CANDIDATE NAME					
CENTRE NUMBER			CANDIDATE NUMBER		

COMBINED SCIENCE

0653/23

Paper 2 (Core)

May/June 2010

1 hour 15 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs, tables or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer all questions.

A copy of the Periodic Table is printed on page 20.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

This document consists of 19 printed pages and 1 blank page.

(a) Circle the characteristics in the list below that are shared by all living organisms. 1

excretion photosynthesis sensitivity heartbeat sight

www.papaCambridge.com (b) A student peeled a layer of cells from the inside of an onion bulb. She placed them in a drop of water on a microscope slide and covered them with a coverslip.

Fig. 3.1 shows what she saw when viewing the cells through a microscope.

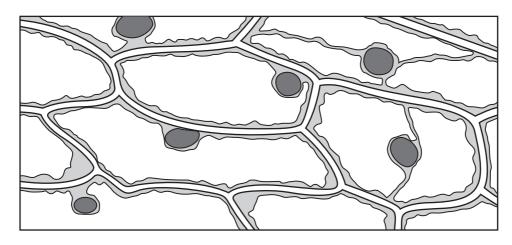

Fig. 3.1

	(i)	The cells in Fig. 3.1 are all similar to each other.	
		Give the name for a group of similar cells.	[1]
	(ii)	State two ways in which the cells in Fig. 3.1 differ from animal cells.	
		1	
		2	[2]
(c)		on cells often contain stores of starch. When a person eats an onion, the starch ested.	is
	(i)	Explain why nutrients such as starch must be digested before they can be used the human body.	by
			[2]

(ii)	Outline th	ne roles of each of the following in the digestion of starch.	30.00
	teeth		1
	enzymes		•••
		[[2]

2		eriodic Table on page 20 shows the chemical elements in rows (left to rights) s (up and down).	For iner's
	(a) (i)	A column of elements in the Periodic Table is called a group.	Tage
		What is a row of elements called? [1	COM
	(ii)	State the chemical symbol of the element which has a proton (atomic) number of 32	

[1]

(b) Table 2.1 shows the uses of some elements.

Complete the table by writing the names of elements chosen from the list into the correct boxes.

aluminium	carbon	chlorine	helium
iron	nitrogen	sodium	xenon

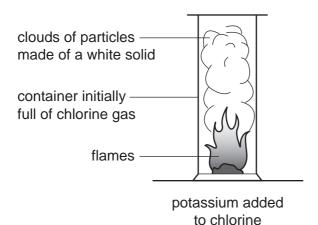

Table 2.1

element	use
	used to make food containers because it does not react with food
	used to sterilise drinking water because it kills harmful bacteria
	used in airships because it is an unreactive gas which is much less dense than air

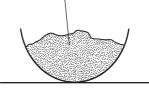

[3]

www.PapaCambridge.com (c) A teacher placed a small piece of potassium into a container filled with chloridal She also mixed together some iron filings and sulfur powder.

Fig. 2.1 shows what the class observed.

the elements mix but no change is observed

iron filings added to sulfur

Fig. 2.1

(i)	State two observations which showed that the elements potassium and chlorine were combining to form a compound.
	1
	2
	[2]
(ii)	Suggest the word chemical equation for the reaction between potassium and chlorine.
	[1]
(iii)	Iron sulfide is a compound made of the elements iron and sulfur.
	Using this example, describe two ways in which a mixture of two elements differs from a compound of the elements.
	1
	2
	[2]

www.PapaCambridge.com (a) Fig. 3.1 shows an astronaut on a space walk. His space suit is designed angerous electromagnetic radiation from the Sun reaching the astronaut's body. 3

		Fig. 3.1	
	(i)	Name two types of electromagnetic radiation that can harm the body.	
		1	
		2	[2]
	(ii)	State one way in which electromagnetic radiation can harm the body.	
			[1]
(b)	a m	o astronauts are in a rocket being launched to the Moon. One of the astronauts han assoned and the gravitational field strength on the Moon is about one sixth of the Earth.	
	Sta	te the difference, if any, between	
	(i)	the mass of the astronaut on the Earth and on the Moon,	
			[1]
	(ii)	the weight of the astronaut on the Earth and on the Moon.	
			[1]

	The state of the s
	7
(c)	The astronauts land on the Moon, which has no atmosphere. They use radio signal talk to each other. Explain why sound waves need a medium, such as air, to travel through.
	Explain why sound waves need a medium, such as air, to travel through.
	[2]
(d)	A rock on the moon weighs 6 N. The astronaut lifts it up by 2 metres.
	Calculate the work done on the rock.
	State the formula that you use and show your working.
	formula
	working
	J [2]

(a) A student investigated the conditions needed for the germination of mustard seed

Fig. 4.1 shows the apparatus at the start of his experiment.

www.papaCambridge.com Tubes A to E were placed in the laboratory at room temperature. Tube E was placed in a freezer at -4 °C.

