Paper 1 Multiple Choice

0654/11 May/June 2012 45 minutes

Additional Materials:

Multiple Choice Answer Sheet Soft clean eraser Soft pencil (type B or HB is recommended)

READ THESE INSTRUCTIONS FIRST

Write in soft pencil.

Do not use staples, paper clips, highlighters, glue or correction fluid.

Write your name, Centre number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you.

There are **forty** questions on this paper. Answer **all** questions. For each question there are four possible answers A, B, C and D.

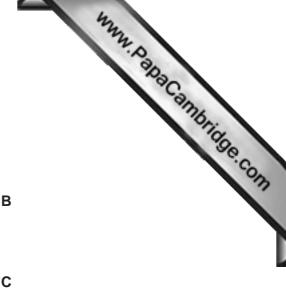

Choose the **one** you consider correct and record your choice in **soft pencil** on the separate Answer Sheet.

Read the instructions on the Answer Sheet very carefully.

Each correct answer will score one mark. A mark will not be deducted for a wrong answer. Any rough working should be done in this booklet. A copy of the Periodic Table is printed on page 20.

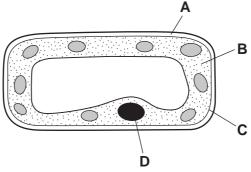

This document consists of 17 printed pages and 3 blank pages.

1 The diagram shows a section through a cell from a leaf.

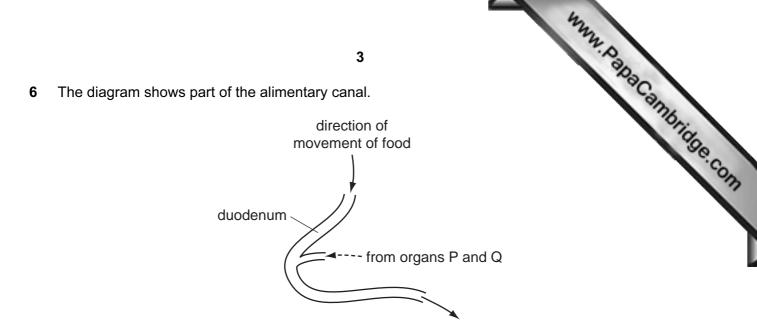

Which part is the cell membrane?

- 2 What happens in photosynthesis?
 - A Carbon dioxide is made.
 - B Oxygen is used.
 - **C** Starch is absorbed.
 - D Water is used.
- 3 Which word equation represents aerobic respiration?
 - A carbon dioxide + oxygen \rightarrow glucose + water
 - **B** carbon dioxide + water \rightarrow glucose + oxygen
 - **C** glucose + oxygen \rightarrow carbon dioxide + water
 - **D** glucose + oxygen \rightarrow lactic acid
- 4 Some cancer treatments cause a reduction in the number of a person's white blood cells.

Why might this be a problem?

- A Blood takes longer to clot.
- **B** Infections are more likely to cause illness.
- **C** Insufficient oxygen reaches the brain.
- **D** Less carbon dioxide is carried to the lungs.
- 5 Why is calcium needed in the diet?
 - A to make carbohydrates
 - B to make teeth
 - **C** to make enzymes
 - D to make muscles hard

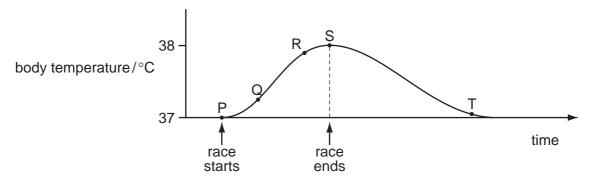

Which organs are represented by P and Q?

- A kidneys and pancreas
- B liver and pancreas
- **C** liver and stomach
- D pancreas and stomach

7 A person touches a hot object which triggers a reflex action.

In which order does the signal travel in the reflex arc?

- A relay neurone \rightarrow spinal cord \rightarrow sensory neurone
- **B** sensory neurone \rightarrow spinal cord \rightarrow motor neurone
- **C** spinal cord \rightarrow sensory neurone \rightarrow stimulus
- **D** stimulus \rightarrow motor neurone \rightarrow spinal cord
- 8 The graph shows body temperature before, during and after running a race on a hot day.

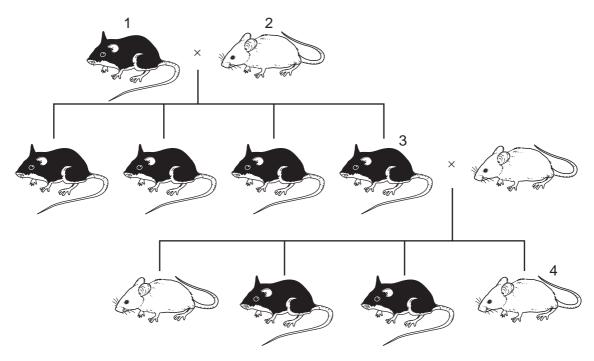

Which change in body temperature occurs as a result of homeostasis?

