Paper 4 Alternative to Coursework

May/June 2024**MARK SCHEME**

Maximum Mark: 40

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2024 series for most Cambridge IGCSE, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **18** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Guidance on using levels-based mark schemes

Marking of work should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The marker should look at the work and then make a judgement about which level statement is the 'best fit'. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a 'best-fit' level statement has been identified, use the following guidance to decide on a specific mark:

- Where the candidate's work **convincingly** meets the level statement, you should award the highest mark.
- Where the candidate's work **adequately** meets the level statement, you should award the most appropriate mark in the middle of the range.
- Where the candidate's work **just** meets the level statement, you should award the lowest mark.

Assessment objectives**AO1**

An ability to recall, select, organise and deploy knowledge of the syllabus content.

AO2

An ability to construct historical explanations using an understanding of:

- cause and consequence, change and continuity, similarity and difference
- the motives, emotions, intentions and beliefs of people in the past.

Table A

Use this table to give marks for each candidate response for AO1 for **part (a)** of each question.

Level	Description	Marks
3	Account includes the main events/developments and directly addresses the question. Account is consistently supported by accurate historical knowledge. Account is logically sequenced.	11–15
2	Account describes some events/developments relevant to the question. Account is mostly supported by accurate historical knowledge. Account is structured in its approach.	6–10
1	Response has limited relevance to the question. Response includes some accurate historical knowledge. Points made are generally unconnected.	1–5
0	No creditable material.	0

Table B

Use this table to give marks for each candidate response for AO2 for **part (b)** of each question.

Level	Description	Marks
5	An answer that presents more than one facet of the discussion. Uses well supported explanations in support of more than one facet of the discussion. Reaches a clear, convincing and substantiated judgement on relative importance.	21–25
4	An answer that presents more than one facet of the discussion. Explanations are used to support the facets presented. May attempt a judgement, which is partially supported.	16–20
3	An answer that presents one or more facets of the discussion. Explanation(s) are used to support only one of the facets presented. May attempt a judgement, which is unsupported.	11–15
2	An answer that attempts to address one or more facets but only using assertion. May include relevant comments linked to a facet but these will be undeveloped or implicit. May attempt a generalised judgement, which is mostly asserted.	6–10
1	An answer that presents general knowledge of the topic. Describes or identifies some points with limited focus. No attempt at judgement or where an attempt has been made, it is very general and undeveloped.	1–5
0	No creditable material.	0
