PHYSICAL SCIENCE 0652/12

Paper 1 Multiple Choice (Core) October/November 2019

45 minutes

Additional Materials: Multiple Choice Answer Sheet

Soft clean eraser

Soft pencil (type B or HB is recommended)

READ THESE INSTRUCTIONS FIRST

Write in soft pencil.

Do not use staples, paper clips, glue or correction fluid.

Write your name, centre number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you.

DO NOT WRITE IN ANY BARCODES.

There are **forty** questions on this paper. Answer **all** questions. For each question there are four possible answers **A**, **B**, **C** and **D**.

Choose the **one** you consider correct and record your choice in **soft pencil** on the separate Answer Sheet.

Read the instructions on the Answer Sheet very carefully.

Each correct answer will score one mark. A mark will not be deducted for a wrong answer.

Any rough working should be done in this booklet.

A copy of the Periodic Table is printed on page 16.

Electronic calculators may be used.

- 1 Which statement about a liquid at 60 °C is **not** correct?
 - A It has a fixed volume.
 - **B** It takes the shape of the container.
 - **C** Its particles are far apart.
 - **D** Its particles have enough energy to move around.
- 2 The diagram shows a chromatogram of several different inks.

Which statement is correct?

- **A** 2 is a pure substance.
- **B** 3 is a pure substance.
- C X is a mixture of 1 and 2.
- **D** X is a mixture of 2 and 3.
- **3** When sodium reacts with water, hydrogen gas is released and aqueous sodium hydroxide is formed.

The aqueous sodium hydroxide is a1.....

The sodium hydroxide is the2..... and water is the3......

Which words complete gaps 1, 2 and 3?

	1	2	3
Α	solute	solution	solvent
В	solute	solvent	solution
С	solution	solute	solvent
D	solution	solvent	solute

4 Some properties of X and Y are shown.

property	Х	Y
volatility	non-volatile	highly volatile
solubility in water	soluble	insoluble
electrical conductivity when molten	good	poor

Which row describes the bonding in X and Y?

	X	Y
Α	covalent	covalent
В	covalent	ionic
С	ionic	covalent
D	ionic	ionic

5 X is a compound that contains the elements potassium, manganese and oxygen.

X has twice as many potassium atoms as manganese atoms, and twice as many oxygen atoms as potassium atoms.

What is the formula of X?

A KMnO₂

B K₂MnO₂

C K₂MnO₄

D KMn₂O₄

6 A student dissolves a sample of ammonium nitrate in water.

The student measures the temperature of the mixture before and after the reaction.

The results are shown.

	°C
temperature before	21
temperature after	17

Which process describes the reaction?

- A combustion
- **B** endothermic
- **C** exothermic
- **D** reduction

7 When hydrochloric acid is added to calcium carbonate, carbon dioxide is given off.

The volume of carbon dioxide given off is plotted against time and is represented by the dashed line X on the graph.

Which solid line on the graph shows the results obtained when the temperature of the mixture is increased and all other factors remain the same?

8 The equation for the reaction of magnesium with copper(II) oxide is shown.

$$CuO + Mg \rightarrow MgO + Cu$$

Which statement is correct?

- A Copper(II) oxide is oxidised.
- **B** Copper(II) oxide is reduced.
- C Magnesium oxide is oxidised.
- **D** Magnesium oxide is reduced.
- **9** Which oxide is acidic?
 - A calcium oxide
 - **B** copper oxide
 - C magnesium oxide
 - **D** sulfur oxide

A bottom of Group 1 B bottom of Group 7 C in the transition elements

14 Some reactions of four metals W, X, Y and Z and their oxides are shown.

The letters are not the chemical symbols of the metals.

metal	reaction of metal with dilute hydrochloric acid	reaction of metal oxide with carbon
W	reacts	not readily reduced
Х	no reaction	readily reduced
Y	reacts	reduced
Z	fast reaction	not reduced

What is the order of reactivity of these metals?

	most reactive			least reactive
Α	Z	W	Y	Х
В	Z	Y	W	X
С	X	W	Υ	Z
D	X	Υ	W	Z

- 15 Which substance is used as a chemical test for water?
 - A anhydrous copper(II) sulfate
 - **B** hydrated cobalt(II) chloride
 - **C** hydrated copper(II) sulfate
 - **D** pink cobalt(II) chloride
- 16 Which two gases are the main components of clean air?
 - A carbon dioxide and oxygen
 - B carbon dioxide and nitrogen
 - C nitrogen and oxygen
 - D oxygen and argon

17 Limestone is heated to make 'lime' (calcium oxide). The equation is shown.

$$CaCO_3 \rightarrow CaO + CO_2$$

Which type of reaction takes place?

- A combustion
- **B** fractional distillation
- **C** reduction
- **D** thermal decomposition
- 18 Which statements about the alkanes are correct?
 - 1 They are generally unreactive except in terms of burning.
 - 2 They burn in air to produce carbon dioxide and water.
 - 3 They contain carbon to carbon double bonds.
 - 4 They decolourise bromine water.
 - **A** 1, 2 and 3 only **B** 1 and 2 only **C** 1, 3 and 4 only **D** 2 and 4 only
- 19 Which structure represents an unsaturated hydrocarbon?

20 Ethanol is an alcohol with the formula C₂H₅OH.

It is used as a solvent in the manufacture of varnishes and perfumes.

What is another use of ethanol?

