4. Nov/2020/Paper_12/No.2

A website can have three web development layers.

Tick $(\ensuremath{\checkmark})$ whether the following statements refer to the **behaviour** layer, **content** layer or **presentation** layer.

| | behaviour (√) | content (√) | presentation (✓) |
|--|------------------|----------------|------------------|
| This layer is used to display and format elements within the web page | | | |
| This layer includes the hyperlinks to navigate around the website | | | |
| This layer is used to enter scripting language to elements within a web page | | | |
| This layer is used to create the structure of a web page | | 00 | |
