

## **MARK SCHEME for the May/June 2013 series**

### **0470 HISTORY**

**0470/42**

Paper 4, (Alternative to Coursework),  
maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Level 2 – Agrees OR disagrees, supported from the source e.g.

Yes: They were crowded so acceptable in some ways. Companies tried to improve comfort but profits fell when attempted etc.

No: The companies acquired unflattering nicknames which reflected their service; it was competition that kept the prices down etc. [3–5]

Level 3 – Agrees AND disagrees, supported from the source. Addresses the issue of 'How far?' [6–7]

**(iii)** Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Useful/not useful – Choice made on the basis that one is more detailed/gives more information, but does not specify what information. [1]

Level 2 – Useful/not useful – One source is a sketch and the other is from a recent book so they could both be biased/unreliable. [2]

Level 3 – Choice made on the nature or amount of information given. Must specify what information. [3–5]

Level 4 – Choice made on grounds of reliability.

Discussion of utility must be made on valid evaluation of source(s) in context. Include at this Level answers that cross reference between A and B to show reliability.

6 marks for one source, 7 marks for both. [6–7]

**(b) (i)** Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – One mark for each valid example to a maximum of two e.g. George and Robert Stephenson, Brunel, Thomas Brassey. [1–2]

**(ii)** Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Identifies problems e.g. Safety, comfort, reliability. [1–2]

Level 2 – Describes problems. Award an extra mark for each problem described in additional detail e.g. Open carriages at first so a safety risk, also open to the elements; not always cheap to travel so danger to one's pocket; unreliability of new technology, accidents and break downs; many rail companies, so a long journey involved many tickets, changes and delays etc. [2–4]

**(iii)** Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Single reason. One for the reason, one for the explanation. [1–2]

Level 2 – Multiple reasons. One for each reason, one for each reason explained e.g. Demand from industry and public; speculators believed good profits could be made so a frenzy of line building; improvements in rolling stock and engines increased demand; ready availability of building materials and cheap labour (mainly Irish) etc. [2–6]

**(iv)** Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Simple assertions, e.g. Yes, it was very popular. [1]

Level 2 – Explanation of railways OR other factors, single reason given e.g.

Railways: It enabled goods to be transported more widely, quickly and cheaply; the building of the railways boosted other industries like coal and iron/steel; enabled workers to travel to work from outskirts to factories etc.

Other factors: Industry was growing rapidly before railways – the canals had been an effective form of transport for some industries; factors of the developments in industries like iron, steel and textiles meant there was growth anyway – but the railways encouraged the growth etc. [2]

Level 3 – Explanation of railways OR other factors with multiple factors. Allow single factors with multiple reasons.

Undeveloped suggestions on BOTH sides of the argument. (annotate BBB – Balanced but Brief). [3–5]

Level 4 – Answers that offer a balanced argument.

BOTH sides of railways AND other factors must be addressed. [6–8]

### Depth Study H: The Impact of Western Imperialism in the Twentieth Century

(a) (i) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Repeats material stated in the source, no inference made. [1–2]

Level 2 – Makes valid inference(s), unsupported from the source e.g. Very humble; wish to have British rule; simple and naïve assumptions; show deference etc. [3–4]

Level 3 – Supports valid inferences with reference to the source e.g. Simple and naïve language of the ‘nice letter’ (English grammar?); do not take offence when replies do not arrive; admire the law and peace in British administered areas; believe British rule will help avoid violence and idol worship etc [5–6]

(ii) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Agrees OR disagrees, unsupported from the source. [1–2]

Level 2 – Agrees OR disagrees, supported from the source e.g.

Yes: Worried about French activity and offers plans to diminish French influence; almost frenetically lists French expansion and development. Sees it as natural to wish to counter French activity etc.

No: Almost arrogant view that Britain has a right to be in charge; action is forced on us; the main worry is to protect trade from any threat, not just the French (Brazza in the Congo) etc. [3–5]

Level 3 – Agrees AND disagrees, supported from the source. Addresses the issue of ‘How far?’ [6–7]

(iii) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Useful/not useful – Choice made on the basis that one is more detailed/gives more information, but does not specify what information. [1]

Level 2 – Useful/not useful – One source is from Oil River kings and the other is from a British diplomat so they could both be biased/unreliable. [2]

Level 3 – Choice made on the nature or amount of information given. Must specify what information. [3–5]

Level 4 – Choice made on grounds of reliability.

Discussion of utility must be made on valid evaluation of source(s) in context. Include at this Level answers that cross reference between A and B to show reliability.

6 marks for one source, 7 marks for both. [6–7]

(b) (i) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – One mark for each valid example to a maximum of two e.g. Gold Coast, Gambia, Ivory Coast, Sierra Leone. [1–2]

(ii) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Identifies term e.g. Trade (business) exploits conquest etc. [1–2]

Level 2 – Describes term. Award an extra mark for each valid aspect described in additional detail e.g. Whenever Crown forces are used to take control of areas, trade and business will follow to exploit raw materials and markets. Accept the view that the flag follows trade – Crown feels obliged to protect British interests if trade is threatened etc. [2–4]

(iii) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Single reason. One for the reason, one for the explanation. [1–2]

Level 2 – Multiple reasons. One for each reason, one for each reason explained e.g. Germany did not become a single country until 1871; it was more occupied by problems in Europe and establishing itself as a new state; Britain had a long imperial tradition going back centuries; Britain had a huge navy to protect her colonies; Britain's wealth from the industrial revolution etc. [2–6]

(iv) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Simple assertions, e.g. No, Europeans had no right to take other countries' lands. [1]

Level 2 – Explanation of justified OR not justified, single factor given e.g.

Justified: In the sense that there was a desire to gain land for prestige, trade, resources, Christianity, there was a scramble, and in cases there was no real connection between the occupiers and the occupied; locals had no say in the scramble etc

Not justified: If European countries were going to take territories it would be better to agree upon the process – Berlin Conference – with large territories like Congo being agreed to go to Belgium. Much of Africa had already been 'taken' by older colonial countries like Britain, France and Portugal, so little was left to take by new countries like Germany and Italy. Accept challenges that say it was not a scramble because too little land left to scramble over etc. [2]

Level 3 – Explanation of justified OR not justified with multiple factors. Allow single factors with multiple reasons.
