UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

www.papacambridge.com MARK SCHEME for the May/June 2012 question paper

for the guidance of teachers

0460 GEOGRAPHY

0460/13

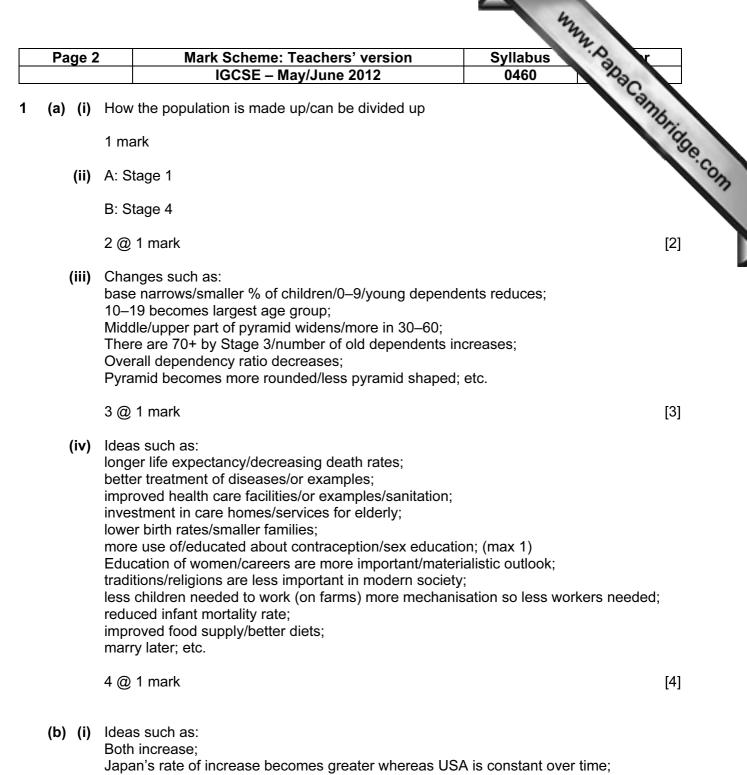

Paper 1, maximum raw mark 75

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

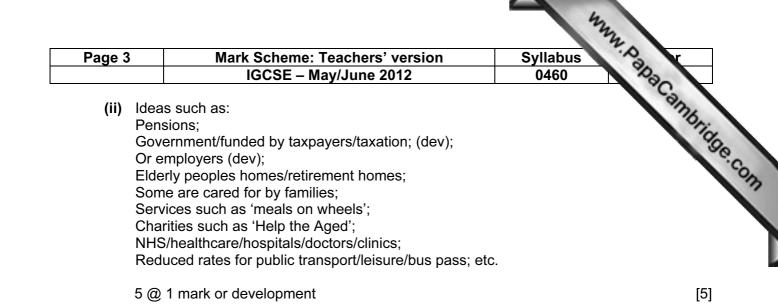

United States percentage higher than that of Japan in 1950 but lower in 2010/after 1980; Japan's percentage increasing more rapidly than United States;

United States 9% (1950) rises to 13% (2000)/Japan 6% (1950) rises to 23% (2000) etc.

3 @ 1 mark

[3]

(c) Levels marking

Level 1 (1–3 marks)

Statements including limited detail describing problems caused by an increase in percentage of over 65.

(e.g. increasing percentage of elderly dependents; strain on working population; higher taxation; need for more money to be spent on care of elderly; lack of workforce; harder to defend country; increase in rates of pay; under use of services for young; increasing dependency ratio; etc.)

Level 2 (4–6 marks)

Uses named example

More developed statements describing problems caused by an increase in percentage of over 65.

(e.g. increasing percentage of elderly dependents causes strain on working population; higher taxation as a result of increasing percentage of elderly dependents; need for more money to be spent on care homes/health care etc.; lack of innovative workforce; not enough recruitment to forces to defend country; lack of workers means need to attract foreign workers; reduced supply of workers leads to increase in rates of pay; under-use of services for young leads to inefficiency/closure of schools etc.)