A	P to Q	В	Q to R	С	R to S	D	S to T
---	--------	---	--------	---	--------	---	--------

- 9 Which structure contracts to expel the baby during birth?
 - A cervix
 - B oviduct
 - C uterus wall
 - D vagina
- 10 In a flowering plant, which structure contains the female gamete?
 - A anther
 - B ovule
 - C pollen grain
 - D stigma
- **11** The diagram shows the results of a breeding experiment using black and white mice.

Which statement is correct?

- A Mouse 1 has a dominant allele for fur colour.
- **B** Mouse 2 is heterozygous for fur colour.
- **C** Mouse 3 is homozygous for fur colour.
- **D** Mouse 4 is heterozygous for fur colour.

12 The diagram shows a food chain.

Which organisms pass the greatest amount of energy along the food chain?

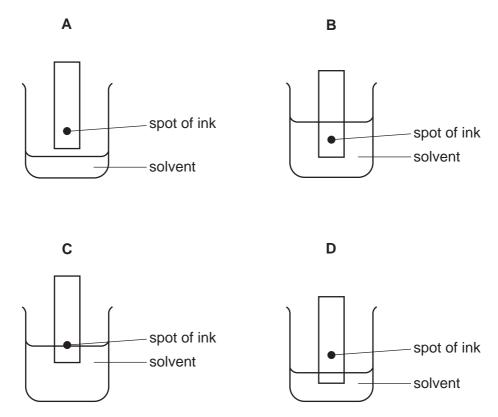

www.papacambridge.com С В D Α shrubs -► insects -🔶 birds – → mammals

13 What can lead to global warming?

	deforestation	burning of fossil fuels
Α	\checkmark	✓
В	\checkmark	x
С	x	\checkmark
D	x	x

14 The colours in an ink can be separated by chromatography.

Which diagram shows the correct way to set up the apparatus?

5

Which particles in the helium atom have approximately the same mass?

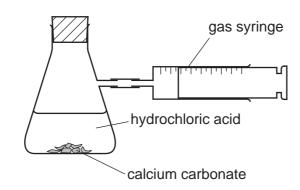

A electron and proton only

15 The diagram shows a helium atom.

- B electron and neutron only
- **C** proton and neutron only
- D electron, proton and neutron
- 16 How many atoms of metals and of non-metals are shown in the formula Na₂SO₄?

	atoms of metals	atoms of non-metals
Α	1	1
в	1	2
С	2	4
D	2	5

www.papacambridge.com 17 The apparatus shown is used to investigate the speed of reaction between hydroching calcium carbonate.

The time to collect 50 cm³ of gas is measured.

Using concentrated acid and lumps of calcium carbonate, the time is 150 s.

In a second experiment, the time is 90 s.

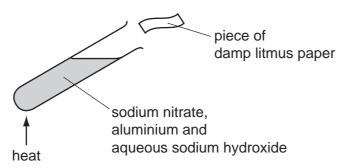

Which change was made in the second experiment?

- Α larger lumps of calcium carbonate
- В less concentrated acid
- С lower temperature
- powdered calcium carbonate D
- **18** Hydrogen and oxygen react explosively to form water.

Which terms describe this reaction?

	combustion	oxidation
Α	\checkmark	\checkmark
В	1	X
С	x	\checkmark
D	x	X

www.papacambridge.com 19 The diagram shows litmus paper testing the gas that is given off from the content tube.

The damp litmus paper

- A turns blue.
- turns colourless. В
- С turns red.
- **D** turns red then colourless.
- 20 Universal Indicator solution is added to test-tubes W, X and Y.

What are the colours of the Universal Indicator?

	in W	in X	in Y
Α	green	red	purple
в	purple	green	red
С	red	green	purple
D	red	purple	green

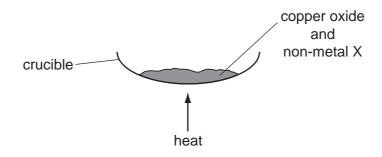

8

Which substance is a metal?

	malleability	density	electrical conductivity
Α	brittle	high density	high
в	brittle	low density	low
С	malleable	high density	high
D	malleable	low density	low

