Paper 1 Multiple Choice

October/November 2014

45 minutes

Additional Materials: Multiple Choice Answer Sheet
 Soft clean eraser
 Soft pencil (type B or HB is recommended)

READ THESE INSTRUCTIONS FIRST

Write in soft pencil.
Do not use staples, paper clips, glue or correction fluid.
Write your name, Centre number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you.
DO NOT WRITE IN ANY BARCODES.

There are **forty** questions on this paper. Answer **all** questions. For each question there are four possible answers **A, B, C** and **D**.
Choose the **one** you consider correct and record your choice in **soft pencil** on the separate Answer Sheet.

Read the instructions on the Answer Sheet very carefully.

Each correct answer will score one mark. A mark will not be deducted for a wrong answer.
Any rough working should be done in this booklet.
A copy of the Periodic Table is printed on page 20.
Electronic calculators may be used.

This document consists of **18** printed pages and **2** blank pages.

* 7 7 4 9 2 5 0 5 7 2 *

1 The diagram shows a plant cell.

Which two parts are found in plant cells but **not** in animal cells?

- A** 1 and 5 **B** 2 and 3 **C** 2 and 4 **D** 3 and 5

2 Which characteristics help to define a living organism?

- A** diffusion, movement, respiration
B excretion, nutrition, sensitivity
C excretion, reproduction, transpiration
D growth, inspiration, nutrition

3 The table shows the concentration (in parts per million) of three ions inside and outside a plant cell.

	inside cell	outside cell
magnesium ions	38	50
nitrate ions	825	700
sulfate ions	145	200

In which directions would the ions diffuse?

	magnesium ions	nitrate ions	sulfate ions
A	+	+	+
B	+	-	+
C	-	+	-
D	-	-	-

key
 + = diffuses into cell
 - = diffuses out of cell

- 4 Which two nutrients are needed for the development of strong bones and teeth?
- A** vitamin C and calcium
B vitamin C and iron
C vitamin D and calcium
D vitamin D and iron
- 5 An experiment is carried out to investigate the effect of pH on the activity of an enzyme.
 The graph shows the results.

At which pH is this enzyme most active?

- A** 2 **B** 5 **C** 7 **D** 12
- 6 Which row describes the movement of a substance in a plant transport tissue?

	tissue	substance	direction of movement
A	phloem	sugar	down only
B	phloem	sugar	up and down
C	xylem	water	up and down
D	xylem	water and mineral ions	down only

7 The diagram shows a section through a leaf.

Which part brings water to the leaf and through which part does water leave?

	brings water	water leaves
A	1	2
B	1	3
C	2	1
D	3	1

8 Which gives these structures in order of their increasing diameter?

- A** bronchi → bronchioles → trachea
- B** bronchi → trachea → bronchioles
- C** bronchioles → bronchi → trachea
- D** trachea → bronchi → bronchioles

9 When a food is heated with Benedict's solution, an orange colour appears.

Which nutrient must be present in the food?

- A** fat
- B** protein
- C** reducing sugar
- D** starch

- 10 Four students assembled apparatus intended to show that air breathed out contains more carbon dioxide than air breathed in.

Which apparatus is assembled correctly?

key

 carbon dioxide indicator

- 11 Where does a fertilised human egg normally become implanted?

- A ovary
- B oviduct
- C uterus
- D vagina

12 A student is frightened by a dog and runs away.

The changes in the concentration of adrenaline in the student's blood are shown in the graph.

What explains the gradual fall in the adrenaline concentration after the fright?

- A It is destroyed by the liver.
- B It is reabsorbed by the glands that produced it.
- C It is respired to release energy.
- D It is used up by the contracting muscles.

13 The diagram shows a food chain.

maize → mouse → owl

Which terms correctly describe the organisms in this food chain?

	maize	mouse	owl
A	consumer	carnivore	producer
B	consumer	herbivore	carnivore
C	producer	carnivore	herbivore
D	producer	herbivore	carnivore

14 A sweet potato is cut into pieces and cooked.

In which pan does the potato cook most quickly?

15 Two liquids are separated by fractional distillation.

This is possible because the liquids differ in their

- A boiling points.
- B colour.
- C density.
- D solubility in water.

16 The fertiliser ammonium sulfate has the formula $(\text{NH}_4)_2\text{SO}_4$.

How many atoms of each element are present?

	number of hydrogen atoms	number of nitrogen atoms	number of oxygen atoms	number of sulfur atoms
A	4	1	1	1
B	4	2	4	1
C	8	1	4	1
D	8	2	4	1

17 The contents of the two beakers shown are mixed.

Which salt is formed?

- A magnesium nitrate
- B magnesium sulfate
- C manganese nitrate
- D manganese sulfate

18 The diagrams represent different substances.

Which row correctly describes the substances?

	only separate atoms	only molecules	mixture of atoms and molecules
A	P	Q	S
B	Q	T	R
C	T	P	R
D	T	Q	P

19 Element X forms a basic oxide.

Which row describes element X and its position in the Periodic Table?

	type of element	position in the Periodic Table
A	metal	on the left
B	metal	on the right
C	non-metal	on the left
D	non-metal	on the right

20 The table shows the initial and final temperatures in a series of experiments.

Which experiment is most exothermic?

	initial temperature /°C	final temperature /°C
A	16.0	24.0
B	18.5	27.0
C	17.5	26.5
D	18.5	14.0

21 Iron(III) oxide, Fe₂O₃, reacts with carbon monoxide, CO, to produce iron and carbon dioxide. The equation for the reaction is

Which statement is **not** correct?

