International General Certificate of Secondary Education

## MARK SCHEME for the November 2004 question paper

## 0460 GEOGRAPHY

0460/04

Paper 4 (Alternative to Coursework), maximum mark 60

www.papacambridge.com

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the November 2004 question papers for most IGCSE and GCE Advanced Level syllabuses.

Grade thresholds ta examination.	aken for Syllab	us 0460 (Geo	graphy) in the	November 20	WWW. Papa 04	Cambridge.com
	maximum	mir	nimum mark re	equired for gra	de:	00
	mark available	А	С	E	F	COM
Component 4	60	37	28	19	16	

The threshold (minimum mark) for B is set halfway between those for Grades A and C. The threshold (minimum mark) for D is set halfway between those for Grades C and E. The threshold (minimum mark) for G is set as many marks below the F threshold as the E threshold is above it.

Grade A\* does not exist at the level of an individual component.

## INTERNATIONAL GCSE

MARK SCHEME

## MAXIMUM MARK: 60

SYLLABUS/COMPONENT: 0460/04

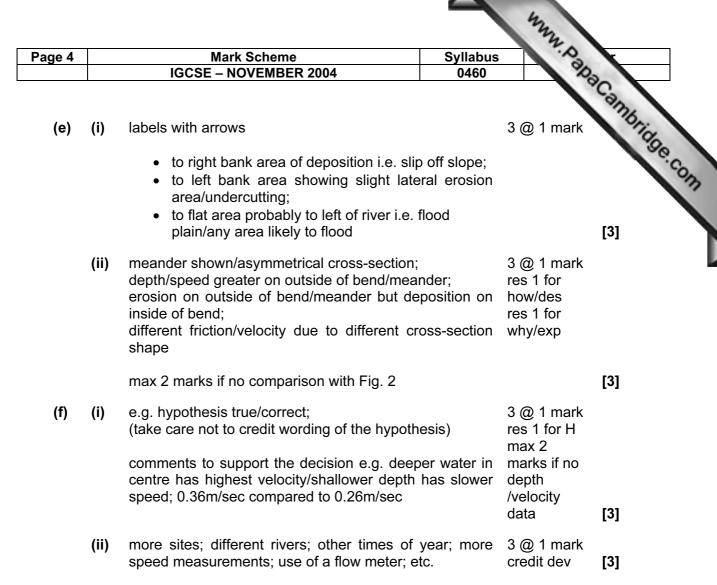

GEOGRAPHY Alternative to Coursework

Page 1		Mark Scheme	Syllabus	· · · · ·	
		IGCSE – NOVEMBER 2004	0460	No.	
es = Re or Hyp ev = De es = De np = im	= Hype evelopr escriptio	othesis nent of a point on		A @ 1 mark	bidge
1 (a)		characteristics should be more than the CBD a	nd focus	4 @ 1 mark	
-		on the central point of the CBD e.g. most accessible location/where main roads mee busiest/lots of people/highest number of pedestr most traffic/most congested/noisiest area; tallest buildings/highest buildings; highest cost of land/highest rents/highest rates; high street shops/comparison shops/large shops/department stores; banks/services/offices/public buildings etc.	rians;	max 2 marks for general comments about CBD rather than specific central area of CBD	[4]
(b)	(i)	must be related to site selection		2 @ 1 mark	
		advantage:		-	
		wide area/all around X/large area/all different d /equal distance or area in paces idea/r /easy/simple			
		disadvantage:			
		different length or size paces/not equal or depends on the roads/depends on the direct not include outer area of town			[2]
	(ii)	name/student group; date;		2 @ 1 mark	
		time; location/road name/site number/direction from X pedestrian flow direction; weather	<b>‹</b> ;		[2]
(c)	(i)	isoline 30 should be drawn half way between the 10	4 @ 1 mark		
		isoline and the 50 isoline on the Insert, wi tolerance.	ith 2mm	3 marks for line	
		must not include the points 24, 26 or 28 within a	area	(top, left and right)	
				res 1 mark for label of 30	[4]
	(ii)	correct identification of area over 50 pedestria inside 50 line;	ans/area	2 @ 1 mark 1 mark for identifying the correct area	
		correct use of key shading		1 mark for using	

age 2		Mark Scheme	Syllabus	· ~	
		IGCSE – NOVEMBER 2004	0460	apa .	
(d) (	(i)	number of pedestrians decreases away from 2	<b>X</b> ·	2 @ 1 mark	5ri
(u)	(')	not an even distribution but bulges in the W/higher number in the south and west	•	2 @ 1 mark 1 mark for general recognition of decrease 1 mark for recognising uneven decrease	[2]
(	(ii)	identify services on map likely to attract pedes bank; secondary school, car park reasons for change for each service e.g. p attracted to and from the Bank car park attracts people because they park the walk to X;	eople are	4 @ 1 mark max 2 marks for service	
		side streets attract less people;			[4]
(e) (	(i)	item bought infrequently/bought after compar /high value/high profit margin e.g. TV/CD player/ furniture/shoes/clothes	ring prices	2 @ 1 mark credit correct	
				example	[2]
	(ii)	e.g. survey the 60 shops and count the r conv/comp and apply that ratio to 20 shops/fi type of every shop then ask a proportion of ask every 3rd shop/systematic sample; different sizes of shops; different types of shops; variety of locations	nd out the	2 @ 1 mark	[2]
(f)		shopkeepers may be in a hurry; did not kno remember; subjective/biased/not quantitative; could be more than one period; may not fit times of survey/recording sheet;	w; cannot	2 @ 1 mark credit development	
<b>(</b> g)		results may vary with different days credit the decision that the hypothesis is true; the decrease in pedestrians is not even;		4 @ 1 mark	[2]
		credit evaluation comments such as:		res 1 for Hyp credit development of	
		repeat more interviews with shopkeepers; use the results of the interviews to select time counts;	s of	ideas res 1 for imp	
		repeat pedestrian survey at different times; 12.00 - 14.00 i.e. busiest; repeat on different days		credit development of ideas	[4]
