	CAMBRIDGE IN	NTERNATIONAL MATHEMATICS	0607/43					
3	Paper 4 (Extend	ded)	May/June 2013					
4			2 hours 15 minutes					
5 2	Candidates answ	Candidates answer on the Question Paper.						
0 0 4 *	Additional Mater	rials: Geometrical Instruments Graphics Calculator						

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

Do not use staples, paper clips, highlighters, glue or correction fluid.

You may use a pencil for any diagrams or graphs.

DO NOT WRITE IN ANY BARCODES.

Answer all the questions.

Unless instructed otherwise, give your answers exactly or correct to three significant figures as appropriate. Answers in degrees should be given to one decimal place.

For π , use your calculator value.

You must show all the relevant working to gain full marks and you will be given marks for correct methods, including sketches, even if your answer is incorrect.

The number of marks is given in brackets [] at the end of each question or part question. The total number of marks for this paper is 120.

This document consists of **20** printed pages.

Formula List

For the equation	$ax^2 + bx + c = 0$	$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$
Curved surface area, A, of cylin	nder of radius <i>r</i> , height <i>h</i> .	$A = 2\pi rh$
Curved surface area, A, of cone	e of radius r, sloping edge l.	$A = \pi r l$
Curved surface area, A, of sphe	ere of radius <i>r</i> .	$A = 4\pi r^2$
Volume, <i>V</i> , of pyramid, base an	rea A, height h.	$V=\frac{1}{3}Ah$
Volume, V , of cylinder of radiu	as r , height h .	$V = \pi r^2 h$
Volume, V , of cone of radius r ,	height <i>h</i> .	$V = \frac{1}{3}\pi r^2 h$
Volume, <i>V</i> , of sphere of radius	<i>г</i> .	$V = \frac{4}{3}\pi r^3$
	C	$\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$ $a^2 = b^2 + c^2 - 2bc \cos A$ $\operatorname{Area} = \frac{1}{2}bc \sin A$

Answer all the questions.					
1	y varies inversely as the square root of x. y = 16 when $x = 4$.	Examiner's Use			
	(a) Find the value of y when $x = 16$.				
	<i>Answer(a)</i> $y =$ [3] (b) Find the value of <i>x</i> when $y = 64$.				
	Answer(b) $x =$ [2] (c) Find x in terms of y.				
	Answer(c) x = [3]				

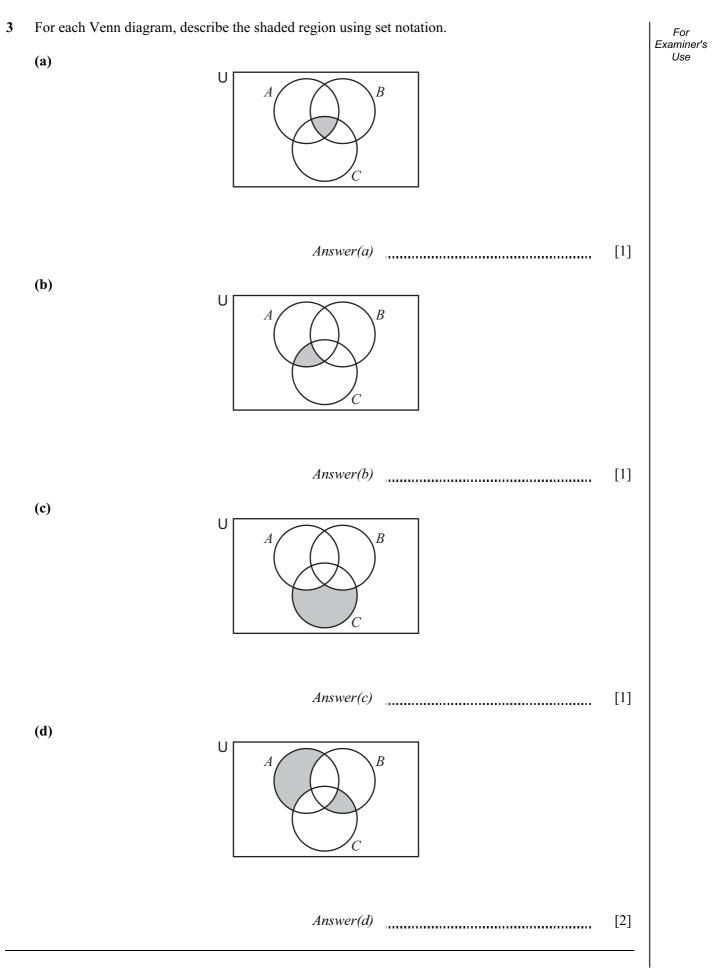

y = _____ [4]

2

(a) Solve the equation.

