MARK SCHEME for the March 2016 series

0417 INFORMATION AND COMMUNICATION TECHNOLOGY

0417/12

Paper 1 (Written Paper), maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the March 2016 series for most Cambridge IGCSE[®] and Cambridge International A and AS Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

Page 2	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – March 2016	0417	12
1 (a)	PC/desktop		[1]
(b)	Laptop		[1]
(c)	Tablet		[1]
(d)	Smartphone		[1]

2

	CLI (✓)	GUI (✓)
Instructions have to be typed.	\checkmark	
Applications are represented by icons.		\checkmark
Options are chosen from a menu.		\checkmark
Many instructions have to be memorised.	\checkmark	

4 correct answers – 2 marks

2 or 3 correct answers – 1 mark

1 correct – 0 marks

3

	TRUE (✓)	FALSE (✓)
A multimedia projector is used to output slide shows.	\checkmark	
A laser printer is a type of page printer.	\checkmark	
An inkjet printer cartridge lasts longer than a laser printer toner cartridge producing the same output.		V
A dot matrix printer produces very high quality printouts quickly.		\checkmark

4 correct answers – 2 marks

2 or 3 correct answers – 1 mark

1 correct – 0 marks

-	uge e	Cambridge IGCSE – March 2016	0417	12
4	(a) jo	bb sharing		[1]
	(b) <u>p</u>	<u>part-time</u> working		[1]
	(c) v	vorking <u>flexible hours</u>		[1]
	(d) v	vorking <u>compressed hours</u>		[1]
5	Any f	our from:		
		how to block and report unwanted users,		
		r arrange to meet anyone alone ys tell an adult first when arranging to meet someone		
		ys meet in a public place		
		l inappropriate disclosure of personal data/set privacy settings/Avoid g	iving email a	address or
		e number when chatting	-	
		I inappropriate disclosure of your own name/Avoid giving your full nam	е	
		l giving your address		
		l giving your school name I displaying a picture in school uniform		
		ot display pictures taken at home/Do not display pictures taken of the s	chool with t	he name
		ned/Do not send pictures/videos of yourself to strangers		
		re that the person you are befriending has very secure privacy settings	5	
		k profiles before contacting people		
	Verify	person's contact details with other trusted people/friends		[4]
6	<u>Good</u>	example of a strong password – (1 mark)		
	<u>Good</u>	example of a weak password – (1 mark)		
	Any t	wo from:		
	Weak digit	a password is easy to guess/strong password is difficult to guess a passwords consist of all letters or all digits or all digits with one letter/	all letters w	ith one
		password is one that has few characters		
		g password uses mixture of upper case letters, digits and punctuation password has repeated characters	marks	
		password has characters payt to each other on a OWERTY keyboars	ı	

Weak password has characters next to each other on a QWERTY keyboard

Weak passwords are ones that are similar to the user name

Weak passwords are passwords that relate to the user

Pa	age 5		Syllabus	Paper
		Cambridge IGCSE – March 2016	0417	12
10	(a)	Any three from:		
		Name Passport number Date of birth Place of birth Nationality Issue date Expiry date Facial characteristics/photograph/fingerprint/retina scan Biometric measurements (face) Signature Gender Place of issue		[3]
	(b)	Any three from: The chip is presented near a computer with a radio-frequency scanner The scanning antenna puts out radio-frequency signals in a relatively s It provides a means of communicating with the transponder/the RFID to The scanning device provides energy so that the chips can broadcast the information in them for the computer to read.	hort range.	[3]
	(c)	Any two from:		
	. /	More secure than a traditional passport as biometric measurement dat Counterfeits can be more easily identified than non-RFID passports More rapid flow at security check points/quicker than reading it manual		forge [2]
11	(a)	Appropriate spacing for each field (1 mark) Forward/backward buttons/save (submit) - must have at least two navi Candidate attempts for information to fill the page AND is clearly a scre All six of the given fields – 3 marks		
		Five of the given fields – 2 marks Four of the given fields – 1 mark Each additional field other than those given minus 1 mark, to a mark of	f zero of field	ds [6]
	(b)	(i) format/picture check must consist of one letter, three digits, space, three letters		[2]
		(ii) range check must be >=140 and <=180		[2]
	(c)	Engine_size > 1.4 OR Parking_sensors = "Y"		
		1 mark for Engine_size 1 mark for > 1.4 1 mark for Parking, concern		
		1 mark for Parking_sensors 1 mark for = "Y" 1 mark for OR		[5]

