## **CAMBRIDGE INTERNATIONAL EXAMINATIONS**

**International General Certificate of Secondary Education** 

## MARK SCHEME for the October/November 2012 series

## 0654 CO-ORDINATED SCIENCES

0654/21 Paper 2 (Core Theory), maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

2 (a) (i) 7 ·		Can	•

**3** (a) (i) 7; >7 to 14 and <7 to 1;

- (ii) meter is more accurate/precise/quantitative reference/litmus paper only shows that solution is acidic;
- (iii) add the barium chloride to the acid; white precipitate/solid indicates sulfuric acid/sulfate (ions)/no reaction shows nitric acid;
- (b) (i) any Group 1 (also strontium/barium);reference to explosive/corrosive substances (splashing onto skin/eyes);[2]
  - (ii) pops; hydrogen given off; [2]
  - (iii) add acid to mixed metals (in beaker);
    reference to adding excess acid e.g. until bubbling stops;
    magnesium reacts/dissolves;
    copper does not react/does not dissolve;
    filter off the copper;
    [max 3]

[Total: 12]

[2]

4 (a) chemical energy in muscles;

kinetic energy changes to gravitational potential energy as she takes off; only gravitational potential energy at top of jump; gravitational potential energy changed back to kinetic energy as she falls; heat/sound energy on landing; [max 3]

(b) gravity; the Earth; [2]

- (c) (i) water/liquid turns to water vapour/gas; (as) particles/molecules get further apart; heat is needed/used to cause evaporation; (more) energetic particles escape (from surface); able to overcome attractive forces of other particles/break bonds between liquid particles;
  - (ii) average energy of remaining particles is less; energy taken from surroundings to do this; [max 1]

[Total: 8]

[max 2]

	Page	e 4		Mark Scheme	Syllabus	2 Vr
				IGCSE – October/November 2012	0654	No.
5	(a) (		carbo	ose/carbohydrate/sugar + oxygen ; on dioxide + water ; able temperature/warmth ; er/moisture ;		BBB Cambridge
	(b) (	i)		control/to check that difference (in measurement) vninating/living seeds;	was caused by	[1]
	(i	ii)		eased rate of respiration with increased temperature C rise doubles rate ;	/positive correlation	[2]
	(ii	ii)		espiration/very little respiration ; mes do not work at high temperatures/enzymes de	enatured ;	[2]
						[Total: 9]
6	(a) (	(i)	therr	mal/light/sound (any two for 1 mark) ; (allow KE)		[1]
	(i	ii)	incre	eases the rate ;		[1]
	(b) (	(i)		as 13 protons ; icle <b>B</b> is uncharged/also has 13 electrons ;		[3]
	(i	ii)	meta	nd <b>D</b> ; s) ion of oxygen and ( <b>D</b> is) ion of aluminium; als and non-metals bond ionically/owtte; have opposite electrical charges/they attract each	other ;	[max 3]
	(c) (	(i)	oxyg	gen ;		[1]
	(i	ii)	pota: idea	vork mixture needs oxygen to burn; ssium perchlorate produces oxygen (when heated); that oxygen needs to be produced in situ/air cayork mixture;		[max 2]
						[Total: 11]
