MARK SCHEME for the October/November 2013 series

0648 FOOD AND NUTRITION

0648/12

Paper 1 (Theory), maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

family background / tradition

4 × 1 marks [4]

Page 7	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0648	12

(c) <u>Ways to ensure sufficient HBV protein in vegetarian diet</u>

lacto-vegetarian / lacto-ovo-vegetarian / ovo-vegetarian will get HBV protein from milk / cheese / eggs;

TVP / Quorn / mycoprotein; made to resemble meat / sausages / cutlets / mince / sliced meat substitutes for sandwiches; protein fibres stuck together with egg albumen; not suitable for vegans;

Vegans can only get HBV from a plant source; soya beans / soya products (e.g. milk / flour / tofu / tempeh); contain all indispensable amino-acids;

complementary proteins; can mix with HBV protein foods (e.g. milk / cheese / eggs / soya with LBV foods (e.g. nuts / cereals / pulses);

or two LBV protein foods in same meal;

e.g. casserole with soya chunks and beans, rice pudding, beans on toast, lentil soup with bread, etc.;

Two ways with two explanations

2 × 2 marks [4]

(d)	Problems which could occur for those following a vegetarian diet
	May have a shortage of:
	Vitamin A / retinol – needed for visual purple / night vision –
	include red / orange / green vegetables / fortified margarine –
	Vitamin B ₂ / riboflavin – needed for release of energy from nutrients –
	include nuts / cereals / pulses / potatoes –
	Vitamin B ₁₂ – needed to prevent pernicious anaemia –
	include yeast extract / fortified breakfast cereals –
	Vitamin D – needed to absorb calcium –
	include fortified margarine / sunshine –
	calcium – needed for bones / teeth –
	include fortified breakfast cereals / nuts / pulses / cereals –
	iron – needed to prevent anaemia –
	include fortified breakfast cereals / sova / green vegetables -

include fortified breakfast cereals / soya / green vegetables –

- Vitamin C needed to ensure absorption of iron / healthy skin / connective tissue include citrus fruit / blackcurrants / green vegetables –
- Omega 3 needed to lower cholesterol and prevent blood clots -

Other problems:

may be low in energy – due to high water content in fruit and vegetables – eat energy dense snacks, e.g. nuts / cereals –

may be bulky due to cellulose - may cause digestive problems -

diet may lack variety - use herbs / spices / vary cooking methods -

packaged / processed foods may contain 'animal' products -

check ingredients list / know E numbers to avoid –

could be high in animal / saturated fats from excessive intake of cheese / dairy products -

MARK BANDS		Marks
High	good understanding including 6 or more points	3–4
Medium	some understanding and 4–5 points	2–3
Low	little understanding, has mentioned 1-3 points	1

For 2 or more correct food examples award 1 mark max.

Answer should be weighted so that 7 marks are available for the nutrient section and the other 8 marks are balance between the other 2 sections.

Page 11	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0648	12

(b) Discuss the information which could be found on a food label and state why the information is important [15]

The answer may contain the following knowledge and information.

name of food - so correct type of food can be bought product description - know what is being bought, e.g. specific cut of meat ingredients list - in descending order by weight - may wish to avoid some ingredients additives - by name or number - so those with allergies / illness can avoid cooking instructions - so product can be served at its best storage instructions - to maintain best quality legal advice - e.g. may contain nuts - so product is safe to eat -'use by' / 'best before' dates - so product is safe to eat / used at its best weight / number in package - so unit price can be calculated - can buy the amount required brand name – may want to buy from a well-known range – name and address / 'phone number / email address of manufacturer - in case of complaint country of origin - may wish to avoid products from certain areas picture of product - see contents of tin at a glance serving suggestion – give new ideas to consumer – bar code - pricing, stock control recycling information - care of the environment list of other products in range - to encourage customer to buy more special claims - e.g. low in fat, no artificial colourings - to enable wise choice price - not a legal requirement - may be for promotion -Nutritional Information

content per 100g - and per serving - helps to plan a balanced diet -

may have added Vitamin C - calcium -

may give RDI for particular ingredients – shows proportion supplied by one serving –

states amount of fat - useful for low fat diet -

states type of fat - vegetarians will not wish to include animal fat in their diet -

states how much of fat is saturated - for those with CHD / low cholesterol diet -

quantity of sodium - low salt for those with hypertension -

amount of sugar - diabetics - weight reducing diets -

protein from vegetable sources - for vegetarians if 'V 'shown on label - but may not be suitable for vegans -

kcal / kJ per100g or per portion – for those counting calories –

helps to plan a balanced diet - by choosing more suitable alternatives -