(NB MAX 5 MARKS WITH NO EXAMPLE)

Level 3 (7 marks)

Uses named example (e.g. Japan).

Comprehensive and accurate statements explaining why the government is concerned by an increase in percentage of over 65, including some place specific reference.

(e.g. With over 20% of population elderly dependents causes strain on working population; higher taxation as a result of increasing percentage of elderly dependents; need for more money to be spent on care homes/health care etc.; lack of innovative workforce causes stagnation in electronics industries; not enough recruitment to forces to defend country; lack of workers means large need to attract Chinese and Filipino workers; reduced supply of workers leads to large MNCs like Sony having to increase in rates of pay/may reduce likelihood of future investment; under-use of services for young leads to inefficiency/closure of schools etc.) [7]

	Including education in building skills (dev);		
	And provision of low cost building materials (dev); building of schools;		
	building of clinics/hospitals;		
	provide free education for street children;		
	provide employment with specific examples;		
	supply electricity;		
	5 @ 1 mark or development		[5]
	els marking		

(e.g. traffic congestion, loss of farmland, atmospheric pollution)

Level 2 (4–6 marks)

Uses named example

More developed statements on problems which occur in rural-urban fringe.

(e.g. traffic congestion as many people who live in new developments commute to work in CBD, loss of farmland due to new housing developments/road construction, atmospheric pollution from increased traffic etc.)

(NB MAX 5 with no named example)

Level 3 (7 marks)

Uses named example (e.g. Nottingham).

Comprehensive and accurate statements including some place specific reference.

(e.g. traffic congestion on radial roads into city as many people who live in villages like Burton Joyce commute to work in the city, loss of farmland around Papplewick village due to new housing developments, atmospheric pollution from increased traffic along A60 etc.) [7]

Page 6 Mark Scheme: Teachers' version Syllabus a) (i) Cliff 1 0460 1 mark (ii) Corrasion (Abrasion) = wearing of rock by rocks/pebbles being thrown/rubs against i waves/sandpaper effect. Corrosion = chemical solution of rocks by sea water. 2 @ 1 mark (iii) I deas such as; Ciff may be undercut/notch forms; As further erosion takes place at base; Wave cut platform may form; upper part may collapse; form cave/arch; cliff retreat; etc. 3 @ 1 mark (iv) I deas such as: By constructive waves; Powerful swash moves material up beach; Weak backwash does not get chance/have energy to remove it; (Or swash is stronger than backwash = 1) Therefore beach material builds up over time/deposition of eroded materials; Larger material carried further up beach; Longshore drift; Zig zag movement of materials/jrevailing winds move material at an angle; Gentle slope reduces speed – causes sedimentation; Deposition in sheltered bays/refraction – Max 1 4 @ 1 mark 4 @ 1 mark (ii) I deas such as; plants; Fish or examples/turtles; high biodiversity/lots of variety of species/diversity; colourful; etc. 3 @ 1 mark 3 @ 1 mark 10 deas such as: F	nge 6		Syllabus Syllabus
 2 @ 1 mark (iii) Ideas such as; Cliff may be undercut/notch forms; As further erosion takes place at base; Wave cut platform may form; upper part may collapse; form cave/arch; cliff retreat; etc. 3 @ 1 mark (iv) Ideas such as: By constructive waves; Powerful swash moves material up beach; Weak backwash does not get chance/have energy to remove it; (Or swash is stronger than backwash = 1) Therefore beach material builds up over time/deposition of eroded materials; Larger material carried further up beach; Longshore drift; Zig zag movement of materials/prevailing winds move material at an angle; Gentie slope reduces speed – causes sedimentation; Deposition in sheltered bays/refraction – Max 1 4 @ 1 mark b) (i) Ideas such as; plants; fish or examples/turtles; high biodiversity/lots of variety of species/diversity; colourful; etc. 3 @ 1 mark (ii) Ideas such as: Fringing reef attached to coast; Barrier reef is offshore/separated from coast by a lagoon; 		IGCSE – May/June 2012	0460 23

Page 7	Mark Scheme: Teachers' version	Syllabus	S.
	IGCSE – May/June 2012	0460	No.