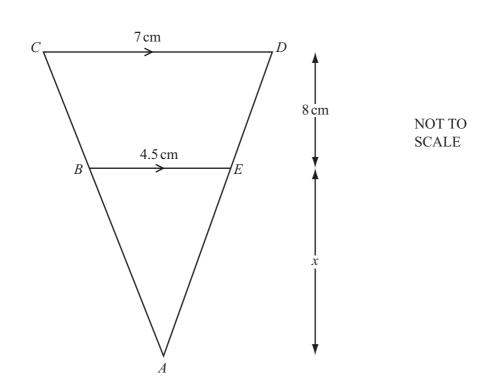

For Examiner's Use

[3]

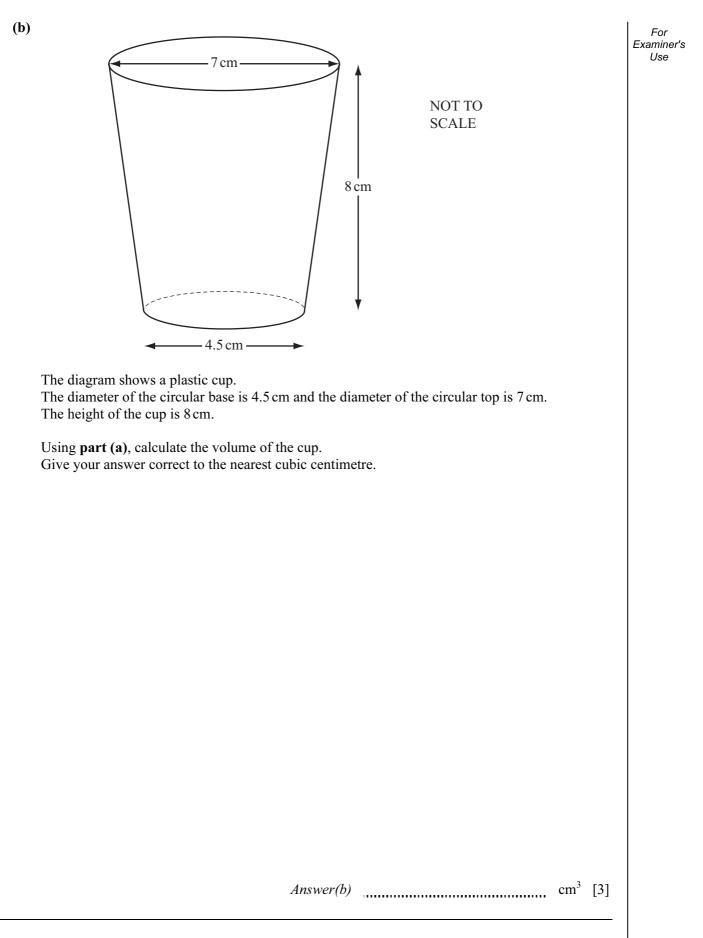

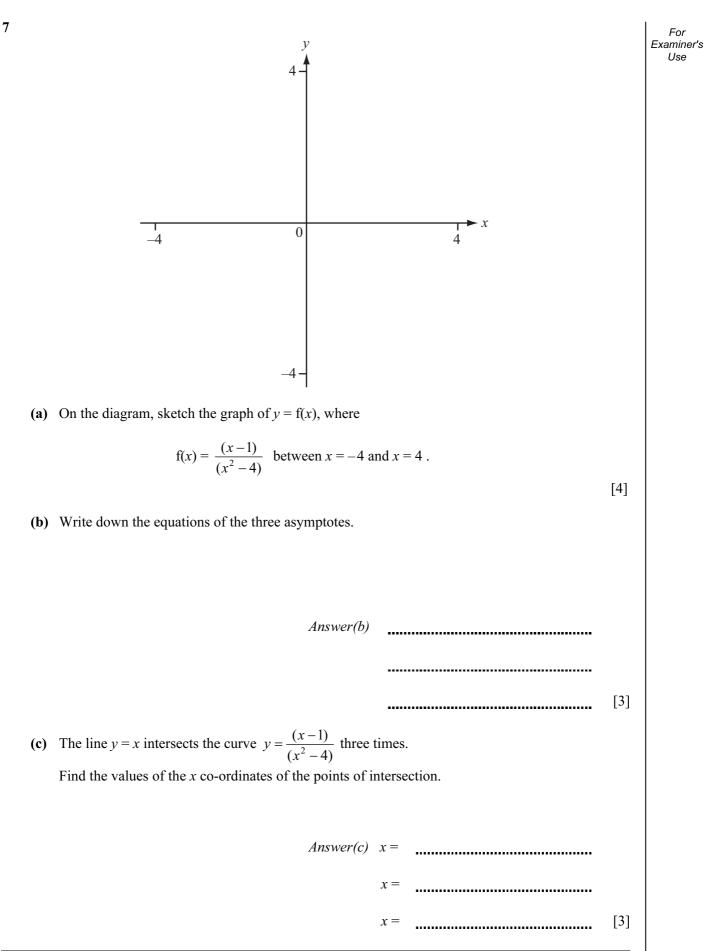

In the diagram, BE is parallel to CD. The perpendicular height between the lines BE and CD is 8 cm. The perpendicular height from the point A to the line BE is x.

Show that x = 14.4 cm.

