Paper 1 Multiple Choice (Core)

October/November 2020

45 minutes

You must answer on the multiple choice answer sheet.

You will need: Multiple choice answer sheet

Soft clean eraser

Soft pencil (type B or HB is recommended)

INSTRUCTIONS

There are forty questions on this paper. Answer all questions.

- For each question there are four possible answers **A**, **B**, **C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
- Follow the instructions on the multiple choice answer sheet.
- Write in soft pencil.
- Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
- Do not use correction fluid.
- Do not write on any bar codes.
- You may use a calculator.

INFORMATION

- The total mark for this paper is 40.
- Each correct answer will score one mark. A mark will not be deducted for a wrong answer.
- Any rough working should be done on this question paper.
- The Periodic Table is printed in the question paper.

1 Lions are carnivores that chase, catch and eat zebra.

While still chasing zebra, which characteristic of living organisms is **not** exhibited by the lion?

- **A** movement
- **B** nutrition
- **C** respiration
- **D** sensitivity
- 2 Which structure in a plant cell makes organic nutrients?
 - A cell membrane
 - B cell wall
 - **C** chloroplast
 - **D** nucleus
- 3 Nutrient molecules are made up from smaller molecules. Nutrients can be identified by food tests.
 Which row is true for a protein?

	smaller molecules	test which gives a positive result
Α	amino acids	Benedict's test
В	amino acids	biuret test
С	sugars	Benedict's test
D	sugars	biuret test

4 A mixture of starch and saliva was set up at four different temperatures. Each mixture was tested with iodine solution after 15 minutes and again after 30 minutes.

The results are shown in the table.

temperature	colour with ic	dine solution				
/°C	15 minutes	30 minutes				
0	blue-black	blue-black				
15	blue-black	brown				
35	brown	brown				
95	blue-black	blue-black				

What do the results suggest?

- **A** The enzyme in saliva is inactive at 95 °C.
- **B** The enzyme in saliva is slow to work at 35 °C.
- **C** The enzyme in saliva works equally well at 15 °C and 35 °C.
- **D** The enzyme in saliva works faster at higher temperatures.
- 5 Which are the products of photosynthesis in a green plant?
 - A carbon dioxide and water
 - B glucose and carbon dioxide
 - C oxygen and glucose
 - **D** oxygen and water
- 6 Which are minerals?
 - 1 calcium
 - 2 fibre
 - 3 iron
 - **A** 1 only **B** 1 and 3 only **C** 2 and 3 only **D** 1, 2 and 3

7 Under which conditions will transpiration from a plant be fastest?

	temperature	humidity
Α	high	high
В	high	low
С	low	high
D	low	low

8	Which	process	uses	eneray?
---	-------	---------	------	---------

- A cell division
- **B** diffusion
- C osmosis
- **D** respiration

9 A plant shoot grows towards a light source.

This is an example of what?

- **A** gravitropism
- **B** homeostasis
- **C** transpiration
- **D** phototropism

10 What is produced by the fusion of the nuclei of two gametes?

- A embryo
- **B** fetus
- **C** ovum
- **D** zygote

11 Which term is used to describe an individual with two of the same allele for a characteristic?

- A genotype
- **B** heterozygous
- C homozygous
- **D** phenotype

12 The diagram shows a food chain.

grass
$$\rightarrow$$
 rabbit \rightarrow fox \rightarrow flea

Which statement is correct?

- **A** The grass is a primary consumer.
- **B** The rabbit is a secondary consumer.
- **C** The fox is a tertiary consumer.
- **D** The flea is a tertiary consumer.
- **13** The diagram shows a river and four farms. The numbers in the river show relative oxygen concentrations.

From which farm is untreated sewage leaking into the river?

14 Atoms are the smallest parts of1.....

When atoms of the same type chemically join together, a2..... is formed.

When different types of atom chemically join together, they form3......

Which words complete gaps 1, 2 and 3?

	1	2	3				
Α	elements	molecule	compounds				
В	elements	molecule	mixtures				
С	molecules	compound	mixtures				
D	molecules	mixture	compounds				

15 A sample of water is contaminated with insoluble chalk and a soluble salt.

Which two processes are used to separate the water from the chalk and salt?

- A distillation and chromatography
- **B** distillation and crystallisation
- **C** filtration and chromatography
- **D** filtration and crystallisation
- **16** Which row describes a covalent compound?

	solubility in water	volatility
Α	high	low
В	high	high
С	low	low
D	low	high

17 The diagram shows an electroplating experiment.

Which row shows the change in mass of each electrode?

	anode	cathode
Α	decrease	decrease
В	decrease	increase
С	increase	decrease
D	increase	increase

- **18** Which statement describes the meaning of *exothermic*?
 - A Heat energy is given out.
 - **B** Heat energy is taken in.
 - C Oxygen is given out.
 - **D** Oxygen is taken in.
- 19 Which word equation represents a redox reaction?
 - **A** carbon + copper oxide \rightarrow copper + carbon dioxide
 - **B** hydrochloric acid + potassium hydroxide → potassium chloride + water
 - C magnesium carbonate → magnesium oxide + carbon dioxide
 - **D** sodium sulfate + barium nitrate → barium sulfate + sodium nitrate
- **20** Which chemical test does **not** produce a precipitate?
 - A carbon dioxide and limewater
 - **B** carbonate ions and dilute hydrochloric acid
 - **C** chloride ions and aqueous silver nitrate
 - **D** copper(II) ions and aqueous sodium hydroxide
- **21** Potassium is in Group I of the Periodic Table.