Pa	ige 6	Mark Scheme	Syllabus	Paper
		Cambridge IGCSE – March 2016	0417	12
	(d)	K674 TUV R123 AZN U283 BBV K943 SCG 2 marks is all four registrations are shown and correct. 1 mark if all five registrations shown		[2]
12	(a)	B4*C4		[1]
	(b)	=\$B\$1*D4 or =D4*\$B\$1 or =B\$1*D4 or =D4*B\$1		
		1 mark for B1 1 mark for correct absolute referencing B\$1 or \$B\$1 1 mark for *D4 or D4* Minus 1 mark per incorrect or added operator		[3]
	(c)	Any three from:		
		When formulae are replicated/copied/dragged down/fill down some cell references must remain unchanged If it wasn't used when the formula in E4 was replicated down it would m These cells are either blank or contain values not equal to 25%/need to		2, B3 etc. [3]
	(d)	SUM(F4:F8)		[1]
13	(a)	Any two from: HyperText Transfer Protocol HTTP is a communication protocol used on the internet to allow commu computers (devices) HTTP is an application protocol/set of rules HTTP is the foundation of data communication for the World Wide Web		tween two [2]
	(b)	Any two from: HTTP is not secure/HTTPS is secure uses SSL/HTTP does not use SSL HTTPS transmits data over the internet in an encrypted form/HTTP tran internet in an unencrypted form HTTPS requires additional processing power in its servers which could responses		

Page 7	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – March 2016	0417	12

14 Any **four** from:

Computer might be infected with spyware detecting key presses which slows down data transfer speeds over the internet

Computer might be infected with viruses taking up memory and limiting bandwidth. If the computer's memory is close to full, data transfer speed over the internet can slow down considerably

The search might be too general giving irrelevant information as well as relevant information Search providers add targeted marketing adverts from companies to the search results/ your search results are gathered to target further marketing/advertising

15 .txt is a text (file) used by a variety of text editors (1 mark)

.rtf is rich text (format) for a rich text file that is readable by most word processing software (1 mark)

Any three from:

RTF has many more features than TXT. RTF is capable of basic font formatting while TXT isn't. RTF is capable of paragraph formatting while TXT isn't. RTF is capable of creating bulleted lists while TXT isn't. RTF files can include images while TXT cannot. .TXT takes up less memory

16 Any five from:

	Change the font type to make it more informal/appealing Change the font size bigger Simplify the language Make the heading centred Make the font size for the heading larger than the body text Add interesting/relevant images Bold/underline/highlight/italicised keywords Bold/underline/highlight headings Line spacing after paragraphs/in paragraphs Colour text to emphasise keywords/headings Change the existing border to a more interesting/relevant border	[5]
17	Stage 1 reflected through the Y axis (1 mark)Stage 2 rotated through 90° (clockwise) about the origin (1 mark)	

Stage 3 reflected about the Y axis (1 mark) Filled with black colour (1 mark)

[4]

[4]

[5]

Page 8	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – March 2016	0417	12

18 Any **four** from:

When you want to apply different formatting in the same page without disrupting the formatting of the whole page.

When you want to use columns in a page, and have different amounts of columns on the same page.

When you want to use a heading across the whole page but the text below is in several columns. When you don't want headers on pages with a title, but you do want them on other pages. If you didn't have them, each page would have the same header.

To enable page orientation to change between 2 pages.

[4]

[8]

19 To be marked as a level of response:

Level 3 (7–8 marks)

Candidates will address both aspects of the statement and discuss/consider greater security but also possible lack of security.

The issues raised will be justified. There must be a reasoned conclusion.

The information will be relevant, clear, organised and presented in a structured and coherent format.

Level 2 (4–6 marks)

Candidates will address both aspects of the statement and discuss/consider greater security but also possible lack of security although development of some of the points will be limited to one side of the argument.

There may be a conclusion.

For the most part the information will be relevant and presented in a structured and coherent format.

Level 1 (1–3 marks)

Candidates may only address one aspect of the statement or give reasons why there is greater security but also possible lack of security

Answers may be simplistic with little relevance.

Level 0 (0 marks)

Response with no valid content

Examples of more secure:

Data more difficult to copy

Larger amount of information can be stored

Disabled people find it easier than signing

Reduces disputes at checkouts over validity of signature/Saves time at checkouts Not affected by magnetic fields

Even when the card is stolen, the thief still needs the PIN, so it is much safer

Magnetic stripe reader had to be in a fixed location.

If the transaction did not take place near a terminal (in a restaurant, for example) the card had to be taken away from the customer to the card machine.

It was easily possible for a dishonest employee to swipe the card surreptitiously through a cheap machine...

...which would take a couple of seconds to record the information on the card and stripe Even at the terminal, the criminal could bend down in front of the customer and swipe the card on a hidden reader.

Illegal cloning of cards easy, and a common occurrence.

only the magnetic stripe can be copied, and a copied card cannot be used on a PIN terminal

Page 9	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – March 2016	0417	12

The introduction of chip and PIN coincided with wireless data communications technology becoming inexpensive and widespread

Wireless PIN pads were introduced that could be brought to the customer and used without the card ever being out of sight

However, this would have been possible, had the technology been available, with magnetic stripe cards

Chip and PIN and wireless together reduce the risk of cloning of cards by brief swiping.

Examples of not always secure because:

Cards can still be cloned

People can be careless when using their PIN.

Credit and debit card fraud has gone down with chip and pin

ATM fraud has gone up.

Hidden cameras sometimes are used to see which keys are pressed for the PIN.

The advent of chip and pin has also generated a rise in phishing