- A** Carbon is neither oxidised nor reduced.
- B** Carbon is oxidised.
- C** Iron is reduced.
- D** This is a redox reaction.

22 In the electrolysis of molten lead(II) bromide, what is the electrolyte?

- A** anode
- B** bromine
- C** lead
- D** lead bromide

23 Which statement about Group I elements is correct?

- A Their melting points increase down the group.
- B They are relatively soft metals.
- C They do not react with cold water.
- D They include sodium, potassium and calcium.

24 Which statement about transition metals is **not** correct?

- A They are often used as catalysts.
- B They form colourless compounds.
- C They have high densities.
- D They have high melting points.

25 Gasoline is a hydrocarbon fuel obtained from crude oil.

Which statement is correct?

- A Gasoline burns to form carbon dioxide and water.
- B Gasoline contains the elements carbon, hydrogen and oxygen.
- C Gasoline is used as a fuel for diesel engines.
- D The combustion of gasoline is an endothermic reaction.

26 The diagram shows the approximate composition of air.

What are gases X and Y?

	gas X	gas Y
A	carbon dioxide	oxygen
B	nitrogen	oxygen
C	oxygen	carbon dioxide
D	oxygen	nitrogen

27 Copper can be made from copper oxide by reacting it with carbon at a high temperature.

Why is carbon used?

- A** It does not react with copper.
- B** It is a conductor of electricity.
- C** It is a high melting point solid.
- D** It is more reactive than copper.

28 Diagram 1 shows a force F lifting a weight through a height h .

Diagram 2 shows the same force F lifting the same weight through a height $2h$.

In both diagrams, air resistance and friction are negligible.

diagram 1

diagram 2

Each lift can take either 1 s or 10 s.

Which row shows the greatest power being developed when the weight is lifted?

	total height lifted	time taken for the lift / s
A	h	1
B	h	10
C	$2h$	1
D	$2h$	10

29 A boy walks along a track. He starts running, and finally stops for a rest.

Which distance/time graph represents his journey?

30 Which line in the table shows the unit for force, the unit for mass and the unit for weight?

	force	mass	weight
A	kg	kg	N
B	kg	N	kg
C	N	kg	N
D	N	N	kg

- 31 A telephone engineer connects a wire between two poles on a very hot day in a desert. The wire is stretched so tight that it makes the wire very tight.

During the night, it becomes very cold.

What could happen to the wire, and why?

	what could happen	why
A	it breaks	it contracts
B	it breaks	it expands
C	it sags lower down	it contracts
D	it sags lower down	it expands

- 32 A liquid evaporates when molecules leave its surface.

Which molecules leave the surface, and what happens to the temperature of the remaining liquid?

- A** The more energetic molecules leave and the temperature falls.
- B** The more energetic molecules leave and the temperature rises.
- C** The less energetic molecules leave and the temperature falls.
- D** The less energetic molecules leave and the temperature rises.

- 33 An electric heater is placed inside a metal box which has one side open. The diagram shows four possible positions of the box.

The heater is switched on for several minutes.

In which position does the box become the hottest?

- 34 A plane mirror is on a wall.

Which description of the image formed by the mirror is correct?

- A upright and smaller than the object
 - B upright and the same size as the object
 - C inverted and smaller than the object
 - D inverted and the same size as the object
- 35 The sound from a drum is loud and has a low pitch.

Which row describes the amplitude and the frequency of the sound?

	amplitude	frequency
A	large	high
B	large	low
C	small	high
D	small	low

- 36 The diagram shows a section through waves on water.

Which dotted line shows the position of the water surface before the wave reaches it?

- 37 Which electromagnetic waves have the smallest wavelength and which electromagnetic waves have the highest frequency?

	shortest wavelength	highest frequency
A	radio waves	gamma rays
B	microwaves	microwaves
C	gamma rays	gamma rays
D	microwaves	radio waves

- 38 When a plastic rod is rubbed with a cloth, the rod becomes positively charged.

How is this explained?

- A** Electrons have been added to the rod.
- B** Electrons have been removed from the rod.
- C** Neutrons have been added to the rod.
- D** Neutrons have been removed from the rod.

- 39 Two resistors of resistance 6.0 ohms and 3.0 ohms are combined first in series parallel.

arrangement 1

arrangement 2

Which row shows the resistance of arrangement 1 and the resistance of arrangement 2?

	resistance of arrangement 1	resistance of arrangement 2
A	9 Ω	2 Ω
B	9 Ω	9 Ω
C	18 Ω	2 Ω
D	18 Ω	9 Ω

- 40 Why is a fuse used in an electric circuit in a house?

- A** to increase the resistance of the circuit
- B** to keep the power used at a constant value
- C** to prevent a short circuit from occurring
- D** to stop the cables overheating
