International General Certificate of Secondary Education

MARK SCHEME for the October/November 2012 series

0652 PHYSICAL SCIENCE

0652/62

Paper 6 (Alternative to Practical), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

6 (a) (i) 113.6g; [1]

(ii) 37.8g; [1]

(b) (i) 91 cm³;

(ii) 41 cm³; [1]

(c) density = mass/volume or 37.8/41; = $0.9(2) \text{ g/cm}^3 \text{ (ecf)}$; [2]

(d) hexane is not as dense as ice; hexane melts at a temperature lower than -5 °C; hexane does not dissolve/react with ice; [max 2]

(e) (i) ice floats on the surface AND the polar bears can walk on it/so that fish can live under the ice/other suitable answer; [1]

(ii) the polar ice may melt **AND** the habitat of the polar bear will be destroyed/they may drown/other suitable answer; [1]