(c) Levels marking

Level 1 (1–3 marks)

Cambridge.com Statements including limited detail describing conditions which have led to coral r formation and development.

(e.g. warm water, shallow water, unpolluted/plentiful supply of oxygen etc.)

Level 2 (4–6 marks)

Uses named example

More developed statements describing conditions which have led to coral reef formation.

(e.g. Warm water/seas with temperatures above (20 °C), shallow water not more than 60 metres deep, water free from sediment so it is clear/sunlight can pass through, unpolluted so there is a plentiful supply of oxygen in water etc.)

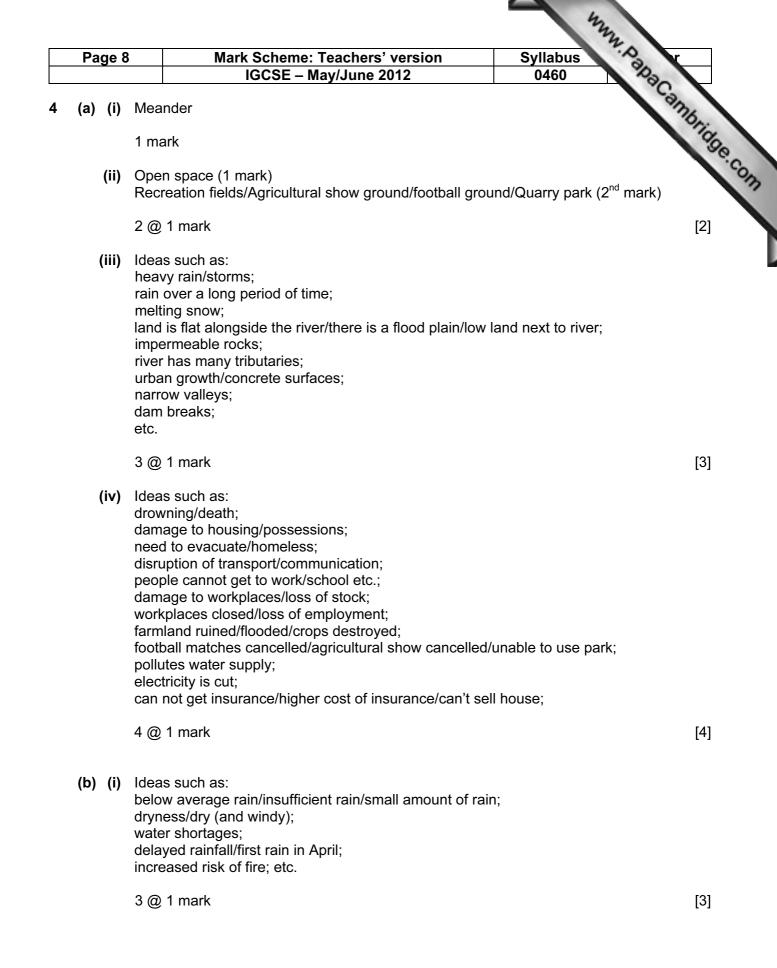

(NB MAX 5 marks if no named example)

Level 3 (7 marks)

Uses named example (e.g. Seychelles).

Comprehensive and accurate statements, describing conditions which have led to coral reef formation, including some place specific reference.