What is a property of potassium?

- A It does not react with water.
- **B** It is a liquid.
- **C** It is a non-metal.
- **D** It is a soft metal.
- **22** Which property is **not** shown by transition elements?
 - A They can act as catalysts.
 - **B** They form coloured compounds.
 - **C** They have high melting points.
 - **D** They have low densities.

23 Magnesium is tested as shown.

Which row shows the results of the tests?

	test 1	test 2						
Α	bubbles	lamp does not light						
В	bubbles	lamp lights						
С	no bubbles	lamp does not light						
D	no bubbles	lamp lights						

24 Which gas is an acidic pollutant in air?

- A argon
- B carbon monoxide
- C sulfur dioxide
- **D** water vapour

25 Which process does **not** produce carbon dioxide?

- A acid reacting with a metal
- B acid reacting with sodium carbonate
- C complete combustion of methane
- **D** respiration

26	Me	thane is a coval	ent c	ompound.									
	Wh	ich statement a	bout	methane is corr	ect?								
	A	It conducts ele	ctrici	ty.									
	В	It is a gas at ro	om t	emperature.									
	С	It is an unsatu	rated	hydrocarbon.									
	D	It is formed fro	m a	metal and a non	-met	al.							
27	Pol	y(ethene) is ma	de fr	om ethene by th	ie pr	ocess of addit	ion poly	ymerisation					
	Wh	ich word describes ethene in this process?											
	Α	fuel											
	В	catalyst											
	С	monomer											
	D	solvent											
28	A n	an climbs up a vertical cliff that is 60 m high. He takes two hours to reach the top.											
		·							·				
	A	at is the average vertical speed of the man? 0.0083 m/s											
	В	0.50 m/s											
	С	30 m/s											
	D	120 m/s											
00	Λ Ι-	:	-	Olan and in a sum		- h - n - f	0.01						
29				0 kg and is carry		_	s 9.0 kg						
	The	e gravitational fi	eld s	trength <i>g</i> is 10 N	l/kg.								
	Wh	at is the combir	ned w	eight of the hike	er an	d her bag?							
	Α	89 kg	В	89 N	С	890 kg	D	890 N					
30	Ele	ctricity is genera	ated	in power station	s. Ma	any power sta	tions u	se steam to	drive turbine	s.			
	Wh	ich type of pow	er sta	ation does not u	se s	team?							
	Α	chemical energ	gy (fu	uel) power statio	ns								
	В	geothermal en	ergy	power stations									
	С	hydroelectric e	nerg	y power stations	3								
	D	nuclear energy	/ pov	ver stations									

31	Wh	nich material is a bad thermal conductor?												
	A	aluminium												
	В	brass												
	С	copper												
	D	wood												
32	An	object is placed in front of a plane mirror.												
	Wh	at are the characteristics of the image formed?												
	Α	same size as the object and inverted top to bottom												
	В	same size as the object and laterally inverted (left to right)												
	С	smaller than the object and inverted top to bottom												
	D	smaller than the object and laterally inverted (left to right)												
33		nich list consists of three regions of the electromagnetic spectrum in order of increasing quency (lowest first)?												
	Α	microwaves, radio waves, ultraviolet waves												
	В	microwaves, ultraviolet waves, radio waves												
	С	radio waves, microwaves, ultraviolet waves												
	D	ultraviolet waves, radio waves, microwaves												
34		worker in a quarry stands 0.90 km away from an explosion. She sees the explosion 3.0 s before hears the sound of the explosion.												
	Usi	ing this information, what value can be determined for the speed of sound?												
	A	300 m/s B 600 m/s C 2700 m/s D 5400 m/s												
35	A b	par of soft iron and a bar of steel are held in contact with a strong magnet.												
	Bot	th bars become magnetised.												
	The	e two bars are now moved away from the magnet.												
	Wh	nich statement about the bars is correct?												
	Α	Both bars easily lose their magnetism.												
	В	Neither of the bars easily loses its magnetism.												
	С	The soft iron bar easily loses its magnetism but the steel bar retains its magnetism.												
	D	The steel bar easily loses its magnetism but the soft iron bar retains its magnetism.												

36 A resistor R is connected to a 12 V battery and an ammeter as shown.

The ammeter reads 6.0 A.

What is the resistance of resistor R?

- **A** $0.50\,\Omega$
- **B** 2.0Ω
- 18Ω
- 72Ω

37 A $3.0\,\Omega$ resistor and a $6.0\,\Omega$ resistor are connected to a power supply as shown.

What is the combined resistance of the two resistors?

 $\mathbf{A} \quad 2.0 \,\Omega$

© UCLES 2020

- **B** 4.5Ω
- $9.0\,\Omega$
- D 18Ω

D

[Turn over

38 The series circuit shown includes a single component hidden in a box. The switch is open.

The switch is now closed and the lamp lights briefly before going off.

The switch is now opened, and then closed again. This time the lamp does **not** light.

Which symbol represents the component in the box?

39 A solenoid carrying a current produces a magnetic field.

Which diagram shows the magnetic field pattern?

- **40** Which type of radiation has the greatest ionising effect?
 - A infrared rays
 - ${\bf B}$ α -particles
 - \mathbf{C} β -particles
 - **D** γ -rays