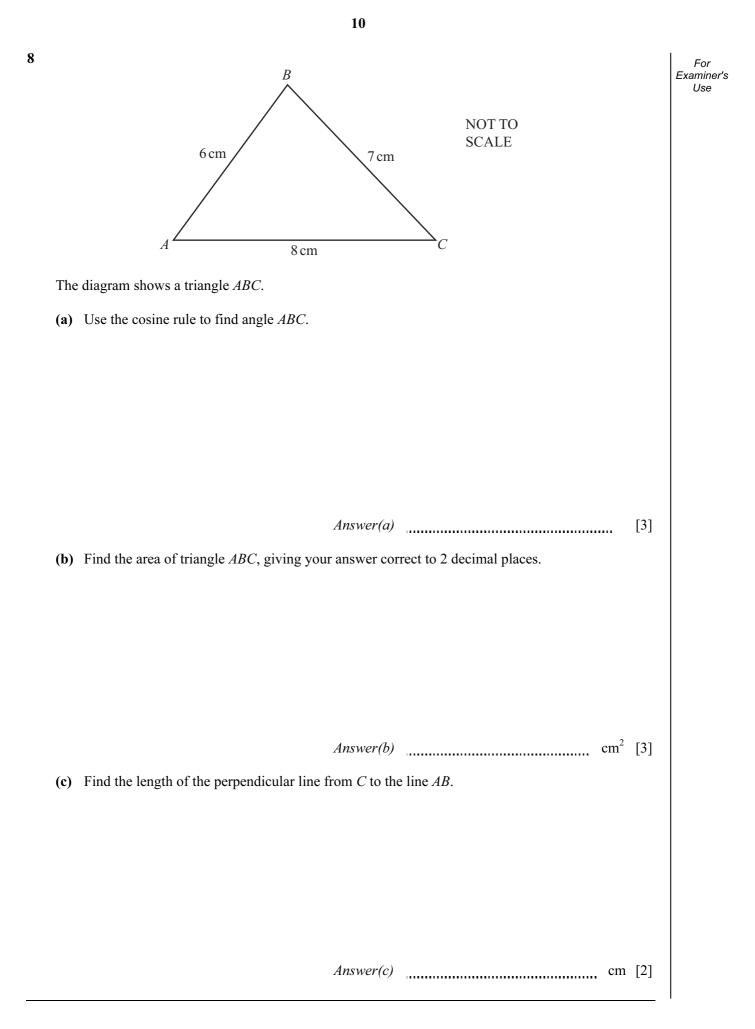

7

(a)	Solve the equation $10x^2 = 5 - x$. Give your answers correct to 2 decimal places.	For Examiner's Use
(b)	Answer(a) $x =$ or $x =$ [4] Solve the inequality $10x^2 > 5 - x$.	
	Answer(b) [2]	
The	e transformation Q is a reflection in the line $y = x$.	
(b)	Answer(a) (,, [1] Find the image of the point (6, 2) under the transformation Q.	
(c)	Answer(b) (,) [1] Describe fully the single transformation equivalent to P followed by Q.	
	Answer (c)	
	(b) The The (a) (b)	$Answer(a) x = \dots \text{ or } x = \dots \text{ [4]}$ (b) Solve the inequality $10x^2 > 5 - x$. $Answer(b) \dots \text{ [2]}$ The transformation P is a rotation of 180° about the origin. The transformation Q is a reflection in the line $y = x$. (a) Find the image of the point (6, 2) under the transformation P. $Answer(a) (\dots \dots , \dots) [1]$ (b) Find the image of the point (6, 2) under the transformation Q. $Answer(b) (\dots , \dots) [1]$ (c) Describe fully the single transformation equivalent to P followed by Q. $Answer (c) \dots \dots$

Answer(c) [3]

The British Lions squad for the 2009 tour of South Africa originally contained 40 players from

Ireland

Scotland

Wales

The playing positions, either Forward or Back, of these players is shown in the table.

