CANDIDATE	JNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINA nternational General Certificate of Secondary Education	TIONS
NAME CENTRE NUMBER	CANDIDATE NUMBER	E
CAMBRIDGE IN	TERNATIONAL MATHEMATICS	0607/06
Paper 6 (Extende	ed) (	October/November 2011
		1 hour 30 minutes
Candidates ansv	ver on the Question Paper	
Additional Materi	als: Graphics Calculator	

# **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

∞

662046

6 2

Do not use staples, paper clips, highlighters, glue or correction fluid.

You may use a pencil for any diagrams or graphs.

DO NOT WRITE IN ANY BARCODES.

Answer both parts **A** and **B**.

You must show all relevant working to gain full marks for correct methods, including sketches.

# In this paper you will also be assessed on your ability to provide full reasons and communicate your mathematics clearly and precisely.

At the end of the examination, fasten all your work securely together. The total number of marks for this paper is 40.

This document consists of **12** printed pages.

#### Answer both parts A and B.

www.papaCambridge.com

# A INVESTIGATION MAXIMISING THE PERIMETER (20 marks)

Identical shapes can be joined to make larger shapes.

1 Equilateral triangles of side 1 cm may be joined edge to edge, for example

but **not** like this.

(a) The diagram below shows a shape made of 4 equilateral triangles and a shape made of 5 equilateral triangles.

Draw a different shape made of 4 equilateral triangles and a different shape made of 5 equilateral triangles.

•	•	. 🗸	$\wedge$	$\overline{\ }$	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•

(b) (i) The diagram below shows a shape, made of 6 equilateral triangles, with a perimeter of 6 cm.

Draw a different shape, made of 6 equilateral triangles, with a perimeter greater than 6 cm.

	3 The diagram below shows a shape, made of 7 equilateral triangles, with a particulation of 7 cm. Draw a different shape, made of 7 equilateral triangles, with a perimeter greater than 7 cm.
(ii)	The diagram below shows a shape, made of 7 equilateral triangles, with a performance of 7 cm.
	Draw a different shape, made of 7 equilateral triangles, with a perimeter greater than 7 cm.

(b) (i) Complete this table.

Number of squares	2	3	4	5	6	7	8	9	10
Greatest perimeter (cm)	6			12					22

(ii) Write down the greatest perimeter for a shape made of 17 squares.

(iii) How many squares make the shape when the greatest perimeter is 32 cm?

.....

(c) Write down an expression, in terms of x, for the greatest perimeter for a shape made of x squares.

.....

www.papacambridge.com (a) This table shows the greatest perimeters for shapes made of regular hexagons of side 1 ch 3 Complete the table.

Number of regular hexagons	2	3	4	5	6
Greatest perimeter (cm)					26

- (b) Write down an expression, in terms of x, for the greatest perimeter for a shape made of *x* regular hexagons.
- Find an expression, in terms of *x*, for the greatest perimeter for a shape made of *x* regular octagons. 4

.....

- www.papacambridge.com (a) Write down an expression, in terms of x and y, for the greatest perimeter for a shape 5 of x regular polygons each with y sides.
  - (b) The greatest perimeter for a shape made of x regular polygons, each with y sides is 26 cm. Find three possible pairs of values of *x* and *y*.

<i>x</i> =	 <i>y</i> =	
<i>x</i> =	 <i>y</i> =	
x =	 <i>y</i> =	

### **B** MODELLING

## **COVERING CAKES (20 marks)**

www.papacambridge.com

Different shaped cakes are made each with a volume of  $4000 \text{ cm}^3$ . The top and sides of each cake are covered in chocolate.

1 A square-based cake measures x cm by x cm by y cm, as shown in the diagram.

(b) The area covered in chocolate is  $S \text{ cm}^2$ . By finding an expression for S in terms of x and y show that  $S = x^2 + \frac{16000}{x}$ .

www.papacambridge.com A circular-based (cylindrical) cake has a radius of x cm and a height of y cm. The area to be covered in chocolate is  $S \text{ cm}^2$  and the volume of the cake is 4000 cm<sup>3</sup>. 2

.

(a) Show that 
$$S = \pi x^2 + \frac{8000}{x}$$

(b) Sketch the graph of *S* against *x* for  $1 \le x \le 20$  and  $0 \le S \le 10000$  on the axes below.

Question 4 is printed on the next page

4 For a cake with **minimum** surface area, bakers use the following rule:

There is twice as much chocolate on the sides as on the top.

www.papacambridge.com

Test this rule on both cakes. Show your working.