(e.g. Indian Ocean shores have temperatures above 20 °C, Beau Vallon Bay has shallow water at a depth of 10 metres, water free from sediment so is clear/sunlight can pass through, Vallon Bay is unpolluted as it is not industrialised so there is a plentiful supply of oxygen in water etc.) [7]

not the live the ins the peo inc as inc far	as such as: enough drinking water/low water supply; refore dehydration (dev); stock did not have enough water/food; refore death of livestock; ufficient water for growth of crops; refore low yields; ople die from lack of food; ome reduced; less crops/animals sold (dev); reased risk of fires; mers lose soil; soil is loose/blown away by wind/made infertile (dev);	Syllabus 0460 BbaCambridge

5 @ 1 mark or development

[5]

(c) Levels marking

Level 1 (1–3 marks)

Statements including limited detail explaining why weathering is more rapid in humid tropical regions than in temperate regions

(e.g. temperatures are hotter, there is more rainfall, more plants grow etc.)

Level 2 (4–6 marks)

More developed statements explaining why weathering is more rapid in humid tropical regions than in temperate regions.

(e.g. tropical regions have higher temperatures/more rainfall which encourages more chemical weathering, there is more biological weathering; as there is far more plant growth)

Level 3 (7 marks)

Comprehensive and accurate statements explaining why weathering is more rapid in humid tropical regions than in temperate regions including some process specific reference.

(e.g. tropical regions have higher temperatures/more rainfall which encourages more chemical weathering such as carbonation/oxidation, Chemical weathering doubles with every rise of 10 °C; there is more biological weathering as there is far more plant growth thus more likelihood of tree roots in cracks, higher temperatures and rainfall cause more rapid release of CO₂ from decay of plants etc.) [7]

5 @ 1 mark or development

[5]

(c) Levels marking

Level 1 (1–3 marks)

Statements including limited detail which briefly describe physical and/or human factors which have encouraged growth of tourist industry.

(e.g. hot weather, sunny, low rainfall, nice scenery, beaches, local culture, easy to get to, waterfront restaurants/bars etc.)

Level 2 (4–6 marks)

Uses named example.

More developed statements which explain how physical and/or human factors have encouraged growth of tourist industry.

(e.g. long hours of sunshine enable people to sunbathe, high temperatures during summer months encourage tourists from colder climates, low rainfall so tourists can go on the beach, clean blue seas so can do water sports, waterfront restaurants/bars for evening entertainment, attractive headlands with cliffs so people can enjoy a picturesque environment, sheltered sandy bays ideal for sunbathing, ease of access via good roads and airport etc.)

(NB MAX 5 marks if no named example)

Level 3 (7 marks)

Uses named example (e.g. Algarve).

Comprehensive and accurate statements, statements which explain how physical and human factors have encouraged growth of tourist industry.

(e.g. long hours of sunshine especially from June to September enable people to sunbathe, average temperatures of over 20 °C during summer months encourage tourists from colder climates, low rainfall between April and October so tourists can go on the beach, clean blue seas so can do water sports, waterfront restaurants/bars in resorts like Albufeira for evening entertainment, attractive headlands with cliffs near Lagos so people can enjoy a picturesque environment, sheltered sandy bays ideal for sunbathing, ease of access via good roads and Faro airport)

(c) Levels marking

Level 1 (1–3 marks)

Statements including limited detail describing or explaining the land use. (e.g. good soil, cereal crops grown, flat land, large expanse of land, climate not too hot/wet)

Level 2 (4–6 marks)

Uses named example

More developed statements explaining land use.

(e.g. deep, fertile soils encourage growth of cereals, large expanse of flat land to grow wide variety of cereals such as wheat, oats etc. able to use large machinery for harvesting, below zero temperatures in winter break up soil to allow ease of ploughing)

(NB No named example MAX 5 marks)

5 @ 1 mark or development

Level 3 (7 marks)

Uses named example (e.g. Large scale cereal growing in Canadian Prairies).

Comprehensive and accurate statements including correct reference to a named area and physical and human factors.

(e.g. wheat farming in the Canadian Prairies because of deep, fertile Chernozem soils, large expanse of flat land to grow wide variety of cereals such as wheat, oats etc. able to use large machinery for harvesting, below zero temperatures in winter break up soil to allow ease of ploughing, good railway link to Great Lakes allowing export of cereal crops).