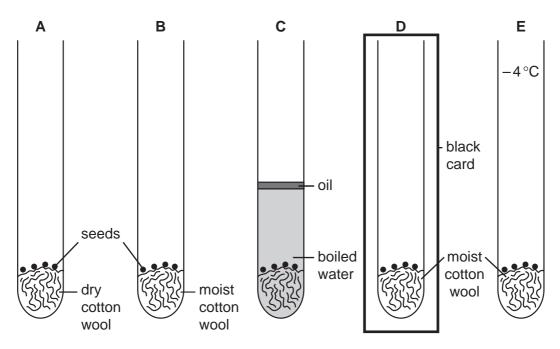

Fig. 4.1

(i) Which one of these factors should the student have kept the same for all of the tubes? Circle the correct answer.

age of seeds amount of water temperature [1] (ii) After three days, the seeds in tubes **B** and **D** had germinated. The seeds in all the other tubes had not germinated. Use these results to deduce the conditions needed for the germination of mustard seeds.

		the state of the s
		9
(b)		a tropical rainforest, the trees often grow very closely together, which reduce ount of light reaching the forest floor. e seeds of many species of rainforest trees will not germinate unless they get plenty ght.
		e seeds of many species of rainforest trees will not germinate unless they get plenty ght.
	(i)	Suggest why this is an advantage to the seedlings.
		[1]
	(ii)	In a separate experiment the student used seeds of rainforest trees.
		State the tube in Fig. 4.1 in which the result would differ from those he obtained for mustard seeds.
		[1]
(c)	(i)	Tropical rainforests have a very large number of different plant species.
		Suggest how this could lead to a high species diversity of animals in tropical rainforests.
		[2]
	(ii)	When rainforests are cut down, species diversity is reduced.
		Explain how else cutting down rainforests may damage the environment.
		[3]

Some fuels are listed below.

						W.	
				10		1. P.	1
Som	e fu	iels are listed b	pelow.				aCan.
		animal dung	coal	metha	ane	wood	
(a)	(i)	State one fuel	I from the list which is	an example o	f a fossil fuel.		·
		Explain your a	answer.				
		example of a f	fossil fuel				
		explanation					
							[2]
((ii)	The chemical below.	formulae of some sub	stances which	n can be used	as fuels are s	hown
		C ₂ H ₆ O	H ₂	со	C ₂ H ₂	С	
		Explain which	one of these formulae	e represents o	ne molecule o	of a <i>hydrocarb</i> o	on.
							[2]
(b) .	At a	ın oil refinery, ι	useful products are sep	parated from p	oetroleum (cru	ide oil).	
(Con	nplete the sent	ences by choosing ter	ms from the li	st below.

www.PapaCambridge.com (c) A student suggested that when the liquid fuel ethanol is burned, carbon diox should be produced.

Fig. 5.1 shows apparatus which he used to find out if this was true.

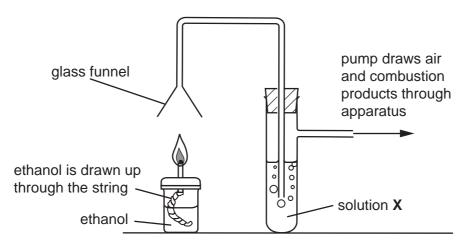

Fig. 5.1

(i) Solution X is used to test for carbon dioxide.

Name solution X, and describe what would be observed if the combustion of ethanol does produce carbon dioxide.

(ii)	Explain why the combustion of ethanol is an example of an oxidation reaction.	
		[2]
	observation	
	solution X	

WWW. Papa Cambridge. Com

		Fig. 6.1	
(a)	(i)	Name a suitable piece of apparatus for measuring the length of the cube.	
			[1]
1	(ii)	Calculate the volume of the cube cm ³	[1]
(iii)	The mass of the cube is 21.6 g.	
		Calculate the density of the cube.	
		State the formula that you use and show your working.	
		formula	
		working	
		g/cm ³	[2]

[2]

Fig. 6.2 shows their arrangement.

