## MARK SCHEME for the October/November 2013 series

## 0680 ENVIRONMENTAL MANAGEMENT

0680/13

Paper 1, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Page 2				Syllabus	Paper
			IGCSE – October/November 2013	0680	13
1	(a) (i)	-	owing crops/arable storal/keeping animals/livestock/cattle		[1]
	(ii)	any	two of:		
		whic	icides are chemicals which kill harmful insect pests; h eat/damage crops; se disease;		[2]
	(iii)	any	two of:		
		incre whic alga incre bact oxyg	ophication; ease in nutrients/nitrates/phosphates in stream; h cause a rapid growth of algae/algal bloom; e die; ease in organic matter; eria decompose of dead algae; jen level lowered; h of organisms/aerobes/not enough oxygen for plar	nt/animal life;	[4]
	<b>(b)</b> any qua		e separate points or two points with one develope	d related to quan	tity and/or
		resis	ntity: stance to pests/diseases/drought/salinity; ance of weedkillers/herbicides; ;		
		enha supe impr long	oved nutrient content; anced appearance/colour/e.g. golden rice; erior/regular/better size; oved ripening/flavour; er lasting/remain fresh for a longer time/e.g. tomato	es;	[0]
		AVP	,		[3]
					[Total:10]

	IGCSE – October/November 2013	0680	13

2 (a) (i)

	Sunday 23rd October	Wednesday 9th November
local time	13:41	21:30
magnitude	7.2	5.6
number of people dead	604	22
buildings destroyed	11 232	25
		[1

- (ii) there have been many/2500 aftershocks in the area since the October earthquake; [1]
- (iii) any two with relevant explanations Food/clothing/medicine/clean water/chemical toilets/sniffer dogs/AVP;
- (b) epicentre: the place on the earth's surface above the focus;
  focus: the place in the earth's crust where the earthquake starts;
  [2]
- (c) credit 2 marks for description/statement why some earthquakes are more damaging with 2 marks for development/explanation no credit for magnitude/strength no credit for development taken from resource

depth from surface/focus; distance of epicentre from centre of population; population density/urban or rural; state of preparedness/level of development (developed/developing rich/poor); geology/ soil/type; time of day/time of year; quality of building construction/design; existence of warning systems/speed of relief/aftercare; damage to infrastructure/water/gas; development could refer to fires; tsunami in some parts;

[Total: 10]

				IGCSE – October/November 2013	0680	13						
3	(a)	(i)		uary 413 mm;		[0]						
			Dec	ember 330 mm;		[2]						
		(ii)	3;			[1]						
	(b)	any	v two	descriptions developed correctly:								
		drip	tips	o get sunlight (1); (1); remove heavy rainfall (1); falls every afternoon ( ves (1); allow more transpiration (1);	(1);							
		thick/dark/leathery/waxy leaves (1); withstand high temperatures/absorb more available										
		light/allow more photosynthesis (1); flexible leaf stems; leaves move with the sun to maximise photosynthesis										
		shallow roots (1); extract soil nutrients (1); from surface layers (1); buttress roots (1); support weight of trees as they grow to reach sunlight (1);										
			t different times (1	);								
		few	/no b	ayers/stratification (1); competition for heat, light, rai ranches on trees (1); grow upwards towards the lig								
			tallest trees smooth trunks small leaves (1); wind (1); tallest trees small leaves (1); strong sunlight [4]									
	(c)	any	any three of:									
				e litter no longer protect soil;								
				longer hold soil together; posed to heavy rain;								
				un-off increases; s washed away/eroded;		[3]						
		ισρ	0011									
						[Total: 10]						
4	(a)	(i)	A ev	vaporation;								
	( )	()	B tra	anspiration/ evapotranspiration; ecipitation;								
			•	noff;		[2]						
		(ii)	irriga	ation;								
			wate	er drawn off stream to give to crops;		[2]						
	(h)	(1)	L io	amaka mayba with aulfur diavida/NOv gaaga								
	(a)	(i)	diss	smoke maybe with sulfur dioxide/NOx gases; olve in rain at C;								
			-	ve acid rain; olve stone of buildings;		[4]						
				<b>J</b>								
		(ii)		e organic matter in Z / eq;								
			more	e bacteria/ microbes / eq in Z;		[2]						
						[Total: 10]

	IGCSE – October/November 2013	0680	13

- (b) (i) (Anopheles) mosquitoes, are the vector for/carry, the malaria parasite/ *Plasmodium*/organism that causes malaria/AW; the larval stages of the mosquito life-cycle live in water/adult female mosquitoes lay their eggs in water/AW; (accept mosquitoes breed in water); AVP; e.g. (adult mosquitoes do not fly far and are therefore found in highest densities close to water/AW);
  - (ii) one mark for the strategy and one for a correctly related explanation

pour kerosene/oil on water;	kills larvae;
drain marshes/stagnant water;	stop mosquitoes breeding;
spray insecticides/pesticides;	kills mosquitoes/larvae;
prophylactic drugs/choroquine/larium;	kills <i>Plasmodium</i> /parasite;
insect repellent;	stops mosquitoes biting;
sloop under mosquite note;	stops mosquitoes biting;
sleep under mosquito nets;	stops mosquitoes biting;