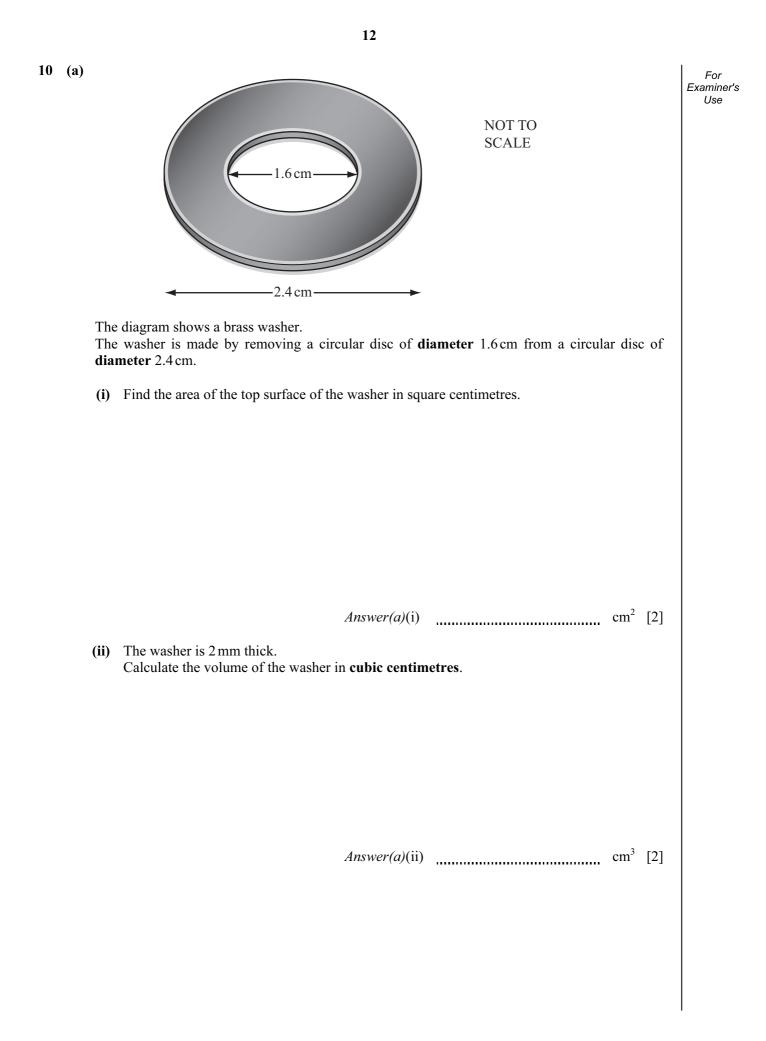

England

Forward 6 5 2 6 Back 3 9 2 7 (a) A player is selected at random from the squad to visit a local hospital. Calculate the probability that the player chosen is (i) a Forward from Ireland, Answer(a)(i) [1] (ii) not from Wales. Answer(a)(ii) [1] (b) A player is chosen at random from the Backs to give a TV interview. Calculate the probability that he is from England. Answer(b) [2] (c) Three Forwards are chosen at random to take part in a 'tug-o-war' competition. Calculate the probability they are all from Wales.

For Examiner's Use

9

England, Ireland, Scotland and Wales.