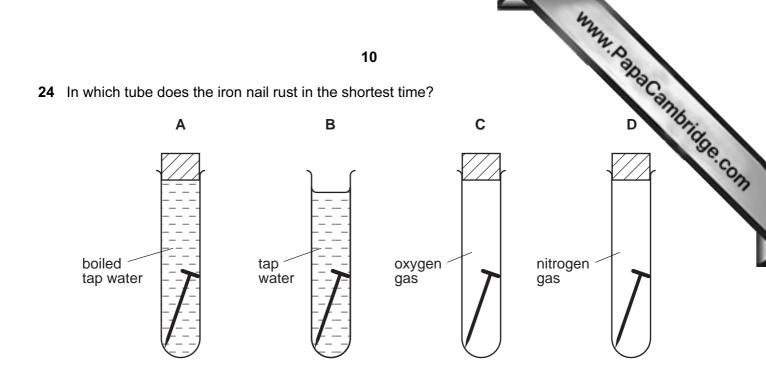

- 22 Which statement about lithium, sodium and potassium is not correct?
 - **A** They are in the same group of the Periodic Table.
 - **B** They are in the same period of the Periodic Table.
 - **C** They float on water.
 - **D** They react with water to give a flammable gas.
- **23** Copper is obtained from copper oxide by heating with non-metal X.

Which shows the identity of non-metal X and the type of reaction non-metal X undergoes?

	identity of X	type of reaction
Α	carbon	oxidation
в	carbon	reduction
С	oxygen	oxidation
D	oxygen	reduction

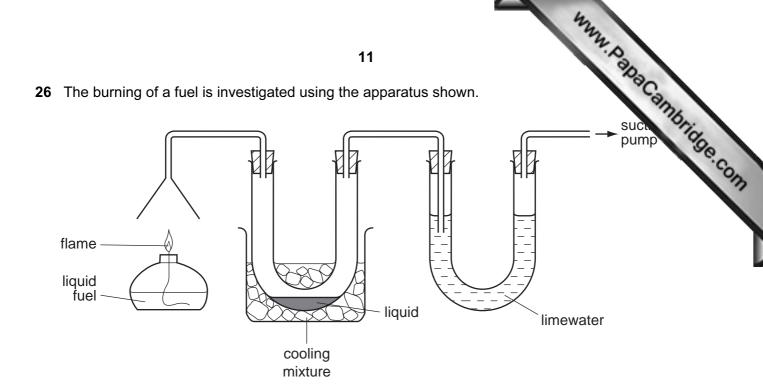

www.papacambridge.com

25 Fertilisers are used to supply the essential elements needed for plant growth.

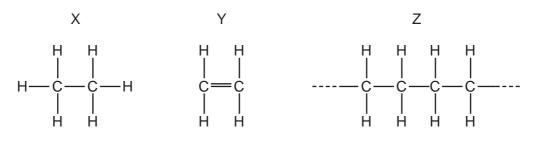

Which compound supplies two of these essential elements?

- **A** Ca(H₂PO₄)₂
- **B** Ca(NO₃)₂
- C KNO₃
- **D** (NH₄)₂SO₄

Which substances is the apparatus testing for?

- A carbon monoxide and carbon dioxide
- B carbon monoxide and water
- C carbon dioxide and water
- D carbon dioxide and sulfur dioxide
- 27 The diagram shows three molecules.

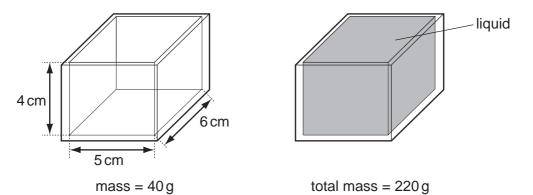

Which molecule is a monomer and which is a polymer?

	monomer	polymer
Α	Х	Z
в	Y	Z
С	Y	Х
D	Z	Y

www.papaCambridge.com 28 A motorist starts out on a 210 km journey at 8 am. At 10 am he stops for a 30 minut covering 180 km. The motorist completes the journey at 11 am.

What is his average speed in covering the 210 km?

- **A** 60 km/h В 70 km/h С 84 km/h D 90 km/h
- **29** The diagrams show a glass tank with inside measurements of $5 \text{ cm} \times 6 \text{ cm} \times 4 \text{ cm}$.

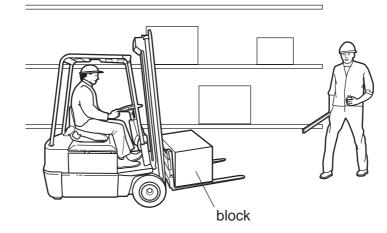

The tank has a mass of 40 g when empty. When the tank is filled with a liquid, the tank and liquid have a total mass of 220 g.

What is the density of the liquid?

$$\mathbf{A} \quad \frac{220}{(5 \times 6 \times 4)} \,\mathrm{g/cm^3}$$

- $\frac{(220-40)}{(5\times6\times4)}g/cm^{3}$ В
- $\frac{(5\times 6\times 4)}{220}\,g/cm^3$ С
- $\frac{(5 \times 6 \times 4)}{(220 40)}$ g/cm³ D

www.PapaCambridge.com 30 A workman lifts a cubic block from ground level to a high shelf using a fork lift true workman has a metre rule and a stopwatch.

