separates points for the award of a mark		
[3]	indicates the number of marks available		
[max 3]	the number shows the maximum number of mar are more marking points than total marks availab		stion where there
max 3]	when part of the marks of a question must com indicated by non-bold marks showing the inte question these non-bold marks are also used to show schemes are used	nal maxima for differ	ent parts of the
talic	indicates that this is information about the man credit italic text is also used for comments about alterr or rejected		
ora	or reverse argument – shows that an argument credited	t from an alternative v	viewpoint will be
ΑW	alternative wording, sometimes called 'or words AW is used when there are many different ways		idea
( )	the word / phrase in brackets is not required to response for credit e.g. (nuclear) waste – nuclear is not needed but then no mark is awarded	-	
volcanic	underlined words – the answer must contain exa	tly this word	
ecf	error carried forward – if an incorrect answer answer is subsequently used by a candidate in that the candidate's incorrect answer will be use parts of the question	ater parts of the question	on, this indicates

	Ŭ		IGCSE – May/June 2012 0680	
(a)	(i)		Mark Scheme: Teachers' version       Syllabus         IGCSE – May/June 2012       0680         d jobs / better job / better pay / services / living standards / join relatives / to work on farm anymore;         difference = diarrhoea; = intestinal parasites;	ambrida
(b)	-		<i>difference</i> = diarrhoea; = intestinal parasites;	[2]
	(ii)		s – close contact with infected children / overcrowding / poor ventilation / AW; <i>rhoea</i> – lack of clean water supply / food handling / AW;	[2]
	(iii)	<i>three</i> ques the g	l layout; e questions about children's health such as tions on lungs (coughing / pain / AW);; jut (stomach pains / weight loss);; other infections e.g. skin;	max 4]
(c)	(i)		ple size likely to be too small / AW; sampling from one part of the settlement / AW;	max 1]
	(ii)	simila	number of settlement sites; ar / large numbers of children; omly distributed / AW;	max 1]
	(iii)	so m	dard method gives similar sample size; eans can be compared / stats calculated; om sampling / reliable method;	[max 2]
(d)	(i)	gree	n vegetables <b>and</b> soap;	[1]
	(ii)		nins / minerals / named vitamin / mineral; v highest consumption of green vegetables	[1]
	(iii)		ced bacterial transmission; cription of contamination of food with faeces / AW; ;	[max 2]
(e)			onable ways such as us piped water supply <b>and</b> reliable sewage removal;	
	red	uced	<i>rant supporting reasons such as</i> contamination by faeces; contamination via food;	
		uced	contamination via direct human contact;	max 3]
(a)	(i)	pollu	ted air cannot escape to desert/ AW / pollution produced on lowest ground;	[1]
	(ii)	pollu	ition trapped / less pollution blown away;	[1]
	(iii)	furth	er detail e.g. cold air above hot air / temperature inversion / ref. very low wind	s; <b>[1]</b>