The diagram shows a globe made from brass. Globes are hollow spheres. The outside diameter of this globe is 32 cm and the inside diameter is 30 cm.

(i) Find the volume of brass used to make this globe in cubic centimetres.

Answer(b)(i) cm^3 [2]

(ii) A number of globes are to be made by melting 1 000 000 of the brass washers in part (a).

Find the maximum number of globes that can be made.

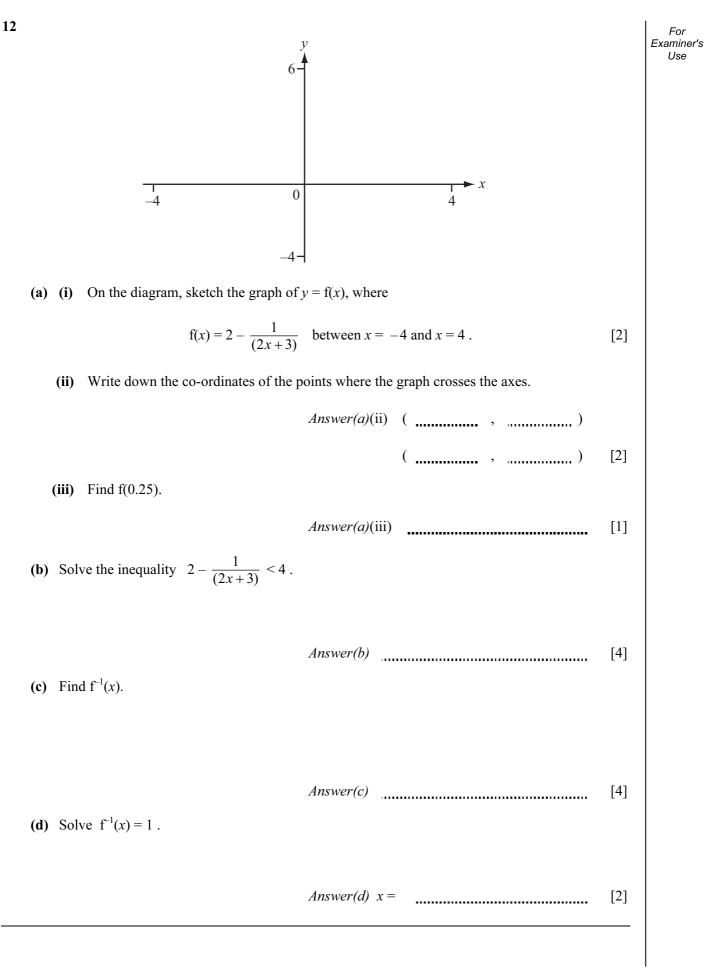

Answer(b)(ii) [3]

13 The masses of 200 tomatoes are given in the table.

Mass (<i>m</i> grams)	Frequency
$0 < m \le 20$	12
$20 < m \le 30$	34
$30 < m \le 40$	40
$40 < m \le 45$	60
$45 < m \le 50$	42
$50 < m \le 80$	12

(a) Calculate an estimate of the mean mass of a tomato. Give your answer correct to the nearest gram.