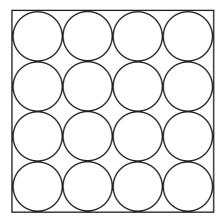

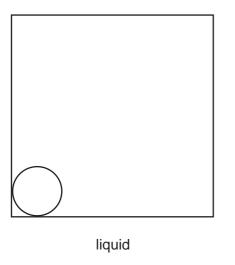

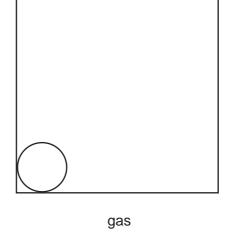

Fig. 6.2

Complete the diagrams below to show the arrangement of particles in a liquid and in a gas.

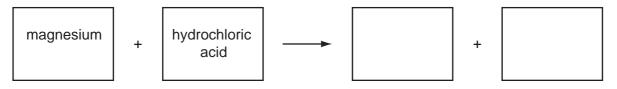

(c) (i) Explain, in terms of particles, why a solid expands when heated.

(ii) Describe **one** problem caused by a solid metal expanding when it gets hot.

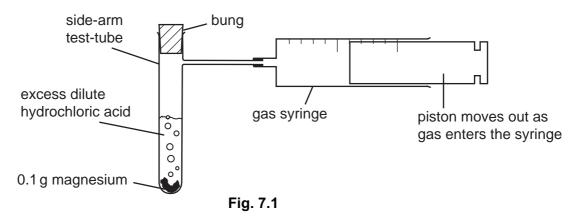

7

- www.PapaCambridge.com When magnesium metal reacts with dilute hydrochloric acid, a soluble salt and a produced.
- (a) Complete the word chemical equation for the reaction between magnesium and hydrochloric acid.

[2]

(b) A student used the apparatus in Fig. 7.1 to investigate the rate of this reaction.

The student dropped the magnesium into the acid contained in the side-arm test-tube and put in the bung.

A stopwatch was used to time how long it took for the gas syringe to fill with gas.

The student carried out two experiments and the results are shown in Table 7.1.

Table 7.1

experiment	time taken to collect 100 cm ³ of gas/seconds
1	45
2	31

(i)	Explain how the results show that the rate of reaction in experiment 2 was higher
	than that in experiment 1.

	Way.	
	15	
(ii)	Suggest two ways in which the rate of reaction between magnesium and hydrochloric acid could be increased. 1	For iner's
	1	age con
	2	13
	[2]	
(iii)	Sodium is an alkali metal in Group 1 of the Periodic Table.	
	Explain why the student must not attempt the experiment shown in Fig. 7.1 using sodium instead of magnesium.	
	[2]	

- (a) A torch (flash light) contains two cells providing a total voltage of 3.0 V across the 8 When the torch is lit, the current flowing through the lamp is 0.3 A.

(i) Calculate the resistance of the lamp.

www.PapaCambridge.com State the formula that you use, show your working, and state the units of resistance.

formula

working

[3]

(ii) To measure the current through the lamp and the voltage across the lamp, the student set up the circuit in Fig. 8.1.

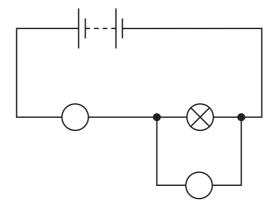

Fig. 8.1

Write the letters A and V in the two circles on the diagram to show the correct positions of the ammeter (A) and voltmeter (V). [1]

www.PapaCambridge.com

9 Fig. 9.1 shows a section through a human heart seen from the front.

		Fig. 9.1	
(a)	(i)	The walls of the heart are made of cardiac muscle.	
		Describe the function of the cardiac muscle in the heart.	
			[2]
	(ii)	State the name of the blood vessels that supply the cardiac muscle with oxygen.	
			[1]
	(iii)	Give the letters of the two labelled blood vessels in Fig. 9.1 that contain oxygenated blood.	ain
		and	[1]
(b)		nts also have transport systems in which liquids flow through vessels. However	er,
	Inst	tead, transpiration pulls water up through the plant.	
	(i)	Explain what is meant by the term transpiration.	
			••••
			[2]
	(ii)	Name the vessels through which water travels up a plant.	
			[1]