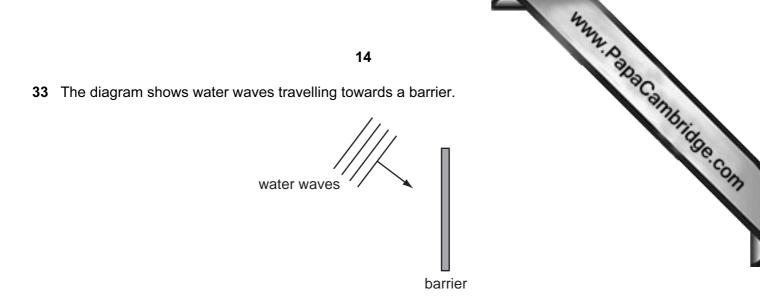

Which quantity will the second workman be able to determine, using only the metre rule and the stopwatch?

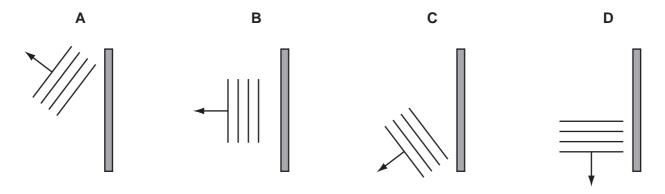

- the average speed of the block as it moves up Α
- the density of the material of the block В
- the pressure exerted by the block on the shelf С
- the work done on the block when it is lifted D
- **31** On a warm day, a driver checks the air pressure in a car tyre. Overnight the temperature drops and the air pressure in the tyre falls. There are no air leaks in the tyre.

Why does the pressure fall?

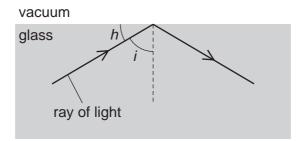

- The air molecules in the tyre move more slowly. Α
- В The air molecules in the tyre stop moving.
- С The volume of the air in the tyre decreases.
- D The volume of the air in the tyre increases.
- **32** How is heat transferred in a vacuum?
 - by conduction and convection Α
 - **B** by convection and radiation
 - С by convection only
 - **D** by radiation only

Which diagram shows the direction of the waves after being reflected by the barrier?

34 A glass block is surrounded by a vacuum. A ray of light strikes the inside of the glass block, and is totally reflected back into the block.

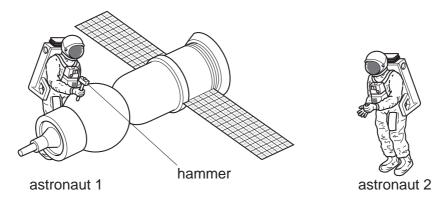

Why does this happen?

- **A** Angle *h* is greater than the critical angle.
- **B** Angle *i* is greater than the critical angle.
- **C** Light cannot travel through a vacuum.
- **D** The ray is travelling along the normal.

www.papaCambridge.com Which statement about the time it takes these radiations to reach Earth's atmosphere is co

- Infra-red radiation arrives first. Α
- В Ultraviolet radiation arrives first.
- С Visible light arrives first.
- D They all arrive at the same time.
- 36 Astronaut 1 uses a hammer to mend a satellite in space. Astronaut 2 is nearby. There is no air in space.

Compared with the sound heard if they were working on Earth, what does astronaut 2 hear?

- a louder sound Α
- В a quieter sound
- С a sound of the same loudness
- no sound at all D
- 37 The instructions for a household lamp state that the plug should be fitted with a 3A fuse.

What could happen if, by mistake, a 13A fuse is fitted?

- The fuse might melt too easily. Α
- В The lamp might explode if a fault develops.
- С The wires connecting the lamp to the plug might overheat if a fault developed.
- Too much voltage might be supplied to the lamp. D

- 16 38 A 3.0Ω resistor and a 6.0Ω resistor are connected to a power supply as shown. 3.0Ω 0.00 0.00 0.00What is the total resistance of the circuit? A 2.0Ω B 3.0Ω C 9.0Ω D 18Ω
 - **39** In the lighting circuit in a house, how are lamps usually connected, and what is one reason for this?

	usual connection	reason
Α	parallel	to allow every lamp to have the full supply voltage
в	parallel	to share out the voltage equally between the lamps
С	series	to allow every lamp to have the full supply voltage
D	series	to share out the voltage equally between the lamps

- 40 What are carbon-12 and carbon-14?
 - A atoms of different elements with different nuclear masses
 - **B** atoms of different elements with the same nuclear mass
 - C atoms of the same element with different nuclear masses
 - D atoms of the same element with the same nuclear mass