Answer(a) g [3]

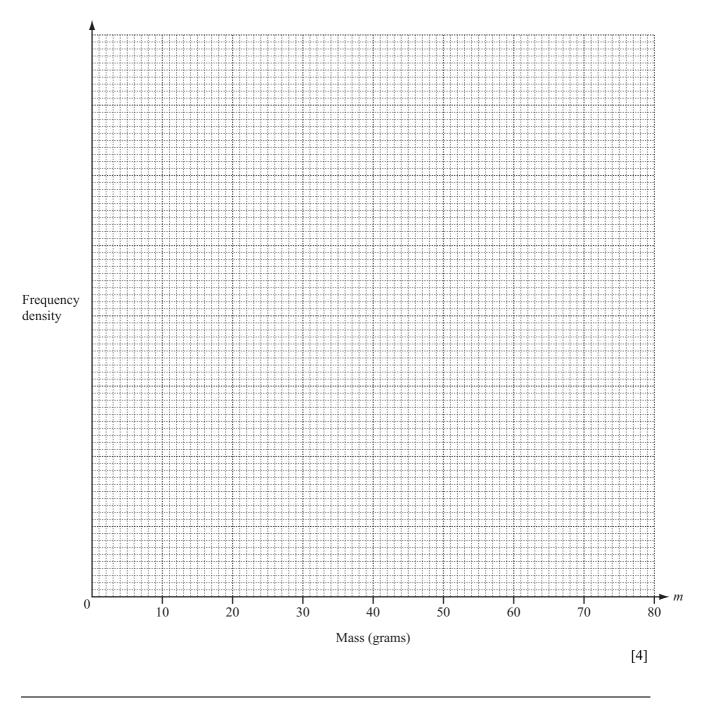

(b) (i) Complete the frequency density column in this table.

Mass (<i>m</i> grams)	Frequency	Frequency density
$0 < m \le 20$	12	
$20 < m \le 30$	34	
$30 < m \le 40$	40	
$40 < m \le 45$	60	
$45 < m \le 50$	42	
$50 < m \le 80$	12	

[2]

(ii) On the grid opposite, draw an accurate histogram to show this information. Mark a suitable scale on the frequency density axis.

For Examiner's Use

14 Zaira works at an ice-cream shop.

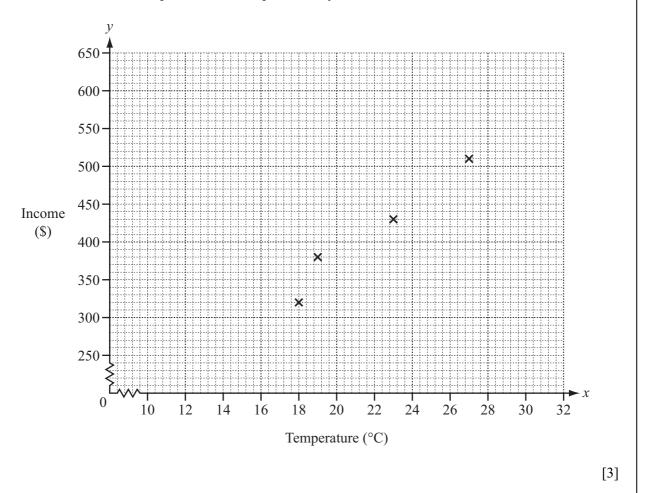

She wants to find out if there is a correlation between the maximum daily temperature, $x \,^{\circ}C$, and the shop's daily income, y.

Zaira recorded the following results.

Temperature ($x \circ C$)	23	18	27	19	25	20	22	28	17	24
Income (\$y)	430	320	510	380	510	430	450	530	310	490

(a) (i) Complete the scatter diagram.

The first four points have been plotted for you.

(ii) Describe the type of correlation between the temperature and the income.

Answer(a)(ii) [1]

18

(b) Find For Examiner's Use (i) the mean temperature, *Answer(b)*(i) °C [1] (ii) the mean income. Answer(b)(ii) \$ [1] (c) (i) Find the equation of the regression line for y in terms of x. [2] Answer(c)(i) y =(ii) Estimate the income when the temperature is 21° C. Answer(c)(ii) \$ [1] (iii) Estimate the income when the temperature is 32°C. Answer(c)(iii) \$ [1] (iv) Explain which of your answers to parts (c)(ii) and (c)(iii) is likely to be the most reliable. [2] Question 15 is printed on the next page.