- A as a fuel
- **B** as the monomer unit in the formation of poly(ethene)
- C manufacture of natural gas
- D neutralising acidic soil

21 The diagram shows a stopwatch after it has been used to time 20 swings of a pendulum.

What is the period of the pendulum?

- **A** 0.82s
- **B** 16.40 s
- **C** 82 s
- **D** 1640s

22 The diagram shows a speed-time graph for a bus.

At which labelled point is the bus moving with constant speed?

23 The diagram shows an experiment to determine the density of oil. The readings on the balance and the volume of the oil are shown.

What is the density of the oil?

- **A** $0.30 \,\mathrm{g/cm^3}$
- **B** $0.80 \,\mathrm{g/cm^3}$
- **C** $1.25 \,\mathrm{g/cm^3}$
- **D** $3.35 \,\mathrm{g/cm^3}$

24 Three properties of a body are its mass, its shape and its size.

Which row correctly shows whether these properties can be changed by a force?

	mass	shape	size	
Α	✓	✓	✓	key
В	✓	✓	X	√ = can be changed
С	✓	X	✓	x = cannot be changed
D	x	✓	✓	

25 The table gives the weights of four students and the time each student takes to run up the same hill.

Which student produces the least power by running up the hill?

	weight of student/N	time taken to run up hill/s
Α	440	11
В	500	10
С	550	11
D	600	10

26 A fixed mass of gas is cooled at constant pressure.

How do the speed of the particles and the volume of the gas change?

	speed of particles	volume of gas
Α	decreases	decreases
В	decreases	increases
С	increases	decreases
D	increases	increases

27 An ice cube is held in a clamp. The air next to the ice cube becomes very cold.

What happens to the density of the air as the air becomes colder and in which direction does the cold air move?

	density change of the air	direction the air moves
Α	decreases	downwards
В	decreases	upwards
С	increases	downwards
D	increases	upwards

28 The diagrams represent water waves in a deep pond. The diagrams are all drawn to the same scale and the waves are all moving with the same speed.

Which diagram shows the wave with the highest frequency?

В

_

D

29 The diagram shows a ray of light incident on a plane mirror.

What is the angle of reflection?

- **A** 40°
- **B** 50°
- **C** 80°
- **D** 100°

30 The diagram shows light from an object O passing through a converging lens to form an image I.

What is the focal length of the lens?

- **A** 18 cm
- **B** 30 cm
- **C** 45 cm
- **D** 75 cm

31 Two astronauts without radios can only communicate in space if their helmets are touching. There is no air in space.

What does this show about sound?

- A It can travel through a solid and a vacuum.
- **B** It can travel through a solid but cannot travel through a vacuum.
- **C** It cannot travel through a solid but can travel through a vacuum.
- **D** It cannot travel through either a solid or a vacuum.

32 Which type of electromagnetic radiation is used for satellite television and which type is used by television remote controllers?

	satellite television	television remote controllers
Α	microwaves	infra-red
В	microwaves	ultraviolet
С	radio waves	infra-red
D	radio waves	ultraviolet

33 A student holds a plastic rod and a cloth.

The student rubs the rod with the cloth. The rod and the cloth both become charged as particles are transferred from one to the other.

Which row compares the type of charge on the cloth with the type of charge on the rod and gives the name of the particles transferred?

	type of charge on cloth compared to charge on rod	particles that have been transferred
Α	opposite	electrons
В	opposite	protons
С	the same	electrons
D	the same	protons

34 What is the unit of electromotive force?

- A ampere
- **B** newton
- C volt
- **D** watt

35 The graph shows how the current in a resistor varies with different values of potential difference (p.d.) across it.

What is the resistance of the resistor?

- **A** 0.25Ω
- **B** 4.0 Ω
- **C** 9.0 Ω
- **D** 36Ω

36 A 20Ω resistor and a 10Ω resistor are connected in parallel.

What is their combined resistance?

- **A** less than 10Ω
- **B** 10Ω
- \mathbf{C} 20 Ω
- **D** more than 20Ω

37 Four electrical appliances are connected to a single mains socket using a four-way adaptor.

What is a possible danger caused by this arrangement?

- A a fuse in an appliance overheats
- B an appliance overheats
- **C** the cable to an appliance overheats
- **D** the cable to the adaptor overheats
- **38** A current-carrying conductor experiences a force when placed in a magnetic field.

Two changes are made to the coil but the direction of the force does **not** change.

Which two changes are made?

- A The current is increased and the direction of the magnetic field is reversed.
- **B** The current is reversed and the strength of the magnetic field is decreased.
- **C** The current is reversed and the strength of the magnetic field is increased.
- **D** The current is reversed and the direction of the magnetic field is reversed.
- **39** A nuclide of oxygen is represented by the symbol ${}^{17}_{8}$ O.

In a neutral atom of ${}^{17}_{8}\mathrm{O}$, how many electrons, neutrons and protons are there?

	electrons	neutrons	protons
Α	8	9	8
В	8	17	8
С	8	17	9
D	9	8	9

40 The graph shows how the number of emissions per second from a radioactive source changes with time.

What is the number of emissions per second of the source four half-lives after the starting time of the graph?

- A 0 emissions per second
- B 10 emissions per second
- C 20 emissions per second
- **D** 40 emissions per second

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (UCLES) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced online in the Cambridge Assessment International Education Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download at www.cambridgeinternational.org after the live examination series.

Cambridge Assessment International Education is part of the Cambridge Assessment Group. Cambridge Assessment is the brand name of the University of Cambridge Local Examinations Syndicate (UCLES), which itself is a department of the University of Cambridge.
